Specify Component A, B, C, D or E (A-D): _____C_____

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component C 9-11 ELA**
1168	Scoring and Reporting	Winter EOC: Final Report Mockups: Development of the report mockups for all assessments	The contractor will post the final approved report mockups for all assessments to the SFTP. ITN Reference 7.5.5	(1) Final set of approved report mockups posted to the SFTP. (2) Provide Department email reflecting receipt and approval of the report mockups.	October 2015	$0.00
1169					October 2016	$0.00
1170					(Renewal 1 - October 2017)	$0.00
1171					(Renewal 2 - October 2018)	$0.00
1172					(Renewal 3 - October 2019)	$0.00
1173	Scoring and Reporting	Spring EOC: Final Report Mockups: Development of the report mockups for all assessments	The contractor will post the final approved report mockups for all assessments to the SFTP. ITN Reference 7.5.5	(1) Final set of approved report mockups posted to the SFTP. (2) Provide Department email reflecting receipt and approval of the report mockups.	January 2015	$0.00
1174					January 2016	$0.00
1175					January 2017	$0.00
1176					(Renewal 1 - January 2018)	$0.00
1177					(Renewal 2 - January 2019)	$0.00
1178					(Renewal 3 - January 2020)	$0.00
1179	Scoring and Reporting	Summer EOC: Final Report Mockups: Development of the report mockups for all assessments	The contractor will post the final approved report mockups for all assessments to the SFTP. ITN Reference 7.5.5	(1) Final set of approved report mockups posted to the SFTP. (2) Provide Department email reflecting receipt and approval of the report mockups.	April 2015	$0.00
1180					April 2016	$0.00
1181					April 2017	$0.00
1182					(Renewal 1 - April 2018)	$0.00
1183					(Renewal 2 - April 2019)	$0.00
1184					(Renewal 3 - April 2020)	$0.00
1185	Scoring and Reporting	Fall ELA/L Retake: Development of the history files for EOC and ELA/Mathematics	The contractor will create and update history files after each test administration using the requirements specified in the SR specifications. ITN Reference 7.5.4.2	(1) History files posted to the SFTP. (2) Provide Department email reflecting receipt and approval of the history data files.	December 2015	$2,000.00
1186					December 2016	$2,000.00
1187					(Renewal 1 - December 2017)	$2,000.00
1188					(Renewal 2 - December 2018)	$2,000.00
1189					(Renewal 3 - December 2019)	$2,000.00
1190	Scoring and Reporting	Spring ELA/L Retake: Development of the history files for EOC and ELA/Mathematics	The contractor will create and update history files after each test administration using the requirements specified in the SR specifications. ITN Reference 7.5.4.2	(1) History files posted to the SFTP. (2) Provide Department email reflecting receipt and approval of the history data files.	October 2016	$4,000.00
1191					October 2017	$1,000.00
1192					(Renewal 1 - October 2018)	$1,000.00
1193					(Renewal 2 - October 2019)	$1,000.00
1194					(Renewal 3 - October 2020)	$1,000.00
1195	Scoring and Reporting	Spring ELA/L and Mathematics: Development of the history files for EOC and ELA/Mathematics	The contractor will create and update history files after each test administration using the requirements specified in the SR specifications. ITN Reference 7.5.4.2	(1) History files posted to the SFTP. (2) Provide Department email reflecting receipt and approval of the history data files.	October 2015	$3,000.00
1196					October 2016	$1,000.00
1197					October 2017	$1,000.00
1198					(Renewal 1 - October 2018)	$1,000.00
1199					(Renewal 2 - October 2019)	$1,000.00
1200					(Renewal 3 - October 2020)	$1,000.00
1201	Scoring and Reporting	Fall EOC: Development of the history	The contractor will create and update history files	(1) History files posted to the SFTP.	December 2015	$0.00

1265	Scoring and Reporting	Summer EOC: Manual Rescore Log: Development of the log to record the PBT test with passing scores for manual rescoring.	The contractor will create a log to identify students who qualified for manual rescoring and provide this log to the Department. The log will follow the requirements specified in the SR Specification. ITN Reference 7.5.6.5	(1) Manual rescore log posted to the online management system. (2) Provide Department email reflecting receipt of log.	July 2015	$0.00
1266					July 2016	$0.00
1267					July 2017	$0.00
1268					(Renewal 1 - July 2018)	$0.00
1269					(Renewal 2 - July 2019)	$0.00
1270					(Renewal 3 - July 2020)	$0.00
1271	Scoring and Reporting	Periodic: Writing Image CD/DVD or jump drives and proof to delivery: Development of the Writing Image CD/DVD or jump drives.	The contractor will create and ship Writing images for all students who submitted a folder to be scored and ship these CDs to the districts with one CD/DVD or jump drives for each grade tested. The contractor will submit proof of delivery to the Department after all of the Writing Image CD/DVD or jump drives are delivered to districts. ITN Reference 7.5.5	1) Provide Department email reflecting receipt and approval of the sample CD/DVD or jump drives. (2) Provide proof of delivery spreadsheet listing the following for each shipment: date/time delivered, who received materials, destination address, quantity and type of material delivered. Must show proof of successful delivery to all participating districts.	July 2015	$12,266.00
1272					July 2016	$12,266.00
1273					July 2017	$12,266.00
1274					(Renewal 1 - July 2018)	$12,266.00
1275					(Renewal 2 - July 2019)	$12,266.00
1276					(Renewal 3 - July 2020)	$12,266.00
1277	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Test Construction Specifications	The Contractor will deliver Test Construction Specifications for ELA/Literacy and Mathematics, Algebra 1, Algebra 2, Geometry, and Retake Assessments. The final specifications shall be evaluated and approved by the Department. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution. ITN Reference 7.6.0, 7.6.1, and 7.6.2	(1) Test Construction Specifications are secure, and therefore the Contractor shall provide a report which indicates the completed status of Specifications posted to Secure File Transfer Protocol (SFTP). (2) Provide Department email reflecting receipt and approval of the Test Construction Specifications.	May 2014	$41,346.00
1278					May 2015	$2,000.00
1279					May 2016	$0.00
1280					(Renewal 1 - May 2017)	$0.00
1281					(Renewal 2 - May 2018)	$0.00
1282					(Renewal 3 - May 2019)	$0.00

Attachment 1b - DELIVERABLES PRICING

Specify Component A, B, C, D or E (A-D): _____C_____

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component C 9-11 ELA**
1283	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Test Forms for Field Test and/or Operational Administrations	All paper-based and computer-based forms for the tests, as agreed upon by the Department and memorialized in the approved Test Construction Specifications, must be submitted and approved. ITN Reference 7.6.0 and 7.6.1	(1) Test forms are secure, and therefore the contractor shall post them to SFTP. The Department shall maintain a copy of the materials on file as needed for evidence of completion of the deliverable. (2) Provide Department email reflecting receipt and approval of the final paper-based and computer-based forms.	July 2014	$59,589.00
1284					July 2015	$59,589.00
1285					July 2016	$59,589.00
1286					(Renewal 1 - July 2017)	$59,589.00
1287					(Renewal 2 - July 2018)	$59,589.00
1288					(Renewal 3 - July 2019)	$59,589.00
1289	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Sampling Plans	Detailed plan for sampling of students from the State. Sampling plan must describe the initial analyses on the SSR files, introducing plans for how to collect data, and the list of post-hoc analyses for representativeness checks when data from test administrations are in for operational processing. ITN Reference 7.6.2.2	(1) Final versions of sampling plans posted to SFTP. (2) Provide Department email reflecting receipt and approval of the sampling plans.	July 2014	$6,000.00
1290					July 2015	$2,000.00
1291					July 2016	$2,000.00
1292					(Renewal 1 - July 2017)	$2,000.00
1293					(Renewal 2 - July 2018)	$2,000.00
1294					(Renewal 3 - July 2019)	$2,000.00
1295	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Drawing Samples for Operational and/or Field Test Administrations	Delivering the data files including sampled units from the populations and the respective reports. Sampling report must describe the initial analyses on the SSR files, procedures for how to collect data, evaluate the representativeness of resulting sample and a list of post-hoc analyses for representativeness checks when data from test administrations are in for operational processing. ITN Reference 7.6.0, 7.6.1, and 7.6.2.2	(1) Data files, including sampled units from the populations, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the samples.	August 2014	$6,000.00
1296					August 2015	$2,000.00
1297					August 2016	$2,000.00
1298					(Renewal 1 - August 2017)	$2,000.00
1299					(Renewal 2 - August 2018)	$2,000.00
1300					(Renewal 3 - August 2019)	$2,000.00
1301	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the SES Specifications	Preparing a detailed plan for conducting all scaling and equating plans and procedures, scoring plans and procedures. The plan should include a comprehensive and detailed timeline for all tasks and events. The plan should also provide a detailed description of the outcomes produced from the	(1) SES Specifications (secure) posted to SFTP. (2) Provide Department email reflecting receipt and approval of the SES Specifications.	December 2014	$35,000.00
1302					December 2015	$2,000.00
1303					December 2016	$2,000.00
1304					(Renewal 1 - December 2017)	$2,000.00
1305					(Renewal 2 - December 2018)	$2,000.00

1328					(Renewal 1 - December 2018)	$151,570.00
1329					(Renewal 2 - December 2019)	$151,570.00
1330					(Renewal 3 - December 2020)	$151,570.00
1331	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments	Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments ITN Reference 7.6.3.3	(1) Submit initial versions and the final versions of Scale Linking Plans (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	November 2014	$20,412.00
1332						$0.00
1333	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Collecting Legal Opinion	Collecting legal opinion, subject to the Department's approval, about the defensibility of linking methodology. ITN Reference 7.6.3.3	(1) Submit final version of the legal opinion document (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	October 2014	$697,578.00
1334						$0.00
1335	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Scales during transitioning years to find out FCAT 2.0 and EOC equivalents based on the performance of students on the Florida Standards Assessments	Conducting all linking operations and scoring activities as laid out in the approved linking specifications. ITN Reference 7.6.3.3	(1) Submit final look-up tables and scored files (secure files) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the files.	May 2015	$85,970.00
1336						$0.00

Attachment 1b - DELIVERABLES PRICING

Specify Component A, B, C, D or E (A-D): _____C_____

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component C 9-11 ELA**
1337	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Standard Setting Work Plan	Prepare a Standard Setting Work plan for setting achievement level standards for ELA/Literacy, Mathematics, Algebra 1 &2, and Geometry assessments. Plan must include every detail of the methodology, internal and external data files, and the timeline for all of the activities during educator and reactor panel meetings. The Plan must be vetted by TAC members and the methodology must be approved by the department. ITN Reference 7.6.3.4	(1) Submit the final version of Standard Setting Work Plan and relevant materials, such as slides (secure materials), posted to SFTP. (2) Provide Department email reflecting receipt and approval of the documents.	January 2015	$2,000.00
1338	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Implement Achievement Level Standard Setting Meetings	Hold the required meetings and collect recommended cut scores from all relevant groups, as described in ITN Reference 7.6.3.4	(1) Submit the initial version of the Standard Setting Technical Report (secure file), including recommended cuts and impact data, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	October 2015	$115,401.00
1339	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Finalizing Standard Setting Technical Report	Preparing Technical Reports, as described in section 7.6.3.4. Collecting Feedback from the Department and Technical Advisory Committee (TAC), finalizing the reports after incorporating the feedback, and submitting the final versions of the reports to the Department. ITN Reference 7.6.3.4	(1) Submit the final version of the Standard Setting Technical Report (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	November 2015	$30,761.00
1340	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Vertical Scaling Specifications	Preparing a detailed plan for conducting all vertical scaling procedures. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.5 The plan must be vetted by TAC members. ITN Reference 7.6.3.5 (Repeated in contract renewal)	(1) Post the plan for Vertical Scaling (secure file) via SFTP. (2) Provide Department email reflecting receipt and approval of the Vertical Specifications.	November 2014	$0.00
1341					(Renewal 1 - November 2017)	$0.00

1342	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Vertical Scaling Activities and Preparing Technical Report	Conducting all scaling and equating, and scoring activities as laid out in the specifications. ITN Reference 7.6.3.5 (Repeated in contract renewal)	(1) Submit Final Technical Report and Scored SSR Files (secure files), including vertically aligned scale scores, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2015	$0.00
1343					(Renewal 2 - August 2018)	$0.00
1344	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Drift Study Specifications	Preparing a detailed plan for conducting scale drift study. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.6 The plan must be vetted by TAC members. ITN Reference 7.6.3.6	(1) Submit the plan for conducting the scale drift study (secure) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the scale drift study specifications.	(Renewal 1 - July 2017)	$17,819.00
1345						$0.00
1346	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Scale Drift Research and Preparing Technical Report	Conducting all scaling and equating, and scoring activities as laid out in the specifications. ITN Reference 7.6.3.6	(1) Submit Final Technical Report and rescaled item parameters (secure files) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	(Renewal 2 - August 2018)	$45,291.00
1347						$0.00
1348	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Specifications for Comparability Between Devices Delivering Assessments	Preparing a detailed plan for conducting comparability study. The plan should include a comprehensive and detailed timeline for all tasks	(1) Submit the plan for conducting the comparability study (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and	November 2014	$5,400.00

			and events, as described in section 7.6.3.7 The plan must be vetted by TAC members. The plan should include the degree of comparability of item-level and test-level statistics across devices. The plan should include the degree of comparability of item-level and test-level statistics across various input types. For the questions above, the plan should address to what degree of comparability can be obtained through scaling items onto a single metric, linking or concordance. The plan should also include what interactions exist among device, input type and item/task characteristics, grade, subject, and relevant student characteristics. ITN Reference 7.6.3.6.1	approval of the study specifications.		$0.00
1349						
1350	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Study for Comparability Between Devices Delivering Assessments, Preparing its Final Report, and Recommendations with TAC Committee	Conducting all of the planned analyses, preparing its technical report, and sharing the findings and recommendations with TAC members. ITN Reference 7.6.3.6.1	(1) Submit Final Report and Recommendations to the Department. These materials are secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2015	$29,752.00
1351						$0.00
1352	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of a study plan for linking Florida Standards Assessments to other assessments measuring the same standards	Preparing a detailed plan for conducting the linking study. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.8 The plan must be vetted by TAC members.	(1) The plan for conducting comparability study is secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the study specifications.	November 2015	$900.00

1358	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Florida Standards Assessments to International Assessments	Conducting all of the planned analyses, preparing a final technical report, and sharing the results of linked relationships with TAC committee to discuss the validity of interpretations. ITN Reference 7.6.3.6.3	(1) Submit Final Report and Recommendations to the Department. These materials are secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2016	$900.00
1359						$0.00
1360	Program Management	Periodic: Production Schedule	The production schedule shows the Department's beginning and ending review dates by test document for each review round. ITN Reference 7.7.2	(1) Appearance of schedule in weekly management report (2) Provide Department email reflecting approval of proposed or revised production schedule.	April 15, 2014	$47,285.00
1361					April 15, 2015	$19,950.00
1362					April 15, 2016	$19,950.00
1363					(Renewal 1 - April 15, 2017)	$19,950.00
1364					(Renewal 2 - April 15, 2018)	$19,950.00
1365					(Renewal 3 - April 15, 2019)	$19,950.00
1366	Program Management	Periodic: Program Management Meetings	The contractor will coordinate regular management meetings between the contractor and Department staff. The number and type of meetings are provided in 7.7.5 of the ITN.	(1) Include support for all meetings since the previous invoice. (2) Provide the meeting costs, a final agenda, and a final list of attendees for each meeting.	2015	$121,879.00
1367					2016	$122,426.00
1368					2017	$122,851.00
1369					(Renewal 1 - 2018)	$123,260.00
1370					(Renewal 2 - 2019)	$124,154.00
1371					(Renewal 3 - 2020)	$124,566.00
1372	Program Management	Periodic: Program Management Staff	The work described in the ITN constitutes a large, complex, challenging program that requires year-round activity and close attention to overlapping tasks for different years and the impact on project resources. The contractor is expected to provide a sufficient number of highly-qualified personnel to work closely with the Department to manage the contract. Specific requirements are in 7.7.2 of the ITN.	(1) Include support for program management staff operational for the invoice period. (2) Provide an organization chart with the appropriate staff indicated for each invoice period. (Quarterly invoices to occur in February, May, August, and November)	2015	$1,139,500.00
1373					2016	$1,276,463.00
1374					2017	$1,287,729.00
1375					(Renewal 1 - 2018)	$1,102,105.00
1376					(Renewal 2 - 2019)	$1,122,579.00
1377					(Renewal 3 - 2020)	$1,129,158.00
1378	Program Management	Periodic: Program Management Reports: Weekly Management and Action Item Report	The Weekly Management Report and Action Item Report will report the status of recent and upcoming tasks, highlighting those leading up to deliverables and critical tasks, report progress on program issues, identify unresolved issues, and maintain a list of requests requiring change orders	(1) For each invoice period, provide one management report from each month since the previous invoice period. (Quarterly invoices to occur in February, May, August, and November)	2014	$112,459.00
1379					2015	$112,459.00
1380					2016	$112,459.00
1381					(Renewal 1 - 2017)	$112,459.00
1382					(Renewal 2 - 2018)	$112,459.00

1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component C 9-11 ELA**
			maintain a list of requests requiring change orders or amendments. The weekly report will be provided to the Department by no later than noon one day prior to the weekly program management conference calls and will reflect the previous week's work. ITN Ref 7.7.6		(Renewal 3 - 2019)	$112,459.00
1383						
1384	Program Management	Periodic: Annual Program Review	Review will include a record of the contractor's services and deliverables in response to contractual/ITN requirements. This review must identify major program accomplishments and successes, as well as areas of the program that require changes and improvement in the upcoming year. The review is intended to be a history of program events and to describe recommended improvements or changes for subsequent years. The annual review will be based on information gathered by the contractor's program and project management staff throughout the year. The review will address all aspects of program service and products including management, technology, interpretive products, communications, development, test production, test administration, materials shipping/pickup, scoring, and reporting processes. It will also follow the annual administrative cycle, beginning with fall and ending with the following summer. ITN Reference 7.7.6	(1) Provide evidence of Department acceptance and approval of the annual program review for the previous administration year.	November 2015	$54,642.00
1385					November 2016	$54,642.00
1386					November 2017	$54,642.00
1387					(Renewal 1 - November 2018)	$54,642.00
1388					(Renewal 2 - November 2019)	$54,642.00
					(Renewal 3 - November 2020)	$54,642.00
1389						
1390	Program Management	Periodic: Program Management Reports: Collect Accounting Reports	A summary of the Quarterly Accounting Reports, including expenditures by program task and level of effort as well as expenditures and balances of Reimbursable Funding Categories identified in Section 7.7.9, including balances resulting from executed change orders and contract amendments	(1) For each invoice period, provide the quarterly accounting reports. (Quarterly invoices to occur in February, May, August, and November)	2014	$69,917.00
1391					2015	$69,797.00
1392					2016	$69,797.00
1393					(Renewal 1 - 2017)	$69,797.00
1394					(Renewal 2 - 2018)	$69,797.00

56					(Renewal 3 - June 1, 2019)	$2,000.00
57	Test Development	Periodic: Interpretive Products: Test Item Specifications Documents	Test item specifications will be produced for all grades/subjects and may be grouped together in one booklet by grade band or content area. They are based on the standards and define both the content and the format of the test items. Their primary purpose is to establish guidelines for test item writers and reviewers. ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of each test item specification document. (2) Final PDF files provided via SFTP.	November 1, 2015	$35,812.00
58	Test Development	Periodic: ELA/L and Mathematics Sample Scoring Guides	The contractor will be expected to post electronic publications that provide information to help educators understand the scoring of constructed-response items included on student reports. These publications provide information about the test design, standards and benchmarks, item types, and how items are scored. They also provide scoring rubrics and the annotated papers used to train	(1) Provide Department email reflecting approval of each scoring guide. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$15,722.00
59					2016	$2,000.00
60					2017	$2,000.00
61					(Renewal 1 - 2018)	$2,000.00
62					(Renewal 2 - 2019)	$2,000.00

86					(Renewal 3 - July 15, 2019)	$24,381.00
87	Test Development	Periodic: Item Development Plan	To ensure the quality and number of items/passages developed is sufficient to create future operational test forms, the contractor will submit an item development plan delineating the number and types of items to be developed. ITN Reference 7.3.0	1) Provide Department email reflecting completion of the Item Development Plan. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$11,652.00
88					December 1, 2016	$11,652.00
89					(Renewal 1 - December 1, 2017)	$11,652.00
90					(Renewal 2 - December 1, 2018)	$11,652.00
91	Test Development	Periodic: Item Writer Training	The contractor must identify and recruit a sufficient number of highly-qualified writers for passages and items to ensure variety and quality of development. The contractor, in conjunction with the Department, will conduct an annual training session for all Item Writers. ITN Reference 7.3.3	1) Provide Department email reflecting completion of Item Writer Training. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$9,679.00
92					December 1, 2016	$4,555.00
93					(Renewal 1 - December 1, 2017)	$4,555.00
94					(Renewal 2 - December 1, 2018)	$4,555.00
95	Test Development	Periodic: Meetings with Educators	The contractor is responsible for organizing and convening meetings for the purpose of reviewing assessment items and otherwise supporting the assessment program. These meetings are referenced in the ITN in 7.3.4 and 7.7.7. This deliverable includes the cost of preparing for and	(1) Include support for all meetings since the previous invoice. (2) Provide the meeting costs, a final agenda, and a final list of attendees for each meeting.	(Dates to be negotiated.) 2015	$55,695.00
96					2016	$56,441.00
97					2017	$57,205.00
98					(Renewal 1 - 2018)	$58,783.00

The contractor will submit proof of delivery to the Department after all of the Writing Image CD/DVD or jump drives are delivered to districts. ITN Reference 7.5.5	1) Provide Department email reflecting receipt and approval of the sample CD/DVD or jump drives. (2) Provide proof of delivery spreadsheet listing the following for each shipment: date/time delivered, who received materials, destination address, quantity and type of material delivered. Must show proof of successful delivery to all participating districts.	July 2015	$12,266.00
1272					July 2016	$12,266.00
1273					July 2017	$12,266.00
1274					(Renewal 1 - July 2018)	$12,266.00
1275					(Renewal 2 - July 2019)	$12,266.00
1276					(Renewal 3 - July 2020)	$12,266.00
1277	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Test Construction Specifications	The Contractor will deliver Test Construction Specifications for ELA/Literacy and Mathematics, Algebra 1, Algebra 2, Geometry, and Retake Assessments. The final specifications shall be evaluated and approved by the Department. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution. ITN Reference 7.6.0, 7.6.1, and 7.6.2	(1) Test Construction Specifications are secure, and therefore the Contractor shall provide a report which indicates the completed status of Specifications posted to Secure File Transfer Protocol (SFTP). (2) Provide Department email reflecting receipt and approval of the Test Construction Specifications.	May 2014	$41,346.00
1278					May 2015	$2,000.00
1279					May 2016	$0.00
1280					(Renewal 1 - May 2017)	$0.00
1281					(Renewal 2 - May 2018)	$0.00
1282					(Renewal 3 - May 2019)	$0.00

Attachment 1b - DELIVERABLES PRICING

Specify Component A, B, C, D or E (A-D): _____D_____

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component D EOC**
1283	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Test Forms for Field Test and/or Operational Administrations	All paper-based and computer-based forms for the tests, as agreed upon by the Department and memorialized in the approved Test Construction Specifications, must be submitted and approved. ITN Reference 7.6.0 and 7.6.1	(1) Test forms are secure, and therefore the contractor shall post them to SFTP. The Department shall maintain a copy of the materials on file as needed for evidence of completion of the deliverable. (2) Provide Department email reflecting receipt and approval of the final paper-based and computer-based forms.	July 2014	$79,452.00
1284					July 2015	$79,452.00
1285					July 2016	$79,452.00
1286					(Renewal 1 - July 2017)	$79,452.00
1287					(Renewal 2 - July 2018)	$79,452.00
1288					(Renewal 3 - July 2019)	$79,452.00
1289	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Sampling Plans	Detailed plan for sampling of students from the State. Sampling plan must describe the initial analyses on the SSR files, introducing plans for how to collect data, and the list of post-hoc analyses for representativeness checks when data from test administrations are in for operational processing. ITN Reference 7.6.2.2	(1) Final versions of sampling plans posted to SFTP. (2) Provide Department email reflecting receipt and approval of the sampling plans.	July 2014	$6,000.00
1290					July 2015	$2,000.00
1291					July 2016	$2,000.00
1292					(Renewal 1 - July 2017)	$2,000.00
1293					(Renewal 2 - July 2018)	$2,000.00
1294					(Renewal 3 - July 2019)	$2,000.00
1295	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Drawing Samples for Operational and/or Field Test Administrations	Delivering the data files including sampled units from the populations and the respective reports. Sampling report must describe the initial analyses on the SSR files, procedures for how to collect data, evaluate the representativeness of resulting sample and a list of post-hoc analyses for representativeness checks when data from test administrations are in for operational processing. ITN Reference 7.6.0, 7.6.1, and 7.6.2.2	(1) Data files, including sampled units from the populations, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the samples.	August 2014	$6,000.00
1296					August 2015	$2,000.00
1297					August 2016	$2,000.00
1298					(Renewal 1 - August 2017)	$2,000.00
1299					(Renewal 2 - August 2018)	$2,000.00
1300					(Renewal 3 - August 2019)	$2,000.00
1301	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the SES Specifications	Preparing a detailed plan for conducting all scaling and equating plans and procedures, scoring plans and procedures. The plan should include a comprehensive and detailed timeline for all tasks and events. The plan should also provide a detailed description of the outcomes produced from the	(1) SES Specifications (secure) posted to SFTP. (2) Provide Department email reflecting receipt and approval of the SES Specifications.	December 2014	$35,000.00
1302					December 2015	$2,000.00
1303					December 2016	$2,000.00
1304					(Renewal 1 - December 2017)	$2,000.00
1305					(Renewal 2 - December 2018)	$2,000.00

1337	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Standard Setting Work Plan	Prepare a Standard Setting Work plan for setting achievement level standards for ELA/Literacy, Mathematics, Algebra 1 &2, and Geometry assessments. Plan must include every detail of the methodology, internal and external data files, and the timeline for all of the activities during educator and reactor panel meetings. The Plan must be vetted by TAC members and the methodology must be approved by the department. ITN Reference 7.6.3.4	(1) Submit the final version of Standard Setting Work Plan and relevant materials, such as slides (secure materials), posted to SFTP. (2) Provide Department email reflecting receipt and approval of the documents.	January 2015	$2,000.00
1338	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Implement Achievement Level Standard Setting Meetings	Hold the required meetings and collect recommended cut scores from all relevant groups, as described in ITN Reference 7.6.3.4	(1) Submit the initial version of the Standard Setting Technical Report (secure file), including recommended cuts and impact data, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	October 2015	$115,401.00
1339	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Finalizing Standard Setting Technical Report	Preparing Technical Reports, as described in section 7.6.3.4. Collecting Feedback from the Department and Technical Advisory Committee (TAC), finalizing the reports after incorporating the feedback, and submitting the final versions of the reports to the Department. ITN Reference 7.6.3.4	(1) Submit the final version of the Standard Setting Technical Report (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	November 2015	$30,761.00
1340	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Vertical Scaling Specifications	Preparing a detailed plan for conducting all vertical scaling procedures. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.5 The plan must be vetted by TAC members. ITN Reference 7.6.3.5 (Repeated in contract renewal)	(1) Post the plan for Vertical Scaling (secure file) via SFTP. (2) Provide Department email reflecting receipt and approval of the Vertical Specifications.	November 2014	$0.00
1341					(Renewal 1 - November 2017)	$0.00

1342	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Vertical Scaling Activities and Preparing Technical Report	Conducting all scaling and equating, and scoring activities as laid out in the specifications. ITN Reference 7.6.3.5 (Repeated in contract renewal)	(1) Submit Final Technical Report and Scored SSR Files (secure files), including vertically aligned scale scores, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2015	$0.00
1343					(Renewal 2 - August 2018)	$0.00
1344	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Drift Study Specifications	Preparing a detailed plan for conducting scale drift study. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.6 The plan must be vetted by TAC members. ITN Reference 7.6.3.6	(1) Submit the plan for conducting the scale drift study (secure) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the scale drift study specifications.	(Renewal 1 - July 2017)	$17,819.00
1345						$0.00
1346	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Scale Drift Research and Preparing Technical Report	Conducting all scaling and equating, and scoring activities as laid out in the specifications. ITN Reference 7.6.3.6	(1) Submit Final Technical Report and rescaled item parameters (secure files) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	(Renewal 2 - August 2018)	$45,291.00
1347						$0.00
1348	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Specifications for Comparability Between Devices Delivering Assessments	Preparing a detailed plan for conducting comparability study. The plan should include a comprehensive and detailed timeline for all tasks	(1) Submit the plan for conducting the comparability study (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and	November 2014	$5,400.00

1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component D EOC**
			and events, as described in section 7.6.3.7 The plan must be vetted by TAC members. The plan should include the degree of comparability of item-level and test-level statistics across devices. The plan should include the degree of comparability of item-level and test-level statistics across various input types. For the questions above, the plan should address to what degree of comparability can be obtained through scaling items onto a single metric, linking or concordance. The plan should also include what interactions exist among device, input type and item/task characteristics, grade, subject, and relevant student characteristics. ITN Reference 7.6.3.6.1	approval of the study specifications.		$0.00
1349						
1350	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Study for Comparability Between Devices Delivering Assessments, Preparing its Final Report, and Recommendations with TAC Committee	Conducting all of the planned analyses, preparing its technical report, and sharing the findings and recommendations with TAC members. ITN Reference 7.6.3.6.1	(1) Submit Final Report and Recommendations to the Department. These materials are secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2015	$29,752.00
1351						$0.00
1352	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of a study plan for linking Florida Standards Assessments to other assessments measuring the same standards	Preparing a detailed plan for conducting the linking study. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.8 The plan must be vetted by TAC members.	(1) The plan for conducting comparability study is secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the study specifications.	November 2015	$900.00

Attachment 1b - DELIVERABLES PRICING

Specify Component A, B, C, D or E (A-D): _____D_____

			The plan should include a review of the most promising and most feasible methods in linking, discuss the technical feasibility of such methods, and explain the process of establishing the linking relationship(s) in detail. ITN Reference 7.6.3.6.2			$0.00
1353						
1354	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Florida Standards Assessments to other assessments	Conducting all of the planned analyses, preparing a final technical report, and sharing the results of linked relationships with TAC committee to discuss the validity of interpretations. ITN Reference 7.6.3.6.2	(1) Submit Final Report and Recommendations (secure files) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2016	$9,868.00
1355						$0.00
1356	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of a study plan for the linking Florida Standards Assessments to International Assessments	The Contractor's plan will include, review of the most promising and most feasible methods likely to be used in international linking, discuss the technical feasibility of each method given the nature and design of the Florida Standards Assessments and those of international assessments such as PISA and TIMSS, propose method(s) for linking the scales of assessments, propose alternative ways for collecting data, explain the process of establishing the linking relationship(s) in detail, and provide a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.9. The contractor will share the report with the Department and its TAC members. Upon approval from the Department, the contractor will finalize the plan for the linking. ITN Reference 7.6.3.6.3	(1) The plan for conducting the linking study is secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the study specifications.	November 2015	$900.00
						$0.00

1358	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Florida Standards Assessments to International Assessments	Conducting all of the planned analyses, preparing a final technical report, and sharing the results of linked relationships with TAC committee to discuss the validity of interpretations. ITN Reference 7.6.3.6.3	(1) Submit Final Report and Recommendations to the Department. These materials are secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2016	$900.00
1359						$0.00
1360	Program Management	Periodic: Production Schedule	The production schedule shows the Department's beginning and ending review dates by test document for each review round. ITN Reference 7.7.2	(1) Appearance of schedule in weekly management report (2) Provide Department email reflecting approval of proposed or revised production schedule.	April 15, 2014	$47,285.00
1361					April 15, 2015	$19,950.00
1362					April 15, 2016	$19,950.00
1363					(Renewal 1 - April 15, 2017)	$19,950.00
1364					(Renewal 2 - April 15, 2018)	$19,950.00
1365					(Renewal 3 - April 15, 2019)	$19,950.00
1366	Program Management	Periodic: Program Management Meetings	The contractor will coordinate regular management meetings between the contractor and Department staff. The number and type of meetings are provided in 7.7.5 of the ITN.	(1) Include support for all meetings since the previous invoice. (2) Provide the meeting costs, a final agenda, and a final list of attendees for each meeting.	2015	$121,879.00
1367					2016	$122,426.00
1368					2017	$122,851.00
1369					(Renewal 1 - 2018)	$123,260.00
1370					(Renewal 2 - 2019)	$124,154.00
1371					(Renewal 3 - 2020)	$124,566.00
1372	Program Management	Periodic: Program Management Staff	The work described in the ITN constitutes a large, complex, challenging program that requires year-round activity and close attention to overlapping tasks for different years and the impact on project resources. The contractor is expected to provide a sufficient number of highly-qualified personnel to work closely with the Department to manage the contract. Specific requirements are in 7.7.2 of the ITN.	(1) Include support for program management staff operational for the invoice period. (2) Provide an organization chart with the appropriate staff indicated for each invoice period. (Quarterly invoices to occur in February, May, August, and November)	2015	$1,139,500.00
1373					2016	$1,276,463.00
1374					2017	$1,287,729.00
1375					(Renewal 1 - 2018)	$1,102,105.00
1376					(Renewal 2 - 2019)	$1,122,579.00
1377					(Renewal 3 - 2020)	$1,129,158.00
1378	Program Management	Periodic: Program Management Reports: Weekly Management and Action Item Report	The Weekly Management Report and Action Item Report will report the status of recent and upcoming tasks, highlighting those leading up to deliverables and critical tasks, report progress on program issues, identify unresolved issues, and maintain a list of requests requiring change orders	(1) For each invoice period, provide one management report from each month since the previous invoice period. (Quarterly invoices to occur in February, May, August, and November)	2014	$112,459.00
1379					2015	$112,459.00
1380					2016	$112,459.00
1381					(Renewal 1 - 2017)	$112,459.00
1382					(Renewal 2 - 2018)	$112,459.00

			maintain a list of requests requiring change orders or amendments. The weekly report will be provided to the Department by no later than noon one day prior to the weekly program management conference calls and will reflect the previous week's work. ITN Ref 7.7.6		(Renewal 3 - 2019)	$112,459.00
1383						
1384	Program Management	Periodic: Annual Program Review	Review will include a record of the contractor's services and deliverables in response to contractual/ITN requirements. This review must identify major program accomplishments and successes, as well as areas of the program that require changes and improvement in the upcoming year. The review is intended to be a history of program events and to describe recommended improvements or changes for subsequent years. The annual review will be based on information gathered by the contractor's program and project management staff throughout the year. The review will address all aspects of program service and products including management, technology, interpretive products, communications, development, test production, test administration, materials shipping/pickup, scoring, and reporting processes. It will also follow the annual administrative cycle, beginning with fall and ending with the following summer. ITN Reference 7.7.6	(1) Provide evidence of Department acceptance and approval of the annual program review for the previous administration year.	November 2015	$54,642.00
1385					November 2016	$54,642.00
1386					November 2017	$54,642.00
1387					(Renewal 1 - November 2018)	$54,642.00

141					2017	$1,000.00
142					(Renewal 1-2018)	$1,000.00
143					(Renewal 2-2019)	$1,000.00
144					(Renewal 3-2020)	$1,000.00
145	Test Administration	Summer EOC: Inventory missing materials and provide a report.	Once all materials are scanned in and inventoried, districts are contacted and asked to locate and return any secure materials identified as missing. After a thorough search has been conducted by districts, materials have been accounted for, and any additional searches have been exhausted at the contractor's facilities, the contractor provides a final report listing any outstanding missing materials. ITN Reference 7.4.2	1) Final missing materials report. 2) Provide Department email reflecting approval of the report.	After each test administration, contingent on final administration dates. Finalize during negotiations. 2015	$1,000.00
146					2016	$1,000.00
147					2017	$1,000.00
148					(Renewal 1-2018)	$1,000.00
149					(Renewal 2-2019)	$1,000.00
150					(Renewal 3-2020)	$1,000.00
151	Test Administration	Fall ELA/L Retake: Develop packaging and distribution specifications for each test administration.	A document detailing all processes, procedures, and requirements for the packaging and distribution of test materials, ancillary materials, and student reports. ITN Reference 7.4.1	(1) Digital copy of the approved specifications. (2) Provide Department email reflecting approval of the Specifications.	Prior to each test administration, TBD based on packaging requirements of the selected contractor (must be finalized in sufficient time for the contractor to complete the work before the critical delivery dates). Finalize during negotiations. 2015.	$0.00
152						$98,074.00
153					2016	$81,868.00
154					(Renewal 1- 2017)	$87,228.00

1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component E All Components**
1324			the steps, procedures, and software required for replication of the sampling procedures by the Department. The specifications will be reviewed by the Department and TAC members, if necessary, and updated by the contractor for each subsequent administration. ITN Reference 7.6.2.2		(Renewal 3 - 2020)	$1,000.00
1325	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Creating and Finalizing Technical Reports	Preparing Technical Reports, as described in section 7.6.3.2. Note that Table of contents listed in 7.6.3.2 includes the minimum requirements for the report. Collecting Feedback from the Department and Technical Advisory Committee (TAC), finalizing the reports after incorporating the feedback, and submitting the final versions of the reports to the Department. ITN Reference 7.6.3.2	(1) Submit initial versions and the final versions of Technical Reports (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the technical reports.	December 2015	$157,381.00
1326					December 2016	$252,617.00
1327					December 2017	$252,617.00
1328					(Renewal 1 - December 2018)	$252,617.00
1329					(Renewal 2 - December 2019)	$252,617.00
1330					(Renewal 3 - December 2020)	$252,617.00
1331	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments	Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments ITN Reference 7.6.3.3	(1) Submit initial versions and the final versions of Scale Linking Plans (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	November 2014	$20,412.00
1332						$0.00
1333	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Collecting Legal Opinion	Collecting legal opinion, subject to the Department's approval, about the defensibility of linking methodology. ITN Reference 7.6.3.3	(1) Submit final version of the legal opinion document (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	October 2014	$99,654.00
1334						$0.00
1335	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Scales during transitioning years to find out FCAT 2.0 and EOC equivalents based on the performance of students on the Florida Standards Assessments	Conducting all linking operations and scoring activities as laid out in the approved linking specifications. ITN Reference 7.6.3.3	(1) Submit final look-up tables and scored files (secure files) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the files.	May 2015	$122,814.00
1336						$0.00

1337	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Standard Setting Work Plan	Prepare a Standard Setting Work plan for setting achievement level standards for ELA/Literacy, Mathematics, Algebra 1 &2, and Geometry assessments. Plan must include every detail of the methodology, internal and external data files, and the timeline for all of the activities during educator and reactor panel meetings. The Plan must be vetted by TAC members and the methodology must be approved by the department. ITN Reference 7.6.3.4	(1) Submit the final version of Standard Setting Work Plan and relevant materials, such as slides (secure materials), posted to SFTP. (2) Provide Department email reflecting receipt and approval of the documents.	January 2015	$2,000.00
1338	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Implement Achievement Level Standard Setting Meetings	Hold the required meetings and collect recommended cut scores from all relevant groups, as described in ITN Reference 7.6.3.4	(1) Submit the initial version of the Standard Setting Technical Report (secure file), including recommended cuts and impact data, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	October 2015	$230,802.00
1339	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Finalizing Standard Setting Technical Report	Preparing Technical Reports, as described in section 7.6.3.4. Collecting Feedback from the Department and Technical Advisory Committee (TAC), finalizing the reports after incorporating the feedback, and submitting the final versions of the reports to the Department. ITN Reference 7.6.3.4	(1) Submit the final version of the Standard Setting Technical Report (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	November 2015	$34,179.00
1340	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Vertical Scaling Specifications	Preparing a detailed plan for conducting all vertical scaling procedures. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.5 The plan must be vetted by TAC members. ITN Reference 7.6.3.5 (Repeated in contract renewal)	(1) Post the plan for Vertical Scaling (secure file) via SFTP. (2) Provide Department email reflecting receipt and approval of the Vertical Specifications.	November 2014	$10,000.00
1341					(Renewal 1 - November 2017)	$5,000.00

1342	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Vertical Scaling Activities and Preparing Technical Report	Conducting all scaling and equating, and scoring activities as laid out in the specifications. ITN Reference 7.6.3.5 (Repeated in contract renewal)	(1) Submit Final Technical Report and Scored SSR Files (secure files), including vertically aligned scale scores, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2015	$20,452.00
1343					(Renewal 2 - August 2018)	$5,000.00
1344	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Drift Study Specifications	Preparing a detailed plan for conducting scale drift study. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.6 The plan must be vetted by TAC members. ITN Reference 7.6.3.6	(1) Submit the plan for conducting the scale drift study (secure) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the scale drift study specifications.	(Renewal 1 - July 2017)	$19,799.00
1345						$0.00
1346	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Scale Drift Research and Preparing Technical Report	Conducting all scaling and equating, and scoring activities as laid out in the specifications. ITN Reference 7.6.3.6	(1) Submit Final Technical Report and rescaled item parameters (secure files) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	(Renewal 2 - August 2018)	$50,323.00
1347						$0.00
1348	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Specifications for Comparability Between Devices Delivering Assessments	Preparing a detailed plan for conducting comparability study. The plan should include a comprehensive and detailed timeline for all tasks	(1) Submit the plan for conducting the comparability study (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and	November 2014	$6,000.00

			and events, as described in section 7.6.3.7 The plan must be vetted by TAC members. The plan should include the degree of comparability of item-level and test-level statistics across devices. The plan should include the degree of comparability of item-level and test-level statistics across various input types. For the questions above, the plan should address to what degree of comparability can be obtained through scaling items onto a single metric, linking or concordance. The plan should also include what interactions exist among device, input type and item/task characteristics, grade, subject, and relevant student characteristics. ITN Reference 7.6.3.6.1	approval of the study specifications.		$0.00
1349						
1350	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Study for Comparability Between Devices Delivering Assessments, Preparing its Final Report, and Recommendations with TAC Committee	Conducting all of the planned analyses, preparing its technical report, and sharing the findings and recommendations with TAC members. ITN Reference 7.6.3.6.1	(1) Submit Final Report and Recommendations to the Department. These materials are secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2015	$33,058.00
1351						$0.00
1352	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of a study plan for linking Florida Standards Assessments to other assessments measuring the same standards	Preparing a detailed plan for conducting the linking study. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.8 The plan must be vetted by TAC members.	(1) The plan for conducting comparability study is secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the study specifications.	November 2015	$1,000.00

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component E All Components**
			The plan should include a review of the most promising and most feasible methods in linking, discuss the technical feasibility of such methods, and explain the process of establishing the linking relationship(s) in detail. ITN Reference 7.6.3.6.2			$0.00
1353						
1354	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Florida Standards Assessments to other assessments	Conducting all of the planned analyses, preparing a final technical report, and sharing the results of linked relationships with TAC committee to discuss the validity of interpretations. ITN Reference 7.6.3.6.2	(1) Submit Final Report and Recommendations (secure files) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2016	$10,964.00
1355						$0.00
1356	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of a study plan for the linking Florida Standards Assessments to International Assessments	The Contractor's plan will include, review of the most promising and most feasible methods likely to be used in international linking, discuss the technical feasibility of each method given the nature and design of the Florida Standards Assessments and those of international assessments such as PISA and TIMSS, propose method(s) for linking the scales of assessments, propose alternative ways for collecting data, explain the process of establishing the linking relationship(s) in detail, and provide a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.9. The contractor will share the report with the Department and its TAC members. Upon approval from the Department, the contractor will finalize the plan for the linking. ITN Reference 7.6.3.6.3	(1) The plan for conducting the linking study is secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the study specifications.	November 2015	$1,000.00
						$0.00
1357

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component E All Components**
1358	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Florida Standards Assessments to International Assessments	Conducting all of the planned analyses, preparing a final technical report, and sharing the results of linked relationships with TAC committee to discuss the validity of interpretations. ITN Reference 7.6.3.6.3	(1) Submit Final Report and Recommendations to the Department. These materials are secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2016	$1,000.00
1359						$0.00
1360	Program Management	Periodic: Production Schedule	The production schedule shows the Department's beginning and ending review dates by test document for each review round. ITN Reference 7.7.2	(1) Appearance of schedule in weekly management report (2) Provide Department email reflecting approval of proposed or revised production schedule.	April 15, 2014	$94,569.00
1361					April 15, 2015	$39,900.00
1362					April 15, 2016	$39,900.00
1363					(Renewal 1 - April 15, 2017)	$39,900.00
1364					(Renewal 2 - April 15, 2018)	$39,900.00
1365					(Renewal 3 - April 15, 2019)	$39,900.00
1366	Program Management	Periodic: Program Management Meetings	The contractor will coordinate regular management meetings between the contractor and Department staff. The number and type of meetings are provided in 7.7.5 of the ITN.	(1) Include support for all meetings since the previous invoice. (2) Provide the meeting costs, a final agenda, and a final list of attendees for each meeting.	2015	$243,757.00
1367					2016	$244,851.00
1368					2017	$245,701.00
1369					(Renewal 1 - 2018)	$246,520.00
1370					(Renewal 2 - 2019)	$248,308.00
1371					(Renewal 3 - 2020)	$249,132.00
1372	Program Management	Periodic: Program Management Staff	The work described in the ITN constitutes a large, complex, challenging program that requires year-round activity and close attention to overlapping tasks for different years and the impact on project resources. The contractor is expected to provide a sufficient number of highly-qualified personnel to work closely with the Department to manage the contract. Specific requirements are in 7.7.2 of the ITN.	(1) Include support for program management staff operational for the invoice period. (2) Provide an organization chart with the appropriate staff indicated for each invoice period. (Quarterly invoices to occur in February, May, August, and November)	2015	$2,532,223.00
1373					2016	$2,836,585.00
1374					2017	$2,861,619.00
1375					(Renewal 1 - 2018)	$2,449,123.00
1376					(Renewal 2 - 2019)	$2,494,619.00
1377					(Renewal 3 - 2020)	$2,509,241.00
1378	Program Management	Periodic: Program Management Reports: Weekly Management and Action Item Report	The Weekly Management Report and Action Item Report will report the status of recent and upcoming tasks, highlighting those leading up to deliverables and critical tasks, report progress on program issues, identify unresolved issues, and maintain a list of requests requiring change orders	(1) For each invoice period, provide one management report from each month since the previous invoice period. (Quarterly invoices to occur in February, May, August, and November)	2014	$321,310.00
1379					2015	$321,310.00
1380					2016	$321,310.00
1381					(Renewal 1 - 2017)	$321,310.00
1382					(Renewal 2 - 2018)	$321,310.00

1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component E All Components**
			maintain a list of requests requiring change orders or amendments. The weekly report will be provided to the Department by no later than noon one day prior to the weekly program management conference calls and will reflect the previous week's work. ITN Ref 7.7.6		(Renewal 3 - 2019)	$321,310.00
1383						
1384	Program Management	Periodic: Annual Program Review	Review will include a record of the contractor's services and deliverables in response to contractual/ITN requirements. This review must identify major program accomplishments and successes, as well as areas of the program that require changes and improvement in the upcoming year. The review is intended to be a history of program events and to describe recommended improvements or changes for subsequent years. The annual review will be based on information gathered by the contractor's program and project management staff throughout the year. The review will address all aspects of program service and products including management, technology, interpretive products, communications, development, test production, test administration, materials shipping/pickup, scoring, and reporting processes. It will also follow the annual administrative cycle, beginning with fall and ending with the following summer. ITN Reference 7.7.6	(1) Provide evidence of Department acceptance and approval of the annual program review for the previous administration year.	November 2015	$78,060.00
1385					November 2016	$78,060.00
1386					November 2017	$78,060.00
1387					(Renewal 1 - November 2018)	$78,060.00
1388					(Renewal 2 - November 2019)	$78,060.00
1389					(Renewal 3 - November 2020)	$78,060.00
1390	Program Management	Periodic: Program Management Reports: Collect Accounting Reports	A summary of the Quarterly Accounting Reports, including expenditures by program task and level of effort as well as expenditures and balances of Reimbursable Funding Categories identified in Section 7.7.9, including balances resulting from executed change orders and contract amendments	(1) For each invoice period, provide the quarterly accounting reports. (Quarterly invoices to occur in February, May, August, and November)	2014	$99,882.00
1391					2015	$99,710.00
1392					2016	$99,710.00
1393					(Renewal 1 - 2017)	$99,710.00
1394					(Renewal 2 - 2018)	$99,710.00

50					(Renewal 3 - 2020)	$0.00
51	Test Development	Periodic: Style guide for test items	This document is designed to provide a consistent grammar and style standard for the proofing and editing of ELA/L and Mathematics test materials. The document may be included as part of the production specifications document. ITN Reference 7.3.10	(1) Provide Department email reflecting approval of the final style guide document. (2) The final style guide file provided via SFTP.	June 1, 2014	$15,797.00
52					June 1, 2015	$2,000.00
53					June 1, 2016	$2,000.00
54					(Renewal 1 - June 1, 2017)	$2,000.00
55					(Renewal 2 - June 1, 2018)	$2,000.00
56					(Renewal 3 - June 1, 2019)	$2,000.00
57	Test Development	Periodic: Interpretive Products: Test Item Specifications Documents	Test item specifications will be produced for all grades/subjects and may be grouped together in one booklet by grade band or content area. They are based on the standards and define both the content and the format of the test items. Their primary purpose is to establish guidelines for test item writers and reviewers. ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of each test item specification document. (2) Final PDF files provided via SFTP.	November 1, 2015	$35,812.00

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component A 3-8 ELA**
58	Test Development	Periodic: ELA/L and Mathematics Sample Scoring Guides	The contractor will be expected to post electronic publications that provide information to help educators understand the scoring of constructed-response items included on student reports. These publications provide information about the test design, standards and benchmarks, item types, and how items are scored. They also provide scoring rubrics and the annotated papers used to train scorers for the constructed-response items. Each sample item from the scoring papers is displayed as it appeared on the test and responses for each score point, images of student responses, and annotations explaining why the response received a particular score are provided. ITN Reference 7.3.10	(1) Provide Department email reflecting approval of each scoring guide. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$31,444.00
59					2016	$2,000.00
60					2017	$2,000.00
61					(Renewal 1 - 2018)	$2,000.00
62					(Renewal 2 - 2019)	$2,000.00
63					(Renewal 3 - 2020)	$2,000.00
64	Test Development	Periodic: Understanding Florida's Assessment Reports	This publication describes the various reports of test results distributed to students, schools, and districts. An explanation and an image of each type of report are provided. The booklet also includes information about the test content areas and a glossary of technical terms. The contractor will deliver the electronic ADA-compliant PDF for posting to the DOE website so files can be posted to coincide with the first results delivery (RD1). ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of Understanding Florida's Assessment Reports. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$67,402.00
65					2016	$2,000.00
66					2017	$2,000.00
67					(Renewal 1 - 2018)	$2,000.00
68					(Renewal 2 - 2019)	$2,000.00
69					(Renewal 3 - 2020)	$2,000.00
70	Test Development	Periodic: Test Design and Blueprint	The Test Design and Blueprint will clearly delineate the number of items, types and placement of items, time allotted for each test session, and location of field-test items for all grades and subjects. ITN Reference 7.3.1 and 7.3.2.1	(1) Provide Department email reflecting approval of Test Design and Blueprint (2) Appearance of completed schedule in weekly management report	June 1, 2015	$147,745.00
71	Test Development	Periodic: Content Item Review "Cleans"	After Content Item Review, the contractor, in conjunction with the Department, will conduct an editorial and content review of the items to ensure that changes have been applied correctly and that all editorial and content issues are corrected. ITN Reference 7.3.4.2	(1) Provide Department email reflecting completion of the “Cleans” process (2) Appearance of completed schedule in weekly management report	February 1, 2016	$3,956,087.00
72					February 1, 2017	$4,036,987.00
73					(Renewal 1 - February 1, 2018)	$2,137,072.00
74					(Renewal 2 - February 1, 2019)	$1,867,100.00
75					(Renewal 3 - February 1, 2020)	$1,584,816.00
76	Test Development	Periodic: Field Test Item Sets and Forms Review	Whether an embedded or stand-alone model is used, the contractor, in conjunction with the Department, will construct field-test forms. ITN Reference 7.3.5 and 7.3.6	(1) Provide Department email reflecting completion of the field test forms process (2) Appearance of completed schedule in weekly management report	May 1, 2015	$4,034,877.00
77					May 1, 2016	$32,066.00
78					(Renewal 1 - May 1, 2017)	$32,066.00
79					(Renewal 2 - May 1, 2018)	$32,066.00
80					(Renewal 3 - May 1, 2019)	$32,066.00

1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component A 3-8 ELA**
81	Test Development	Periodic: Onsite Test Construction	The contractor will host content experts and leadership from the Department for the express purpose of constructing assessments for all grades/courses and subjects. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution (in July 2014). ITN Reference 7.3.7	1) Provide Department email reflecting completion of the test construction process (2) Appearance of completed schedule in weekly management report	July 15, 2014	$33,668.00
82					July 15, 2015	$48,762.00
83					July 15, 2016	$48,762.00
84					(Renewal 1 - July 15, 2017)	$48,762.00
85					(Renewal 2 - July 15, 2018)	$48,762.00
86					(Renewal 3 - July 15, 2019)	$48,762.00
87	Test Development	Periodic: Item Development Plan	To ensure the quality and number of items/passages developed is sufficient to create future operational test forms, the contractor will submit an item development plan delineating the number and types of items to be developed. ITN Reference 7.3.0	1) Provide Department email reflecting completion of the Item Development Plan. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$23,304.00
88					December 1, 2016	$23,304.00
89					(Renewal 1 - December 1, 2017)	$23,304.00
90					(Renewal 2 - December 1, 2018)	$23,304.00
91	Test Development	Periodic: Item Writer Training	The contractor must identify and recruit a sufficient number of highly-qualified writers for passages and items to ensure variety and quality of development. The contractor, in conjunction with the Department, will conduct an annual training session for all Item Writers. ITN Reference 7.3.3	1) Provide Department email reflecting completion of Item Writer Training. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$19,359.00
92					December 1, 2016	$9,109.00
93					(Renewal 1 - December 1, 2017)	$9,109.00
94					(Renewal 2 - December 1, 2018)	$9,109.00
95	Test Development	Periodic: Meetings with Educators	The contractor is responsible for organizing and convening meetings for the purpose of reviewing assessment items and otherwise supporting the assessment program. These meetings are referenced in the ITN in 7.3.4 and 7.7.7. This deliverable includes the cost of preparing for and administering the meeting, but it does not include the cost of travel for meeting participants, which is covered as a reimbursable category in 7.7.9.	(1) Include support for all meetings since the previous invoice. (2) Provide the meeting costs, a final agenda, and a final list of attendees for each meeting.	(Dates to be negotiated.) 2015	$111,390.00
96					2016	$112,882.00
97					2017	$114,410.00
98					(Renewal 1 - 2018)	$117,566.00
99					(Renewal 2 - 2019)	$119,720.00
100					(Renewal 3 - 2020)	$120,058.00
101	Test Development	Periodic: English-to-Language Translation Dictionary	The respondent's reply should describe the provision on the CBT system of an on-screen English-to-heritage language translation dictionary for English Language Learners. ITN Ref 7.3.11.2	(1) Provide evidence of Department acceptance and approval (email is acceptable) of the English-to-Language Translation Dictionary.	(TBD - Part of negotiation) 2015	$5,000.00
102					2016	$1,000.00
103					2017	$1,000.00
104					(Renewal 1 - 2018)	$1,000.00
105					(Renewal 2 - 2019)	$1,000.00
106					(Renewal 3 - 2020)	$1,000.00
107	Test Development	Periodic: English-to-Sign Language Translation Dictionary	The respondent's reply may describe the provision on the CBT system of an on-screen English-to-sign language translation dictionary. ITN Ref 7.3.11.2	(1) Provide evidence of Department acceptance and approval (email is acceptable) of the English-to-Sign Language Translation Dictionary.	(TBD - Part of negotiation) 2015	$5,000.00
108					2016	$1,000.00
109					2017	$1,000.00
110					(Renewal 1 - 2018)	$1,000.00
111					(Renewal 2 - 2019)	$1,000.00
112					(Renewal 3 - 2020)	$1,000.00

402					(Renewal 3 - August 2020)	$0.00
403	Test Administration	PERIODIC: Develop and deliver approved practice tests and tutorials for the computer-based and paper-based assessments (sample test materials and computer-based practice tests).	According to production schedules, all practice materials must be developed and approved on a timeline to be established that offers students enough time to practice prior to each administration. All practice tests (computer-based and paper-based) must contain 10-20 sample items. For the paper-based practice materials, there should be a separate test booklet and a separate answer key booklet for teachers. These paper-based practice materials are produced in ADA-compliant PDF files for posting. Practice materials must also be produced for all accommodated versions (computer-based accommodations and paper-based accommodations, such as braille and large print). ITN Reference 7.3.7.5 and 7.4.9.6	(1) Provide Department email reflecting approval of the practice tests and tutorials that reflect the requirements for each year of the assessment. For year 1 of the contract, this will be PDFs for all grades and subjects, and computer-based practice tests for all grades and subjects that will be offered as computer-based subjects the first year. As grades and subjects are added each year (per the schedule in Appendix A), the appropriate computer-based practice tests must also be released. This delivery includes the annual delivery of requested paper-based accommodated versions, which are the only versions that are shipped to districts. (All others are published or linked for distribution.)	November 2014	$63,181.00
404					November 2015	$3,000.00
405					November 2016	$3,000.00
406					(Renewal 1 - November 2017)	$3,000.00
407					(Renewal 2 - November 2018)	$3,000.00
408					(Renewal 3 - November 2019)	$3,000.00
409						$0.00
410	Test Administration	PERIODIC: Develop and deliver a training plan for the initial training and supply materials to support ongoing training for the audiences identified in the contract.	The contractor must train Department, district, and school staff on the setup, features, management, and use of the computer-based platform and online management system at the beginning of the contract. ITN Reference 7.4.7.1 and 7.4.9.8	(1) Provide Department email confirming and approving completion of the initial training and completion of the materials to support ongoing training. (2) Provide Department email approving the final, posted training materials for each administration.	September 2014	$242,481.00
411	Test Administration	PERIODIC: Develop and deliver materials to support ongoing training for the audiences identified in the contract.	The contractor must train Department, district, and school staff on the setup, features, management, and use of the computer-based platform and online management system. ITN Reference 7.4.7.1 and 7.4.9.8	(1) Provide Department email approving the final, posted training materials for each administration.	August 2015	$143,014.00
412					August 2016	$143,014.00
413					(Renewal 1 - August 2017)	$143,014.00

Attachment 1b - DELIVERABLES PRICING
Specify Component A, B, C, D or E (A-D): _____A_____

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component A 3-8 ELA**
1277	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Test Construction Specifications	The Contractor will deliver Test Construction Specifications for ELA/Literacy and Mathematics, Algebra 1, Algebra 2, Geometry, and Retake Assessments. The final specifications shall be evaluated and approved by the Department. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution. ITN Reference 7.6.0, 7.6.1, and 7.6.2	(1) Test Construction Specifications are secure, and therefore the Contractor shall provide a report which indicates the completed status of Specifications posted to Secure File Transfer Protocol (SFTP). (2) Provide Department email reflecting receipt and approval of the Test Construction Specifications.	May 2014	$96,473.00
1278					May 2015	$2,000.00
1279					May 2016	$0.00
1280					(Renewal 1 - May 2017)	$0.00
1281					(Renewal 2 - May 2018)	$0.00
1282					(Renewal 3 - May 2019)	$0.00
1283	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Test Forms for Field Test and/or Operational Administrations	All paper-based and computer-based forms for the tests, as agreed upon by the Department and memorialized in the approved Test Construction Specifications, must be submitted and approved. ITN Reference 7.6.0 and 7.6.1	(1) Test forms are secure, and therefore the contractor shall post them to SFTP. The Department shall maintain a copy of the materials on file as needed for evidence of completion of the deliverable. (2) Provide Department email reflecting receipt and approval of the final paper-based and computer-based forms.	July 2014	$39,726.00
1284					July 2015	$39,726.00
1285					July 2016	$39,726.00
1286					(Renewal 1 - July 2017)	$39,726.00
1287					(Renewal 2 - July 2018)	$39,726.00
1288					(Renewal 3 - July 2019)	$39,726.00
1289	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Sampling Plans	Detailed plan for sampling of students from the State. Sampling plan must describe the initial analyses on the SSR files, introducing plans for how to collect data, and the list of post-hoc analyses for representativeness checks when data from test administrations are in for operational processing. ITN Reference 7.6.2.2	(1) Final versions of sampling plans posted to SFTP. (2) Provide Department email reflecting receipt and approval of the sampling plans.	July 2014	$6,000.00
1290					July 2015	$2,000.00
1291					July 2016	$2,000.00
1292					(Renewal 1 - July 2017)	$2,000.00
1293					(Renewal 2 - July 2018)	$2,000.00
1294					(Renewal 3 - July 2019)	$2,000.00
1295	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Drawing Samples for Operational and/or Field Test Administrations	Delivering the data files including sampled units from the populations and the respective reports. Sampling report must describe the initial analyses on the SSR files, procedures for how to collect data, evaluate the representativeness of resulting sample and a list of post-hoc analyses for representativeness checks when data from test administrations are in for operational processing. ITN Reference 7.6.0, 7.6.1, and 7.6.2.2	(1) Data files, including sampled units from the populations, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the samples.	August 2014	$6,000.00
1296					August 2015	$2,000.00
1297					August 2016	$2,000.00
1298					(Renewal 1 - August 2017)	$2,000.00
1299					(Renewal 2 - August 2018)	$2,000.00
1300					(Renewal 3 - August 2019)	$2,000.00
1301	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the SES Specifications	Preparing a detailed plan for conducting all scaling and equating plans and procedures, scoring plans and procedures. The plan should include a comprehensive and detailed timeline for all tasks and events. The plan should also provide a detailed description of the outcomes produced from the	(1) SES Specifications (secure) posted to SFTP. (2) Provide Department email reflecting receipt and approval of the SES Specifications.	December 2014	$40,000.00
1302					December 2015	$2,000.00
1303					December 2016	$2,000.00
1304					(Renewal 1 - December 2017)	$2,000.00
1305					(Renewal 2 - December 2018)	$2,000.00

1317					(Renewal 2 - 2019)	$1,000.00
1318					(Renewal 3 - 2020)	$1,000.00
1319	Scaling, Equating, Scoring, and Special Psychometric Studies	Spring EOC: Develop Calibration Sampling Specifications	The contractor's sampling specifications must include analyzing the most recent SSR files and establishing a road map for gathering the required data proven to represent the demographic characteristics of the state and student performance. The specifications will also address the steps, procedures, and software required for replication of the sampling procedures by the Department. The specifications will be reviewed by the Department and TAC members, if necessary, and updated by the contractor for each subsequent administration. ITN Reference 7.6.2.2	(1) Submit final Calibration Sampling Specifications via SFTP. (2) Provide Department email reflecting receipt and approval of the specifications.	(Dates to be negotiated) 2015	$0.00
1320					2016	$0.00
1321					2017	$0.00
1322					(Renewal 1 - 2018)	$0.00
1323					(Renewal 2 - 2019)	$0.00
1324					(Renewal 3 - 2020)	$0.00
1325	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Creating and Finalizing Technical Reports	Preparing Technical Reports, as described in section 7.6.3.2. Note that Table of contents listed in 7.6.3.2 includes the minimum requirements for the report. Collecting Feedback from the Department and Technical Advisory Committee (TAC), finalizing the reports after incorporating the feedback, and	(1) Submit initial versions and the final versions of Technical Reports (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the technical reports.	December 2015	$125,905.00
1326					December 2016	$202,094.00
1327					December 2017	$202,094.00
1328					(Renewal 1 - December 2018)	$202,094.00
1329					(Renewal 2 - December 2019)	$202,094.00

1331	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments	Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments ITN Reference 7.6.3.3	(1) Submit initial versions and the final versions of Scale Linking Plans (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	November 2014	$20,412.00
1332						$0.00
1333	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Collecting Legal Opinion	Collecting legal opinion, subject to the Department's approval, about the defensibility of linking methodology. ITN Reference 7.6.3.3	(1) Submit final version of the legal opinion document (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	October 2014	$697,578.00
1334						$0.00
1335	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Scales during transitioning years to find out FCAT 2.0 and EOC equivalents based on the performance of students on the Florida Standards Assessments	Conducting all linking operations and scoring activities as laid out in the approved linking specifications. ITN Reference 7.6.3.3	(1) Submit final look-up tables and scored files (secure files) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the files.	May 2015	$85,970.00
1336						$0.00
1337	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Standard Setting Work Plan	Prepare a Standard Setting Work plan for setting achievement level standards for ELA/Literacy, Mathematics, Algebra 1 &2, and Geometry assessments. Plan must include every detail of the methodology, internal and external data files, and the timeline for all of the activities during educator and reactor panel meetings. The Plan must be vetted by TAC members and the methodology must be approved by the department. ITN Reference 7.6.3.4	(1) Submit the final version of Standard Setting Work Plan and relevant materials, such as slides (secure materials), posted to SFTP. (2) Provide Department email reflecting receipt and approval of the documents.	January 2015	$2,000.00
1338	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Implement Achievement Level Standard Setting Meetings	Hold the required meetings and collect recommended cut scores from all relevant groups, as described in ITN Reference 7.6.3.4	(1) Submit the initial version of the Standard Setting Technical Report (secure file), including recommended cuts and impact data, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	October 2015	$161,561.00
1339	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Finalizing Standard Setting Technical Report	Preparing Technical Reports, as described in section 7.6.3.4. Collecting Feedback from the Department and Technical Advisory Committee (TAC), finalizing the reports after incorporating the feedback, and submitting the final versions of the reports to the Department. ITN Reference 7.6.3.4	(1) Submit the final version of the Standard Setting Technical Report (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	November 2015	$30,761.00

47					2017	$0.00
48					(Renewal 1 - 2018)	$0.00
49					(Renewal 2 - 2019)	$0.00
50					(Renewal 3 - 2020)	$0.00
51	Test Development	Periodic: Style guide for test items	This document is designed to provide a consistent grammar and style standard for the proofing and editing of ELA/L and Mathematics test materials. The document may be included as part of the production specifications document. ITN Reference 7.3.10	(1) Provide Department email reflecting approval of the final style guide document. (2) The final style guide file provided via SFTP.	June 1, 2014	$15,797.00
52					June 1, 2015	$2,000.00
53					June 1, 2016	$2,000.00
54					(Renewal 1 - June 1, 2017)	$2,000.00
55					(Renewal 2 - June 1, 2018)	$2,000.00
56					(Renewal 3 - June 1, 2019)	$2,000.00
57	Test Development	Periodic: Interpretive Products: Test Item Specifications Documents	Test item specifications will be produced for all grades/subjects and may be grouped together in one booklet by grade band or content area. They are based on the standards and define both the content and the format of the test items. Their primary purpose is to establish guidelines for test item writers and reviewers. ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of each test item specification document. (2) Final PDF files provided via SFTP.	November 1, 2015	$35,812.00

1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component B 3-8 Math**
58	Test Development	Periodic: ELA/L and Mathematics Sample Scoring Guides	The contractor will be expected to post electronic publications that provide information to help educators understand the scoring of constructed-response items included on student reports. These publications provide information about the test design, standards and benchmarks, item types, and how items are scored. They also provide scoring rubrics and the annotated papers used to train scorers for the constructed-response items. Each sample item from the scoring papers is displayed as it appeared on the test and responses for each score point, images of student responses, and annotations explaining why the response received a particular score are provided. ITN Reference 7.3.10	(1) Provide Department email reflecting approval of each scoring guide. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$31,444.00
59					2016	$2,000.00
60					2017	$2,000.00
61					(Renewal 1 - 2018)	$2,000.00
62					(Renewal 2 - 2019)	$2,000.00
63					(Renewal 3 - 2020)	$2,000.00
64	Test Development	Periodic: Understanding Florida's Assessment Reports	This publication describes the various reports of test results distributed to students, schools, and districts. An explanation and an image of each type of report are provided. The booklet also includes information about the test content areas and a glossary of technical terms. The contractor will deliver the electronic ADA-compliant PDF for posting to the DOE website so files can be posted to coincide with the first results delivery (RD1). ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of Understanding Florida's Assessment Reports. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$67,402.00
65					2016	$2,000.00
66					2017	$2,000.00
67					(Renewal 1 - 2018)	$2,000.00
68					(Renewal 2 - 2019)	$2,000.00
69					(Renewal 3 - 2020)	$2,000.00
70	Test Development	Periodic: Test Design and Blueprint	The Test Design and Blueprint will clearly delineate the number of items, types and placement of items, time allotted for each test session, and location of field-test items for all grades and subjects. ITN Reference 7.3.1 and 7.3.2.1	(1) Provide Department email reflecting approval of Test Design and Blueprint (2) Appearance of completed schedule in weekly management report	June 1, 2015	$147,745.00
71	Test Development	Periodic: Content Item Review "Cleans"	After Content Item Review, the contractor, in conjunction with the Department, will conduct an editorial and content review of the items to ensure that changes have been applied correctly and that all editorial and content issues are corrected. ITN Reference 7.3.4.2	(1) Provide Department email reflecting completion of the “Cleans” process (2) Appearance of completed schedule in weekly management report	February 1, 2016	$3,845,421.00
72					February 1, 2017	$3,926,321.00
73					(Renewal 1 - February 1, 2018)	$2,026,406.00
74					(Renewal 2 - February 1, 2019)	$1,756,434.00
75					(Renewal 3 - February 1, 2020)	$1,474,150.00
76	Test Development	Periodic: Field Test Item Sets and Forms Review	Whether an embedded or stand-alone model is used, the contractor, in conjunction with the Department, will construct field-test forms. ITN Reference 7.3.5 and 7.3.6	(1) Provide Department email reflecting completion of the field test forms process (2) Appearance of completed schedule in weekly management report	May 1, 2015	$3,924,211.00
77					May 1, 2016	$32,066.00
78					(Renewal 1 - May 1, 2017)	$32,066.00
79					(Renewal 2 - May 1, 2018)	$32,066.00
80					(Renewal 3 - May 1, 2019)	$32,066.00

81	Test Development	Periodic: Onsite Test Construction	The contractor will host content experts and leadership from the Department for the express purpose of constructing assessments for all grades/courses and subjects. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution (in July 2014). ITN Reference 7.3.7	1) Provide Department email reflecting completion of the test construction process (2) Appearance of completed schedule in weekly management report	July 15, 2014	$33,668.00
82					July 15, 2015	$48,762.00
83					July 15, 2016	$48,762.00
84					(Renewal 1 - July 15, 2017)	$48,762.00
85					(Renewal 2 - July 15, 2018)	$48,762.00
86					(Renewal 3 - July 15, 2019)	$48,762.00
87	Test Development	Periodic: Item Development Plan	To ensure the quality and number of items/passages developed is sufficient to create future operational test forms, the contractor will submit an item development plan delineating the number and types of items to be developed. ITN Reference 7.3.0	1) Provide Department email reflecting completion of the Item Development Plan. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$23,304.00
88					December 1, 2016	$23,304.00
89					(Renewal 1 - December 1, 2017)	$23,304.00
90					(Renewal 2 - December 1, 2018)	$23,304.00
91	Test Development	Periodic: Item Writer Training	The contractor must identify and recruit a sufficient number of highly-qualified writers for passages and items to ensure variety and quality of development. The contractor, in conjunction with the Department, will conduct an annual training session for all Item Writers. ITN Reference 7.3.3	1) Provide Department email reflecting completion of Item Writer Training. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$19,359.00
92					December 1, 2016	$9,109.00
93					(Renewal 1 - December 1, 2017)	$9,109.00
94					(Renewal 2 - December 1, 2018)	$9,109.00
95	Test Development	Periodic: Meetings with Educators	The contractor is responsible for organizing and convening meetings for the purpose of reviewing assessment items and otherwise supporting the assessment program. These meetings are referenced in the ITN in 7.3.4 and 7.7.7. This deliverable includes the cost of preparing for and administering the meeting, but it does not include the cost of travel for meeting participants, which is covered as a reimbursable category in 7.7.9.	(1) Include support for all meetings since the previous invoice. (2) Provide the meeting costs, a final agenda, and a final list of attendees for each meeting.	(Dates to be negotiated.) 2015	$111,390.00
96					2016	$112,882.00
97					2017	$114,410.00
98					(Renewal 1 - 2018)	$117,566.00
99					(Renewal 2 - 2019)	$119,720.00
100					(Renewal 3 - 2020)	$120,058.00
101	Test Development	Periodic: English-to-Language Translation Dictionary	The respondent's reply should describe the provision on the CBT system of an on-screen English-to-heritage language translation dictionary for English Language Learners. ITN Ref 7.3.11.2	(1) Provide evidence of Department acceptance and approval (email is acceptable) of the English-to-Language Translation Dictionary.	(TBD - Part of negotiation) 2015	$5,000.00
102					2016	$1,000.00
103					2017	$1,000.00
104					(Renewal 1 - 2018)	$1,000.00
105					(Renewal 2 - 2019)	$1,000.00
106					(Renewal 3 - 2020)	$1,000.00
107	Test Development	Periodic: English-to-Sign Language Translation Dictionary	The respondent's reply may describe the provision on the CBT system of an on-screen English-to-sign language translation dictionary. ITN Ref 7.3.11.2	(1) Provide evidence of Department acceptance and approval (email is acceptable) of the English-to-Sign Language Translation Dictionary.	(TBD - Part of negotiation) 2015	$5,000.00
108					2016	$1,000.00
109					2017	$1,000.00
110					(Renewal 1 - 2018)	$1,000.00
111					(Renewal 2 - 2019)	$1,000.00
112					(Renewal 3 - 2020)	$1,000.00

402					(Renewal 3 - August 2020)	$0.00
403	Test Administration	PERIODIC: Develop and deliver approved practice tests and tutorials for the computer-based and paper-based assessments (sample test materials and computer-based practice tests).	According to production schedules, all practice materials must be developed and approved on a timeline to be established that offers students enough time to practice prior to each administration. All practice tests (computer-based and paper-based) must contain 10-20 sample items. For the paper-based practice materials, there should be a separate test booklet and a separate answer key booklet for teachers. These paper-based practice materials are produced in ADA-compliant PDF files for posting. Practice materials must also be produced for all accommodated versions (computer-based accommodations and paper-based accommodations, such as braille and large print). ITN Reference 7.3.7.5 and 7.4.9.6	(1) Provide Department email reflecting approval of the practice tests and tutorials that reflect the requirements for each year of the assessment. For year 1 of the contract, this will be PDFs for all grades and subjects, and computer-based practice tests for all grades and subjects that will be offered as computer-based subjects the first year. As grades and subjects are added each year (per the schedule in Appendix A), the appropriate computer-based practice tests must also be released. This delivery includes the annual delivery of requested paper-based accommodated versions, which are the only versions that are shipped to districts. (All others are published or linked for distribution.)	November 2014	$63,181.00
404					November 2015	$3,000.00
405					November 2016	$3,000.00
406					(Renewal 1 - November 2017)	$3,000.00
407					(Renewal 2 - November 2018)	$3,000.00
408					(Renewal 3 - November 2019)	$3,000.00
409						$0.00
410	Test Administration	PERIODIC: Develop and deliver a training plan for the initial training and supply materials to support ongoing training for the audiences identified in the contract.	The contractor must train Department, district, and school staff on the setup, features, management, and use of the computer-based platform and online management system at the beginning of the contract. ITN Reference 7.4.7.1 and 7.4.9.8	(1) Provide Department email confirming and approving completion of the initial training and completion of the materials to support ongoing training. (2) Provide Department email approving the final, posted training materials for each administration.	September 2014	$242,481.00
411	Test Administration	PERIODIC: Develop and deliver materials to support ongoing training for the audiences identified in the contract.	The contractor must train Department, district, and school staff on the setup, features, management, and use of the computer-based platform and online management system. ITN Reference 7.4.7.1 and 7.4.9.8	(1) Provide Department email approving the final, posted training materials for each administration.	August 2015	$143,014.00
412					August 2016	$143,014.00
413					(Renewal 1 - August 2017)	$143,014.00

Attachment 1b - DELIVERABLES PRICING
Specify Component A, B, C, D or E (A-D): _____B_____

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component B 3-8 Math**
1277	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Test Construction Specifications	The Contractor will deliver Test Construction Specifications for ELA/Literacy and Mathematics, Algebra 1, Algebra 2, Geometry, and Retake Assessments. The final specifications shall be evaluated and approved by the Department. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution. ITN Reference 7.6.0, 7.6.1, and 7.6.2	(1) Test Construction Specifications are secure, and therefore the Contractor shall provide a report which indicates the completed status of Specifications posted to Secure File Transfer Protocol (SFTP). (2) Provide Department email reflecting receipt and approval of the Test Construction Specifications.	May 2014	$96,473.00
1278					May 2015	$2,000.00
1279					May 2016	$0.00
1280					(Renewal 1 - May 2017)	$0.00
1281					(Renewal 2 - May 2018)	$0.00
1282					(Renewal 3 - May 2019)	$0.00
1283	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Test Forms for Field Test and/or Operational Administrations	All paper-based and computer-based forms for the tests, as agreed upon by the Department and memorialized in the approved Test Construction Specifications, must be submitted and approved. ITN Reference 7.6.0 and 7.6.1	(1) Test forms are secure, and therefore the contractor shall post them to SFTP. The Department shall maintain a copy of the materials on file as needed for evidence of completion of the deliverable. (2) Provide Department email reflecting receipt and approval of the final paper-based and computer-based forms.	July 2014	$39,726.00
1284					July 2015	$39,726.00
1285					July 2016	$39,726.00
1286					(Renewal 1 - July 2017)	$39,726.00

1317					(Renewal 2 - 2019)	$1,000.00
1318					(Renewal 3 - 2020)	$1,000.00
1319	Scaling, Equating, Scoring, and Special Psychometric Studies	Spring EOC: Develop Calibration Sampling Specifications	The contractor's sampling specifications must include analyzing the most recent SSR files and establishing a road map for gathering the required data proven to represent the demographic characteristics of the state and student performance. The specifications will also address the steps, procedures, and software required for replication of the sampling procedures by the Department. The specifications will be reviewed by the Department and TAC members, if necessary, and updated by the contractor for each subsequent administration. ITN Reference 7.6.2.2	(1) Submit final Calibration Sampling Specifications via SFTP. (2) Provide Department email reflecting receipt and approval of the specifications.	(Dates to be negotiated) 2015	$0.00
1320					2016	$0.00
1321					2017	$0.00
1322					(Renewal 1 - 2018)	$0.00
1323					(Renewal 2 - 2019)	$0.00
1324					(Renewal 3 - 2020)	$0.00
1325	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Creating and Finalizing Technical Reports	Preparing Technical Reports, as described in section 7.6.3.2. Note that Table of contents listed in 7.6.3.2 includes the minimum requirements for the report. Collecting Feedback from the Department and Technical Advisory Committee (TAC), finalizing the reports after incorporating the feedback, and	(1) Submit initial versions and the final versions of Technical Reports (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the technical reports.	December 2015	$125,905.00
1326					December 2016	$202,094.00
1327					December 2017	$202,094.00
1328					(Renewal 1 - December 2018)	$202,094.00
1329					(Renewal 2 - December 2019)	$202,094.00

1331	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments	Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments ITN Reference 7.6.3.3	(1) Submit initial versions and the final versions of Scale Linking Plans (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	November 2014	$20,412.00
1332						$0.00
1333	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Collecting Legal Opinion	Collecting legal opinion, subject to the Department's approval, about the defensibility of linking methodology. ITN Reference 7.6.3.3	(1) Submit final version of the legal opinion document (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	October 2014	$697,578.00
1334						$0.00
1335	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Scales during transitioning years to find out FCAT 2.0 and EOC equivalents based on the performance of students on the Florida Standards Assessments	Conducting all linking operations and scoring activities as laid out in the approved linking specifications. ITN Reference 7.6.3.3	(1) Submit final look-up tables and scored files (secure files) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the files.	May 2015	$85,970.00
1336						$0.00
1337	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Standard Setting Work Plan	Prepare a Standard Setting Work plan for setting achievement level standards for ELA/Literacy, Mathematics, Algebra 1 &2, and Geometry assessments. Plan must include every detail of the methodology, internal and external data files, and the timeline for all of the activities during educator and reactor panel meetings. The Plan must be vetted by TAC members and the methodology must be approved by the department. ITN Reference 7.6.3.4	(1) Submit the final version of Standard Setting Work Plan and relevant materials, such as slides (secure materials), posted to SFTP. (2) Provide Department email reflecting receipt and approval of the documents.	January 2015	$2,000.00
1338	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Implement Achievement Level Standard Setting Meetings	Hold the required meetings and collect recommended cut scores from all relevant groups, as described in ITN Reference 7.6.3.4	(1) Submit the initial version of the Standard Setting Technical Report (secure file), including recommended cuts and impact data, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	October 2015	$161,561.00
1339	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Finalizing Standard Setting Technical Report	Preparing Technical Reports, as described in section 7.6.3.4. Collecting Feedback from the Department and Technical Advisory Committee (TAC), finalizing the reports after incorporating the feedback, and submitting the final versions of the reports to the Department. ITN Reference 7.6.3.4	(1) Submit the final version of the Standard Setting Technical Report (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	November 2015	$30,761.00

1382					(Renewal 2 - 2018)	$112,459.00
1383					(Renewal 3 - 2019)	$112,459.00
1384	Program Management	Periodic: Annual Program Review	Review will include a record of the contractor's services and deliverables in response to contractual/ITN requirements. This review must identify major program accomplishments and successes, as well as areas of the program that require changes and improvement in the upcoming year. The review is intended to be a history of program events and to describe recommended improvements or changes for subsequent years. The annual review will be based on information gathered by the contractor's program and project management staff throughout the year. The review will address all aspects of program service and products including management, technology, interpretive products, communications, development, test production, test administration, materials shipping/pickup, scoring, and reporting processes. It will also follow the annual administrative cycle, beginning with fall and ending with the following summer. ITN Reference 7.7.6	(1) Provide evidence of Department acceptance and approval of the annual program review for the previous administration year.	November 2015	$54,642.00
1385					November 2016	$54,642.00
1386					November 2017	$54,642.00

Dates to be negotiated 2015	$0.00
46					2016	$0.00
47					2017	$0.00
48					(Renewal 1 - 2018)	$0.00
49					(Renewal 2 - 2019)	$0.00
50					(Renewal 3 - 2020)	$0.00
51	Test Development	Periodic: Style guide for test items	This document is designed to provide a consistent grammar and style standard for the proofing and editing of ELA/L and Mathematics test materials. The document may be included as part of the production specifications document. ITN Reference 7.3.10	(1) Provide Department email reflecting approval of the final style guide document. (2) The final style guide file provided via SFTP.	June 1, 2014	$15,797.00
52					June 1, 2015	$2,000.00
53					June 1, 2016	$2,000.00
54					(Renewal 1 - June 1, 2017)	$2,000.00
55					(Renewal 2 - June 1, 2018)	$2,000.00
56					(Renewal 3 - June 1, 2019)	$2,000.00
57	Test Development	Periodic: Interpretive Products: Test Item Specifications Documents	Test item specifications will be produced for all grades/subjects and may be grouped together in one booklet by grade band or content area. They are based on the standards and define both the content and the format of the test items. Their primary purpose is to establish guidelines for test item writers and reviewers. ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of each test item specification document. (2) Final PDF files provided via SFTP.	November 1, 2015	$35,812.00

Attachment 1b - DELIVERABLES PRICING

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component C 9-11 ELA**
58	Test Development	Periodic: ELA/L and Mathematics Sample Scoring Guides	The contractor will be expected to post electronic publications that provide information to help educators understand the scoring of constructed-response items included on student reports. These publications provide information about the test design, standards and benchmarks, item types, and how items are scored. They also provide scoring rubrics and the annotated papers used to train scorers for the constructed-response items. Each sample item from the scoring papers is displayed as it appeared on the test and responses for each score point, images of student responses, and annotations explaining why the response received a particular score are provided. ITN Reference 7.3.10	(1) Provide Department email reflecting approval of each scoring guide. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$15,722.00
59					2016	$2,000.00
60					2017	$2,000.00
61					(Renewal 1 - 2018)	$2,000.00
62					(Renewal 2 - 2019)	$2,000.00
63					(Renewal 3 - 2020)	$2,000.00
64	Test Development	Periodic: Understanding Florida's Assessment Reports	This publication describes the various reports of test results distributed to students, schools, and districts. An explanation and an image of each type of report are provided. The booklet also includes information about the test content areas and a glossary of technical terms. The contractor will deliver the electronic ADA-compliant PDF for posting to the DOE website so files can be posted to coincide with the first results delivery (RD1). ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of Understanding Florida's Assessment Reports. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$67,402.00
65					2016	$2,000.00
66					2017	$2,000.00
67					(Renewal 1 - 2018)	$2,000.00
68					(Renewal 2 - 2019)	$2,000.00
69					(Renewal 3 - 2020)	$2,000.00
70	Test Development	Periodic: Test Design and Blueprint	The Test Design and Blueprint will clearly delineate the number of items, types and placement of items, time allotted for each test session, and location of field-test items for all grades and subjects. ITN Reference 7.3.1 and 7.3.2.1	(1) Provide Department email reflecting approval of Test Design and Blueprint (2) Appearance of completed schedule in weekly management report	June 1, 2015	$73,872.00
71	Test Development	Periodic: Content Item Review "Cleans"	After Content Item Review, the contractor, in conjunction with the Department, will conduct an editorial and content review of the items to ensure that changes have been applied correctly and that all editorial and content issues are corrected. ITN Reference 7.3.4.2	(1) Provide Department email reflecting completion of the “Cleans” process (2) Appearance of completed schedule in weekly management report	February 1, 2016	$1,985,716.00
72					February 1, 2017	$2,026,166.00
73					(Renewal 1 - February 1, 2018)	$1,076,209.00
74					(Renewal 2 - February 1, 2019)	$941,222.00
75					(Renewal 3 - February 1, 2020)	$800,081.00
76	Test Development	Periodic: Field Test Item Sets and Forms Review	Whether an embedded or stand-alone model is used, the contractor, in conjunction with the Department, will construct field-test forms. ITN Reference 7.3.5 and 7.3.6	(1) Provide Department email reflecting completion of the field test forms process (2) Appearance of completed schedule in weekly management report	May 1, 2015	$2,025,111.00
77					May 1, 2016	$16,033.00
78					(Renewal 1 - May 1, 2017)	$16,033.00
79					(Renewal 2 - May 1, 2018)	$16,033.00
80					(Renewal 3 - May 1, 2019)	$16,033.00

81	Test Development	Periodic: Onsite Test Construction	The contractor will host content experts and leadership from the Department for the express purpose of constructing assessments for all grades/courses and subjects. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution (in July 2014). ITN Reference 7.3.7	1) Provide Department email reflecting completion of the test construction process (2) Appearance of completed schedule in weekly management report	July 15, 2014	$16,834.00
82					July 15, 2015	$24,381.00
83					July 15, 2016	$24,381.00
84					(Renewal 1 - July 15, 2017)	$24,381.00
85					(Renewal 2 - July 15, 2018)	$24,381.00
86					(Renewal 3 - July 15, 2019)	$24,381.00
87	Test Development	Periodic: Item Development Plan	To ensure the quality and number of items/passages developed is sufficient to create future operational test forms, the contractor will submit an item development plan delineating the number and types of items to be developed. ITN Reference 7.3.0	1) Provide Department email reflecting completion of the Item Development Plan. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$11,652.00
88					December 1, 2016	$11,652.00
89					(Renewal 1 - December 1, 2017)	$11,652.00
90					(Renewal 2 - December 1, 2018)	$11,652.00
91	Test Development	Periodic: Item Writer Training	The contractor must identify and recruit a sufficient number of highly-qualified writers for passages and items to ensure variety and quality of development. The contractor, in conjunction with the Department, will conduct an annual training session for all Item Writers. ITN Reference 7.3.3	1) Provide Department email reflecting completion of Item Writer Training. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$9,679.00
92					December 1, 2016	$4,555.00
93					(Renewal 1 - December 1, 2017)	$4,555.00
94					(Renewal 2 - December 1, 2018)	$4,555.00
95	Test Development	Periodic: Meetings with Educators	The contractor is responsible for organizing and convening meetings for the purpose of reviewing assessment items and otherwise supporting the assessment program. These meetings are referenced in the ITN in 7.3.4 and 7.7.7. This deliverable includes the cost of preparing for and administering the meeting, but it does not include the cost of travel for meeting participants, which is covered as a reimbursable category in 7.7.9.	(1) Include support for all meetings since the previous invoice. (2) Provide the meeting costs, a final agenda, and a final list of attendees for each meeting.	(Dates to be negotiated.) 2015	$55,695.00
96					2016	$56,441.00
97					2017	$57,205.00
98					(Renewal 1 - 2018)	$58,783.00
99					(Renewal 2 - 2019)	$59,860.00
100					(Renewal 3 - 2020)	$60,029.00
101	Test Development	Periodic: English-to-Language Translation Dictionary	The respondent's reply should describe the provision on the CBT system of an on-screen English-to-heritage language translation dictionary for English Language Learners. ITN Ref 7.3.11.2	(1) Provide evidence of Department acceptance and approval (email is acceptable) of the English-to-Language Translation Dictionary.	(TBD - Part of negotiation) 2015	$5,000.00
102					2016	$1,000.00
103					2017	$1,000.00
104					(Renewal 1 - 2018)	$1,000.00
105					(Renewal 2 - 2019)	$1,000.00
106					(Renewal 3 - 2020)	$1,000.00
107	Test Development	Periodic: English-to-Sign Language Translation Dictionary	The respondent's reply may describe the provision on the CBT system of an on-screen English-to-sign language translation dictionary. ITN Ref 7.3.11.2	(1) Provide evidence of Department acceptance and approval (email is acceptable) of the English-to-Sign Language Translation Dictionary.	(TBD - Part of negotiation) 2015	$5,000.00
108					2016	$1,000.00
109					2017	$1,000.00
110					(Renewal 1 - 2018)	$1,000.00
111					(Renewal 2 - 2019)	$1,000.00
112					(Renewal 3 - 2020)	$1,000.00

377	Test Administration	Fall EOC: Deliver a computer-based assessment platform that meets the specifications in the contract for each computer-based administration.	Provide evidence that the computer-based assessment platform met the requirements of the contract and was operable for the invoice period. This includes the availability of the system check and an infrastructure test. ITN Reference 7.4.9	(1) Provide a report listing met requirements and any (or no) malfunctions or unavailability of the site that occurred during the period, signed by the Department team. Delivered at the initiation of the contract; report should cover from 15 days before the previous invoice period through 15 days prior to the current invoice billing date.		$0.00
378					November 2015	$0.00
379					November 2016	$0.00
380					(Renewal 1 - November 2017)	$0.00
381					(Renewal 2 - November 2018)	$0.00
382					(Renewal 2 - November 2019)	$0.00
383	Test Administration	Winter EOC: Deliver a computer-based assessment platform that meets the specifications in the contract for each computer-based administration.	Provide evidence that the computer-based assessment platform met the requirements of the contract and was operable for the invoice period. This includes the availability of the system check and an infrastructure test. ITN Reference 7.4.9	(1) Provide a report listing met requirements and any (or no) malfunctions or unavailability of the site that occurred during the period, signed by the Department team. Delivered at the initiation of the contract; report should cover from 15 days before the previous invoice period through 15 days prior to the current invoice billing date.		$0.00
384					February 2016	$0.00
385					February 2017	$0.00
386					(Renewal 1 - February 2018)	$0.00
387					(Renewal 2 - February 2019)	$0.00
388					(Renewal 3 - February 2020)	$0.00
389	Test Administration	Spring EOC: Deliver a computer-based assessment platform that meets the specifications in the contract for each computer-based administration.	Provide evidence that the computer-based assessment platform met the requirements of the contract and was operable for the invoice period. This includes the availability of the system check and an infrastructure test. ITN Reference 7.4.9	(1) Provide a report listing met requirements and any (or no) malfunctions or unavailability of the site that occurred during the period, signed by the Department team. Delivered at the initiation of the contract; report should cover from 15 days before the previous invoice period through 15 days prior to the current invoice billing date.		$0.00
390					May 2015	$0.00
391					May 2016	$0.00
392					May 2017	$0.00
393					(Renewal 1 - May 2018)	$0.00
394					(Renewal 2 - May 2019)	$0.00

402					(Renewal 3 - August 2020)	$0.00
403	Test Administration	PERIODIC: Develop and deliver approved practice tests and tutorials for the computer-based and paper-based assessments (sample test materials and computer-based practice tests).	According to production schedules, all practice materials must be developed and approved on a timeline to be established that offers students enough time to practice prior to each administration. All practice tests (computer-based and paper-based) must contain 10-20 sample items. For the paper-based practice materials, there should be a separate test booklet and a separate answer key booklet for teachers. These paper-based practice materials are produced in ADA-compliant PDF files for posting. Practice materials must also be produced for all accommodated versions (computer-based accommodations and paper-based accommodations, such as braille and large print). ITN Reference 7.3.7.5 and 7.4.9.6	(1) Provide Department email reflecting approval of the practice tests and tutorials that reflect the requirements for each year of the assessment. For year 1 of the contract, this will be PDFs for all grades and subjects, and computer-based practice tests for all grades and subjects that will be offered as computer-based subjects the first year. As grades and subjects are added each year (per the schedule in Appendix A), the appropriate computer-based practice tests must also be released. This delivery includes the annual delivery of requested paper-based accommodated versions, which are the only versions that are shipped to districts. (All others are published or linked for distribution.)	November 2014	$31,591.00
404					November 2015	$1,000.00
405					November 2016	$1,000.00
406					(Renewal 1 - November 2017)	$1,000.00
407					(Renewal 2 - November 2018)	$1,000.00
408					(Renewal 3 - November 2019)	$1,000.00
409						$0.00
410	Test Administration	PERIODIC: Develop and deliver a training plan for the initial training and supply materials to support ongoing training for the audiences identified in the contract.	The contractor must train Department, district, and school staff on the setup, features, management, and use of the computer-based platform and online management system at the beginning of the contract. ITN Reference 7.4.7.1 and 7.4.9.8	(1) Provide Department email confirming and approving completion of the initial training and completion of the materials to support ongoing training. (2) Provide Department email approving the final, posted training materials for each administration.	September 2014	$207,841.00
411	Test Administration	PERIODIC: Develop and deliver materials to support ongoing training for the audiences identified in the contract.	The contractor must train Department, district, and school staff on the setup, features, management, and use of the computer-based platform and online management system. ITN Reference 7.4.7.1 and 7.4.9.8	(1) Provide Department email approving the final, posted training materials for each administration.	August 2015	$122,583.00
412					August 2016	$122,583.00
413					(Renewal 1 - August 2017)	$122,583.00

For each administration, the contractor unpacks and scans the documents to be scored and provides the scan files by grades for ELA/L and Mathematics and by subject for EOC. The Edited scanned data are loaded to online management system with the extracts for any CBT data. Additional processing is performed to resolve PreID data with gridded data, invoke any defaults necessary, and make some transformations for final scoring and creation of the State Student Results file during the editing process. ITN References 7.5.3, 7.5.6.2, and 7.5.6.4	(1) Final approved file layouts, early/full state scan/edit, and CBT extract data files, posted to online management system and SFTP. (2) Provide Department email reflecting receipt and approval of the file layouts and data files.	December 2015	$0.00
706					December 2016	$0.00
707					(Renewal 1 - December 2017)	$0.00

1130	Scoring and Reporting	Winter EOC: Handscoring of Performance Tasks	Handscoring refers to the processes necessary for determining the rating of a student's response on the writing prompts or on the performance-based tasks in ELA/L and Mathematics that respondents may propose. Both paper-based and computer-based tests will contain performance tasks, and so the Contractor must have the capability to score both hand-written and key-entered student responses. The Department requires handscoring processes that are reliable and valid, as well as efficient in terms of time and expenditures. The handscoring process must follow the handscoring specifications. The final handscoring report, as described in the ITN, is required as evidence for payment. ITN Reference 7.5.4.5	(1) Provide Department email reflecting approval of the final handscoring report.	See Appendix B. Dates to be determined as part of contract negotiation.2015	$0.00
1131					2016	$0.00
1132					(Renewal 1 - 2017)	$0.00
1133					(Renewal 2 - 2018)	$0.00
1134					(Renewal 3 - 2019)	$0.00

Attachment 1b - DELIVERABLES PRICING
Specify Component A, B, C, D or E (A-D): _____C_____

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component C 9-11 ELA**
1277	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Test Construction Specifications	The Contractor will deliver Test Construction Specifications for ELA/Literacy and Mathematics, Algebra 1, Algebra 2, Geometry, and Retake Assessments. The final specifications shall be evaluated and approved by the Department. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution. ITN Reference 7.6.0, 7.6.1, and 7.6.2	(1) Test Construction Specifications are secure, and therefore the Contractor shall provide a report which indicates the completed status of Specifications posted to Secure File Transfer Protocol (SFTP). (2) Provide Department email reflecting receipt and approval of the Test Construction Specifications.	May 2014	$41,346.00
1278					May 2015	$2,000.00
1279					May 2016	$0.00
1280					(Renewal 1 - May 2017)	$0.00
1281					(Renewal 2 - May 2018)	$0.00
1282					(Renewal 3 - May 2019)	$0.00
1283	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Test Forms for Field Test and/or Operational Administrations	All paper-based and computer-based forms for the tests, as agreed upon by the Department and memorialized in the approved Test Construction Specifications, must be submitted and approved. ITN Reference 7.6.0 and 7.6.1	(1) Test forms are secure, and therefore the contractor shall post them to SFTP. The Department shall maintain a copy of the materials on file as needed for evidence of completion of the deliverable. (2) Provide Department email reflecting receipt and approval of the final paper-based and computer-based forms.	July 2014	$59,589.00
1284					July 2015	$59,589.00
1285					July 2016	$59,589.00
1286					(Renewal 1 - July 2017)	$59,589.00
1287					(Renewal 2 - July 2018)	$59,589.00
1288					(Renewal 3 - July 2019)	$59,589.00
1289	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Sampling Plans	Detailed plan for sampling of students from the State. Sampling plan must describe the initial analyses on the SSR files, introducing plans for how to collect data, and the list of post-hoc analyses for representativeness checks when data from test administrations are in for operational processing. ITN Reference 7.6.2.2	(1) Final versions of sampling plans posted to SFTP. (2) Provide Department email reflecting receipt and approval of the sampling plans.	July 2014	$6,000.00
1290					July 2015	$2,000.00
1291					July 2016	$2,000.00
1292					(Renewal 1 - July 2017)	$2,000.00

1331	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments	Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments ITN Reference 7.6.3.3	(1) Submit initial versions and the final versions of Scale Linking Plans (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	November 2014	$20,412.00
1332						$0.00
1333	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Collecting Legal Opinion	Collecting legal opinion, subject to the Department's approval, about the defensibility of linking methodology. ITN Reference 7.6.3.3	(1) Submit final version of the legal opinion document (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	October 2014	$697,578.00
1334						$0.00
1335	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Scales during transitioning years to find out FCAT 2.0 and EOC equivalents based on the performance of students on the Florida Standards Assessments	Conducting all linking operations and scoring activities as laid out in the approved linking specifications. ITN Reference 7.6.3.3	(1) Submit final look-up tables and scored files (secure files) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the files.	May 2015	$85,970.00
1336						$0.00
1337	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Standard Setting Work Plan	Prepare a Standard Setting Work plan for setting achievement level standards for ELA/Literacy, Mathematics, Algebra 1 &2, and Geometry assessments. Plan must include every detail of the methodology, internal and external data files, and the timeline for all of the activities during educator and reactor panel meetings. The Plan must be vetted by TAC members and the methodology must be approved by the department. ITN Reference 7.6.3.4	(1) Submit the final version of Standard Setting Work Plan and relevant materials, such as slides (secure materials), posted to SFTP. (2) Provide Department email reflecting receipt and approval of the documents.	January 2015	$2,000.00
1338	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Implement Achievement Level Standard Setting Meetings	Hold the required meetings and collect recommended cut scores from all relevant groups, as described in ITN Reference 7.6.3.4	(1) Submit the initial version of the Standard Setting Technical Report (secure file), including recommended cuts and impact data, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	October 2015	$115,401.00
1339	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Finalizing Standard Setting Technical Report	Preparing Technical Reports, as described in section 7.6.3.4. Collecting Feedback from the Department and Technical Advisory Committee (TAC), finalizing the reports after incorporating the feedback, and submitting the final versions of the reports to the Department. ITN Reference 7.6.3.4	(1) Submit the final version of the Standard Setting Technical Report (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	November 2015	$30,761.00

42					(Renewal 1 - 2018)	$1,000.00
43					(Renewal 2 - 2019)	$1,000.00
44					(Renewal 3 - 2020)	$1,000.00
45	Test Development	Summer EOC: Handscoring Specifications	The contractor should incorporate the handscoring requirements into written handscoring specifications prior to scoring. The handscoring specifications will be a detailed guide to conducting handscoring that will be used by the contractor's handscoring managers and the Department. The applicable administrations/assessments will be determined in the final negotiations. ITN Reference 7.5.4.5	(1) Provide Department email reflecting approval of the final handscoring specifications. (2) The final handscoring specifications provided via SFTP.	Dates to be negotiated 2015	$1,000.00
46					2016	$1,000.00
47					2017	$1,000.00
48					(Renewal 1 - 2018)	$1,000.00
49					(Renewal 2 - 2019)	$1,000.00
50					(Renewal 3 - 2020)	$1,000.00
51	Test Development	Periodic: Style guide for test items	This document is designed to provide a consistent grammar and style standard for the proofing and editing of ELA/L and Mathematics test materials. The document may be included as part of the production specifications document. ITN Reference 7.3.10	(1) Provide Department email reflecting approval of the final style guide document. (2) The final style guide file provided via SFTP.	June 1, 2014	$15,797.00
52					June 1, 2015	$2,000.00
53					June 1, 2016	$2,000.00
54					(Renewal 1 - June 1, 2017)	$2,000.00
55					(Renewal 2 - June 1, 2018)	$2,000.00
56					(Renewal 3 - June 1, 2019)	$2,000.00
57	Test Development	Periodic: Interpretive Products: Test Item Specifications Documents	Test item specifications will be produced for all grades/subjects and may be grouped together in one booklet by grade band or content area. They are based on the standards and define both the content and the format of the test items. Their primary purpose is to establish guidelines for test item writers and reviewers. ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of each test item specification document. (2) Final PDF files provided via SFTP.	November 1, 2015	$35,812.00

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component D EOC**
58	Test Development	Periodic: ELA/L and Mathematics Sample Scoring Guides	The contractor will be expected to post electronic publications that provide information to help educators understand the scoring of constructed-response items included on student reports. These publications provide information about the test design, standards and benchmarks, item types, and how items are scored. They also provide scoring rubrics and the annotated papers used to train scorers for the constructed-response items. Each sample item from the scoring papers is displayed as it appeared on the test and responses for each score point, images of student responses, and annotations explaining why the response received a particular score are provided. ITN Reference 7.3.10	(1) Provide Department email reflecting approval of each scoring guide. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$15,722.00
59					2016	$2,000.00
60					2017	$2,000.00
61					(Renewal 1 - 2018)	$2,000.00
62					(Renewal 2 - 2019)	$2,000.00
63					(Renewal 3 - 2020)	$2,000.00
64	Test Development	Periodic: Understanding Florida's Assessment Reports	This publication describes the various reports of test results distributed to students, schools, and districts. An explanation and an image of each type of report are provided. The booklet also includes information about the test content areas and a glossary of technical terms. The contractor will deliver the electronic ADA-compliant PDF for posting to the DOE website so files can be posted to coincide with the first results delivery (RD1). ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of Understanding Florida's Assessment Reports. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$67,402.00
65					2016	$2,000.00
66					2017	$2,000.00
67					(Renewal 1 - 2018)	$2,000.00
68					(Renewal 2 - 2019)	$2,000.00
69					(Renewal 3 - 2020)	$2,000.00
70	Test Development	Periodic: Test Design and Blueprint	The Test Design and Blueprint will clearly delineate the number of items, types and placement of items, time allotted for each test session, and location of field-test items for all grades and subjects. ITN Reference 7.3.1 and 7.3.2.1	(1) Provide Department email reflecting approval of Test Design and Blueprint (2) Appearance of completed schedule in weekly management report	June 1, 2015	$73,872.00
71	Test Development	Periodic: Content Item Review "Cleans"	After Content Item Review, the contractor, in conjunction with the Department, will conduct an editorial and content review of the items to ensure that changes have been applied correctly and that all editorial and content issues are corrected. ITN Reference 7.3.4.2	(1) Provide Department email reflecting completion of the “Cleans” process (2) Appearance of completed schedule in weekly management report	February 1, 2016	$1,915,038.00
72					February 1, 2017	$1,955,488.00
73					(Renewal 1 - February 1, 2018)	$1,005,531.00
74					(Renewal 2 - February 1, 2019)	$870,544.00
75					(Renewal 3 - February 1, 2020)	$729,403.00
76	Test Development	Periodic: Field Test Item Sets and Forms Review	Whether an embedded or stand-alone model is used, the contractor, in conjunction with the Department, will construct field-test forms. ITN Reference 7.3.5 and 7.3.6	(1) Provide Department email reflecting completion of the field test forms process (2) Appearance of completed schedule in weekly management report	May 1, 2015	$1,954,433.00
77					May 1, 2016	$16,033.00
78					(Renewal 1 - May 1, 2017)	$16,033.00
79					(Renewal 2 - May 1, 2018)	$16,033.00
80					(Renewal 3 - May 1, 2019)	$16,033.00

81	Test Development	Periodic: Onsite Test Construction	The contractor will host content experts and leadership from the Department for the express purpose of constructing assessments for all grades/courses and subjects. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution (in July 2014). ITN Reference 7.3.7	1) Provide Department email reflecting completion of the test construction process (2) Appearance of completed schedule in weekly management report	July 15, 2014	$16,834.00
82					July 15, 2015	$24,381.00
83					July 15, 2016	$24,381.00
84					(Renewal 1 - July 15, 2017)	$24,381.00
85					(Renewal 2 - July 15, 2018)	$24,381.00
86					(Renewal 3 - July 15, 2019)	$24,381.00
87	Test Development	Periodic: Item Development Plan	To ensure the quality and number of items/passages developed is sufficient to create future operational test forms, the contractor will submit an item development plan delineating the number and types of items to be developed. ITN Reference 7.3.0	1) Provide Department email reflecting completion of the Item Development Plan. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$11,652.00
88					December 1, 2016	$11,652.00
89					(Renewal 1 - December 1, 2017)	$11,652.00
90					(Renewal 2 - December 1, 2018)	$11,652.00
91	Test Development	Periodic: Item Writer Training	The contractor must identify and recruit a sufficient number of highly-qualified writers for passages and items to ensure variety and quality of development. The contractor, in conjunction with the Department, will conduct an annual training session for all Item Writers. ITN Reference 7.3.3	1) Provide Department email reflecting completion of Item Writer Training. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$9,679.00
92					December 1, 2016	$4,555.00
93					(Renewal 1 - December 1, 2017)	$4,555.00
94					(Renewal 2 - December 1, 2018)	$4,555.00
95	Test Development	Periodic: Meetings with Educators	The contractor is responsible for organizing and convening meetings for the purpose of reviewing assessment items and otherwise supporting the assessment program. These meetings are referenced in the ITN in 7.3.4 and 7.7.7. This deliverable includes the cost of preparing for and administering the meeting, but it does not include the cost of travel for meeting participants, which is covered as a reimbursable category in 7.7.9.	(1) Include support for all meetings since the previous invoice. (2) Provide the meeting costs, a final agenda, and a final list of attendees for each meeting.	(Dates to be negotiated.) 2015	$55,695.00
96					2016	$56,441.00
97					2017	$57,205.00
98					(Renewal 1 - 2018)	$58,783.00
99					(Renewal 2 - 2019)	$59,860.00
100					(Renewal 3 - 2020)	$60,029.00
101	Test Development	Periodic: English-to-Language Translation Dictionary	The respondent's reply should describe the provision on the CBT system of an on-screen English-to-heritage language translation dictionary for English Language Learners. ITN Ref 7.3.11.2	(1) Provide evidence of Department acceptance and approval (email is acceptable) of the English-to-Language Translation Dictionary.	(TBD - Part of negotiation) 2015	$5,000.00
102					2016	$1,000.00
103					2017	$1,000.00
104					(Renewal 1 - 2018)	$1,000.00
105					(Renewal 2 - 2019)	$1,000.00
106					(Renewal 3 - 2020)	$1,000.00
107	Test Development	Periodic: English-to-Sign Language Translation Dictionary	The respondent's reply may describe the provision on the CBT system of an on-screen English-to-sign language translation dictionary. ITN Ref 7.3.11.2	(1) Provide evidence of Department acceptance and approval (email is acceptable) of the English-to-Sign Language Translation Dictionary.	(TBD - Part of negotiation) 2015	$5,000.00
108					2016	$1,000.00
109					2017	$1,000.00
110					(Renewal 1 - 2018)	$1,000.00
111					(Renewal 2 - 2019)	$1,000.00
112					(Renewal 3 - 2020)	$1,000.00

403	Test Administration	PERIODIC: Develop and deliver approved practice tests and tutorials for the computer-based and paper-based assessments (sample test materials and computer-based practice tests).	According to production schedules, all practice materials must be developed and approved on a timeline to be established that offers students enough time to practice prior to each administration. All practice tests (computer-based and paper-based) must contain 10-20 sample items. For the paper-based practice materials, there should be a separate test booklet and a separate answer key booklet for teachers. These paper-based practice materials are produced in ADA-compliant PDF files for posting. Practice materials must also be produced for all accommodated versions (computer-based accommodations and paper-based accommodations, such as braille and large print). ITN Reference 7.3.7.5 and 7.4.9.6	(1) Provide Department email reflecting approval of the practice tests and tutorials that reflect the requirements for each year of the assessment. For year 1 of the contract, this will be PDFs for all grades and subjects, and computer-based practice tests for all grades and subjects that will be offered as computer-based subjects the first year. As grades and subjects are added each year (per the schedule in Appendix A), the appropriate computer-based practice tests must also be released. This delivery includes the annual delivery of requested paper-based accommodated versions, which are the only versions that are shipped to districts. (All others are published or linked for distribution.)	November 2014	$31,591.00
404					November 2015	$1,000.00
405					November 2016	$1,000.00
406					(Renewal 1 - November 2017)	$1,000.00
407					(Renewal 2 - November 2018)	$1,000.00
408					(Renewal 3 - November 2019)	$1,000.00
409						$0.00
410	Test Administration	PERIODIC: Develop and deliver a training plan for the initial training and supply materials to support ongoing training for the audiences identified in the contract.	The contractor must train Department, district, and school staff on the setup, features, management, and use of the computer-based platform and online management system at the beginning of the contract. ITN Reference 7.4.7.1 and 7.4.9.8	(1) Provide Department email confirming and approving completion of the initial training and completion of the materials to support ongoing training. (2) Provide Department email approving the final, posted training materials for each administration.	September 2014	$207,841.00
411	Test Administration	PERIODIC: Develop and deliver materials to support ongoing training for the audiences identified in the contract.	The contractor must train Department, district, and school staff on the setup, features, management, and use of the computer-based platform and online management system. ITN Reference 7.4.7.1 and 7.4.9.8	(1) Provide Department email approving the final, posted training materials for each administration.	August 2015	$122,583.00
412					August 2016	$122,583.00

1265	Scoring and Reporting	Summer EOC: Manual Rescore Log: Development of the log to record the PBT test with passing scores for manual rescoring.	The contractor will create a log to identify students who qualified for manual rescoring and provide this log to the Department. The log will follow the requirements specified in the SR Specification. ITN Reference 7.5.6.5	(1) Manual rescore log posted to the online management system. (2) Provide Department email reflecting receipt of log.	July 2015	$1,000.00
1266					July 2016	$1,000.00
1267					July 2017	$1,000.00
1268					(Renewal 1 - July 2018)	$1,000.00
1269					(Renewal 2 - July 2019)	$1,000.00
1270					(Renewal 3 - July 2020)	$1,000.00
1271	Scoring and Reporting	Periodic: Writing Image CD/DVD or jump drives and proof to delivery: Development of the Writing Image CD/DVD or jump drives.	The contractor will create and ship Writing images for all students who submitted a folder to be scored and ship these CDs to the districts with one CD/DVD or jump drives for each grade tested. The contractor will submit proof of delivery to the Department after all of the Writing Image CD/DVD or jump drives are delivered to districts. ITN Reference 7.5.5	1) Provide Department email reflecting receipt and approval of the sample CD/DVD or jump drives. (2) Provide proof of delivery spreadsheet listing the following for each shipment: date/time delivered, who received materials, destination address, quantity and type of material delivered. Must show proof of successful delivery to all participating districts.	July 2015	$12,266.00
1272					July 2016	$12,266.00
1273					July 2017	$12,266.00
1274					(Renewal 1 - July 2018)	$12,266.00
1275					(Renewal 2 - July 2019)	$12,266.00
1276					(Renewal 3 - July 2020)	$12,266.00

Attachment 1b - DELIVERABLES PRICING
Specify Component A, B, C, D or E (A-D): _____D_____

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component D EOC**
1277	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Test Construction Specifications	The Contractor will deliver Test Construction Specifications for ELA/Literacy and Mathematics, Algebra 1, Algebra 2, Geometry, and Retake Assessments. The final specifications shall be evaluated and approved by the Department. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution. ITN Reference 7.6.0, 7.6.1, and 7.6.2	(1) Test Construction Specifications are secure, and therefore the Contractor shall provide a report which indicates the completed status of Specifications posted to Secure File Transfer Protocol (SFTP). (2) Provide Department email reflecting receipt and approval of the Test Construction Specifications.	May 2014	$41,346.00
1278					May 2015	$2,000.00
1279					May 2016	$0.00
1280					(Renewal 1 - May 2017)	$0.00
1281					(Renewal 2 - May 2018)	$0.00
1282					(Renewal 3 - May 2019)	$0.00
1283	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Test Forms for Field Test and/or Operational Administrations	All paper-based and computer-based forms for the tests, as agreed upon by the Department and memorialized in the approved Test Construction Specifications, must be submitted and approved. ITN Reference 7.6.0 and 7.6.1	(1) Test forms are secure, and therefore the contractor shall post them to SFTP. The Department shall maintain a copy of the materials on file as needed for evidence of completion of the deliverable. (2) Provide Department email reflecting receipt and approval of the final paper-based and computer-based forms.	July 2014	$79,452.00
1284					July 2015	$79,452.00
1285					July 2016	$79,452.00
1286					(Renewal 1 - July 2017)	$79,452.00
1287					(Renewal 2 - July 2018)	$79,452.00
1288					(Renewal 3 - July 2019)	$79,452.00
1289	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Sampling Plans	Detailed plan for sampling of students from the State. Sampling plan must describe the initial analyses on the SSR files, introducing plans for how to collect data, and the list of post-hoc analyses for representativeness checks when data from test administrations are in for operational processing. ITN Reference 7.6.2.2	(1) Final versions of sampling plans posted to SFTP. (2) Provide Department email reflecting receipt and approval of the sampling plans.	July 2014	$6,000.00
1290					July 2015	$2,000.00
1291					July 2016	$2,000.00
1292					(Renewal 1 - July 2017)	$2,000.00
1293					(Renewal 2 - July 2018)	$2,000.00
1294					(Renewal 3 - July 2019)	$2,000.00
1295	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Drawing Samples for Operational and/or Field Test Administrations	Delivering the data files including sampled units from the populations and the respective reports. Sampling report must describe the initial analyses on the SSR files, procedures for how to collect data, evaluate the representativeness of resulting sample and a list of post-hoc analyses for representativeness checks when data from test administrations are in for operational processing. ITN Reference 7.6.0, 7.6.1, and 7.6.2.2	(1) Data files, including sampled units from the populations, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the samples.	August 2014	$6,000.00
1296					August 2015	$2,000.00
1297					August 2016	$2,000.00
1298					(Renewal 1 - August 2017)	$2,000.00
1299					(Renewal 2 - August 2018)	$2,000.00
1300					(Renewal 3 - August 2019)	$2,000.00
1301	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the SES Specifications	Preparing a detailed plan for conducting all scaling and equating plans and procedures, scoring plans and procedures. The plan should include a comprehensive and detailed timeline for all tasks and events. The plan should also provide a detailed description of the outcomes produced from the	(1) SES Specifications (secure) posted to SFTP. (2) Provide Department email reflecting receipt and approval of the SES Specifications.	December 2014	$35,000.00
1302					December 2015	$2,000.00
1303					December 2016	$2,000.00
1304					(Renewal 1 - December 2017)	$2,000.00
1305					(Renewal 2 - December 2018)	$2,000.00

1330			submitting the final versions of the reports to the Department. ITN Reference 7.6.3.2		(Renewal 3 - December 2020)	$151,570.00
1331	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments	Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments ITN Reference 7.6.3.3	(1) Submit initial versions and the final versions of Scale Linking Plans (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	November 2014	$20,412.00
1332						$0.00
1333	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Collecting Legal Opinion	Collecting legal opinion, subject to the Department's approval, about the defensibility of linking methodology. ITN Reference 7.6.3.3	(1) Submit final version of the legal opinion document (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	October 2014	$697,578.00
1334						$0.00
1335	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Scales during transitioning years to find out FCAT 2.0 and EOC equivalents based on the performance of students on the Florida Standards Assessments	Conducting all linking operations and scoring activities as laid out in the approved linking specifications. ITN Reference 7.6.3.3	(1) Submit final look-up tables and scored files (secure files) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the files.	May 2015	$85,970.00
1336						$0.00
1337	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Standard Setting Work Plan	Prepare a Standard Setting Work plan for setting achievement level standards for ELA/Literacy, Mathematics, Algebra 1 &2, and Geometry assessments. Plan must include every detail of the methodology, internal and external data files, and the timeline for all of the activities during educator and reactor panel meetings. The Plan must be vetted by TAC members and the methodology must be approved by the department. ITN Reference 7.6.3.4	(1) Submit the final version of Standard Setting Work Plan and relevant materials, such as slides (secure materials), posted to SFTP. (2) Provide Department email reflecting receipt and approval of the documents.	January 2015	$2,000.00
1338	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Implement Achievement Level Standard Setting Meetings	Hold the required meetings and collect recommended cut scores from all relevant groups, as described in ITN Reference 7.6.3.4	(1) Submit the initial version of the Standard Setting Technical Report (secure file), including recommended cuts and impact data, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	October 2015	$115,401.00
1339	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Finalizing Standard Setting Technical Report	Preparing Technical Reports, as described in section 7.6.3.4. Collecting Feedback from the Department and Technical Advisory Committee (TAC), finalizing the reports after incorporating the feedback, and submitting the final versions of the reports to the Department. ITN Reference 7.6.3.4	(1) Submit the final version of the Standard Setting Technical Report (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	November 2015	$30,761.00

1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component D EOC**
1349			and events, as described in section 7.6.3.7 The plan must be vetted by TAC members. The plan should include the degree of comparability of item-level and test-level statistics across devices. The plan should include the degree of comparability of item-level and test-level statistics across various input types. For the questions above, the plan should address to what degree of comparability can be obtained through scaling items onto a single metric, linking or concordance. The plan should also include what interactions exist among device, input type and item/task characteristics, grade, subject, and relevant student characteristics. ITN Reference 7.6.3.6.1	approval of the study specifications.		$0.00
1350	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Study for Comparability Between Devices Delivering Assessments, Preparing its Final Report, and Recommendations with TAC Committee	Conducting all of the planned analyses, preparing its technical report, and sharing the findings and recommendations with TAC members. ITN Reference 7.6.3.6.1	(1) Submit Final Report and Recommendations to the Department. These materials are secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2015	$29,752.00
1351						$0.00
1352	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of a study plan for linking Florida Standards Assessments to other assessments measuring the same standards	Preparing a detailed plan for conducting the linking study. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.8 The plan must be vetted by TAC members. The plan should include a review of the most promising and most feasible methods in linking, discuss the technical feasibility of such methods, and explain the process of establishing the linking relationship(s) in detail. ITN Reference 7.6.3.6.2	(1) The plan for conducting comparability study is secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the study specifications.	November 2015	$900.00
1353						$0.00
1354	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Florida Standards Assessments to other assessments	Conducting all of the planned analyses, preparing a final technical report, and sharing the results of linked relationships with TAC committee to discuss the validity of interpretations. ITN Reference 7.6.3.6.2	(1) Submit Final Report and Recommendations (secure files) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2016	$9,868.00
1355						$0.00
1356	Scaling, Equating, Scoring,	Periodic: Development of a study plan	The Contractor's plan will include, review of the	(1) The plan for conducting the linking study is	November 2015	$900.00

1377			sufficient number of highly qualified personnel to work closely with the Department to manage the contract. Specific requirements are in 7.7.2 of the ITN.	August, and November)	(Renewal 3 - 2020)	$1,129,158.00
1378	Program Management	Periodic: Program Management Reports: Weekly Management and Action Item Report	The Weekly Management Report and Action Item Report will report the status of recent and upcoming tasks, highlighting those leading up to deliverables and critical tasks, report progress on program issues, identify unresolved issues, and maintain a list of requests requiring change orders or amendments. The weekly report will be provided to the Department by no later than noon one day prior to the weekly program management conference calls and will reflect the previous week's work. ITN Ref 7.7.6	(1) For each invoice period, provide one management report from each month since the previous invoice period. (Quarterly invoices to occur in February, May, August, and November)	2014	$112,459.00
1379					2015	$112,459.00
1380					2016	$112,459.00
1381					(Renewal 1 - 2017)	$112,459.00
1382					(Renewal 2 - 2018)	$112,459.00
1383					(Renewal 3 - 2019)	$112,459.00
1384	Program Management	Periodic: Annual Program Review	Review will include a record of the contractor's services and deliverables in response to contractual/ITN requirements. This review must identify major program accomplishments and successes, as well as areas of the program that require changes and improvement in the upcoming year. The review is intended to be a history of program events and to describe recommended improvements or changes for subsequent years. The annual review will be based on information gathered by the contractor's program and project management staff throughout the year. The review will address all aspects of program service and products including management, technology, interpretive products, communications, development, test production, test administration, materials shipping/pickup, scoring, and reporting processes. It will also follow the annual administrative cycle, beginning with fall and ending with the following summer. ITN Reference 7.7.6	(1) Provide evidence of Department acceptance and approval of the annual program review for the previous administration year.	November 2015	$54,642.00
1385					November 2016	$54,642.00
1386					November 2017	$54,642.00
1387					(Renewal 1 - November 2018)	$54,642.00
1388					(Renewal 2 - November 2019)	$54,642.00
1389					(Renewal 3 - November 2020)	$54,642.00
1390	Program Management	Periodic: Program Management Reports: Collect Accounting Reports	A summary of the Quarterly Accounting Reports, including expenditures by program task and level of effort as well as expenditures and balances of Reimbursable Funding Categories identified in Section 7.7.9, including balances resulting from executed change orders and contract amendments. ITN Ref 7.7.6	(1) For each invoice period, provide the quarterly accounting reports. (Quarterly invoices to occur in February, May, August, and November)	2014	$69,917.00
1391					2015	$69,797.00
1392					2016	$69,797.00
1393					(Renewal 1 - 2017)	$69,797.00
1394					(Renewal 2 - 2018)	$69,797.00
1395					(Renewal 3 - 2019)	$69,797.00

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component E All Components**
58	Test Development	Periodic: ELA/L and Mathematics Sample Scoring Guides	The contractor will be expected to post electronic publications that provide information to help educators understand the scoring of constructed-response items included on student reports. These publications provide information about the test design, standards and benchmarks, item types, and how items are scored. They also provide scoring rubrics and the annotated papers used to train scorers for the constructed-response items. Each sample item from the scoring papers is displayed as it appeared on the test and responses for each score point, images of student responses, and annotations explaining why the response received a particular score are provided. ITN Reference 7.3.10	(1) Provide Department email reflecting approval of each scoring guide. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$67,380.00
59					2016	$2,000.00
60					2017	$2,000.00
61					(Renewal 1 - 2018)	$2,000.00
62					(Renewal 2 - 2019)	$2,000.00
63					(Renewal 3 - 2020)	$2,000.00
64	Test Development	Periodic: Understanding Florida's Assessment Reports	This publication describes the various reports of test results distributed to students, schools, and districts. An explanation and an image of each type of report are provided. The booklet also includes information about the test content areas and a glossary of technical terms. The contractor will deliver the electronic ADA-compliant PDF for posting to the DOE website so files can be posted to coincide with the first results delivery (RD1). ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of Understanding Florida's Assessment Reports. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$84,252.00
65					2016	$2,000.00
66					2017	$2,000.00
67					(Renewal 1 - 2018)	$2,000.00
68					(Renewal 2 - 2019)	$2,000.00
69					(Renewal 3 - 2020)	$2,000.00
70	Test Development	Periodic: Test Design and Blueprint	The Test Design and Blueprint will clearly delineate the number of items, types and placement of items, time allotted for each test session, and location of field-test items for all grades and subjects. ITN Reference 7.3.1 and 7.3.2.1	(1) Provide Department email reflecting approval of Test Design and Blueprint (2) Appearance of completed schedule in weekly management report	June 1, 2015	$316,596.00
71	Test Development	Periodic: Content Item Review "Cleans"	After Content Item Review, the contractor, in conjunction with the Department, will conduct an editorial and content review of the items to ensure that changes have been applied correctly and that all editorial and content issues are corrected. ITN Reference 7.3.4.2	(1) Provide Department email reflecting completion of the “Cleans” process (2) Appearance of completed schedule in weekly management report	February 1, 2016	$11,472,807.00
72					February 1, 2017	$11,710,747.00
73					(Renewal 1 - February 1, 2018)	$6,122,763.00
74					(Renewal 2 - February 1, 2019)	$5,328,726.00
75					(Renewal 3 - February 1, 2020)	$4,498,480.00
76	Test Development	Periodic: Field Test Item Sets and Forms Review	Whether an embedded or stand-alone model is used, the contractor, in conjunction with the Department, will construct field-test forms. ITN Reference 7.3.5 and 7.3.6	(1) Provide Department email reflecting completion of the field test forms process (2) Appearance of completed schedule in weekly management report	May 1, 2015	$11,704,540.00
77					May 1, 2016	$89,906.00
78					(Renewal 1 - May 1, 2017)	$89,906.00
79					(Renewal 2 - May 1, 2018)	$89,906.00
80					(Renewal 3 - May 1, 2019)	$89,906.00

81	Test Development	Periodic: Onsite Test Construction	The contractor will host content experts and leadership from the Department for the express purpose of constructing assessments for all grades/courses and subjects. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution (in July 2014). ITN Reference 7.3.7	1) Provide Department email reflecting completion of the test construction process (2) Appearance of completed schedule in weekly management report	July 15, 2014	$72,146.00
82					July 15, 2015	$104,489.00
83					July 15, 2016	$104,489.00
84					(Renewal 1 - July 15, 2017)	$104,489.00
85					(Renewal 2 - July 15, 2018)	$104,489.00
86					(Renewal 3 - July 15, 2019)	$104,489.00
87	Test Development	Periodic: Item Development Plan	To ensure the quality and number of items/passages developed is sufficient to create future operational test forms, the contractor will submit an item development plan delineating the number and types of items to be developed. ITN Reference 7.3.0	1) Provide Department email reflecting completion of the Item Development Plan. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$49,938.00
88					December 1, 2016	$49,938.00
89					(Renewal 1 - December 1, 2017)	$49,938.00
90					(Renewal 2 - December 1, 2018)	$49,938.00
91	Test Development	Periodic: Item Writer Training	The contractor must identify and recruit a sufficient number of highly-qualified writers for passages and items to ensure variety and quality of development. The contractor, in conjunction with the Department, will conduct an annual training session for all Item Writers. ITN Reference 7.3.3	1) Provide Department email reflecting completion of Item Writer Training. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$41,483.00
92					December 1, 2016	$19,520.00
93					(Renewal 1 - December 1, 2017)	$19,520.00
94					(Renewal 2 - December 1, 2018)	$19,520.00
95	Test Development	Periodic: Meetings with Educators	The contractor is responsible for organizing and convening meetings for the purpose of reviewing assessment items and otherwise supporting the assessment program. These meetings are referenced in the ITN in 7.3.4 and 7.7.7. This deliverable includes the cost of preparing for and administering the meeting, but it does not include the cost of travel for meeting participants, which is covered as a reimbursable category in 7.7.9.	(1) Include support for all meetings since the previous invoice. (2) Provide the meeting costs, a final agenda, and a final list of attendees for each meeting.	(Dates to be negotiated.) 2015	$278,476.00
96					2016	$282,206.00
97					2017	$286,025.00
98					(Renewal 1 - 2018)	$293,914.00
99					(Renewal 2 - 2019)	$299,300.00
100					(Renewal 3 - 2020)	$300,145.00
101	Test Development	Periodic: English-to-Language Translation Dictionary	The respondent's reply should describe the provision on the CBT system of an on-screen English-to-heritage language translation dictionary for English Language Learners. ITN Ref 7.3.11.2	(1) Provide evidence of Department acceptance and approval (email is acceptable) of the English-to-Language Translation Dictionary.	(TBD - Part of negotiation) 2015	$5,000.00
102					2016	$1,000.00
103					2017	$1,000.00
104					(Renewal 1 - 2018)	$1,000.00
105					(Renewal 2 - 2019)	$1,000.00
106					(Renewal 3 - 2020)	$1,000.00
107	Test Development	Periodic: English-to-Sign Language Translation Dictionary	The respondent's reply may describe the provision on the CBT system of an on-screen English-to-sign language translation dictionary. ITN Ref 7.3.11.2	(1) Provide evidence of Department acceptance and approval (email is acceptable) of the English-to-Sign Language Translation Dictionary.	(TBD - Part of negotiation) 2015	$5,000.00
108					2016	$1,000.00
109					2017	$1,000.00
110					(Renewal 1 - 2018)	$1,000.00
111					(Renewal 2 - 2019)	$1,000.00
112					(Renewal 3 - 2020)	$1,000.00

143					(Renewal 2-2019)	$1,000.00
144					(Renewal 3-2020)	$1,000.00
145	Test Administration	Summer EOC: Inventory missing materials and provide a report.	Once all materials are scanned in and inventoried, districts are contacted and asked to locate and return any secure materials identified as missing. After a thorough search has been conducted by districts, materials have been accounted for, and any additional searches have been exhausted at the contractor's facilities, the contractor provides a final report listing any outstanding missing materials. ITN Reference 7.4.2	1) Final missing materials report. 2) Provide Department email reflecting approval of the report.	After each test administration, contingent on final administration dates. Finalize during negotiations. 2015	$1,000.00
146					2016	$1,000.00
147					2017	$1,000.00
148					(Renewal 1-2018)	$1,000.00
149					(Renewal 2-2019)	$1,000.00
150					(Renewal 3-2020)	$1,000.00
151	Test Administration	Fall ELA/L Retake: Develop packaging and distribution specifications for each test administration.	A document detailing all processes, procedures, and requirements for the packaging and distribution of test materials, ancillary materials, and student reports. ITN Reference 7.4.1	(1) Digital copy of the approved specifications. (2) Provide Department email reflecting approval of the Specifications.	Prior to each test administration, TBD based on packaging requirements of the selected contractor (must be finalized in sufficient time for the contractor to complete the work before the critical delivery dates). Finalize during negotiations. 2015.	$0.00
152						$98,074.00
153					2016	$81,868.00
154					(Renewal 1- 2017)	$87,228.00
155					(Renewal 2-2018)	$91,416.00
156					(Renewal 3 - 2019)	$92,033.00
157	Test Administration	Spring ELA/L Retake: Develop packaging and distribution specifications for each test administration.	A document detailing all processes, procedures, and requirements for the packaging and distribution of test materials, ancillary materials, and student reports. ITN Reference 7.4.1	(1) Digital copy of the approved specifications. (2) Provide Department email reflecting approval of the Specifications.	Prior to each test administration, TBD based on packaging requirements of the selected contractor (must be finalized in sufficient time for the contractor to complete the work before the critical delivery dates). Finalize during negotiations. 2016	$0.00
158						$1,000.00

403	Test Administration	PERIODIC: Develop and deliver approved practice tests and tutorials for the computer-based and paper-based assessments (sample test materials and computer-based practice tests).	According to production schedules, all practice materials must be developed and approved on a timeline to be established that offers students enough time to practice prior to each administration. All practice tests (computer-based and paper-based) must contain 10-20 sample items. For the paper-based practice materials, there should be a separate test booklet and a separate answer key booklet for teachers. These paper-based practice materials are produced in ADA-compliant PDF files for posting. Practice materials must also be produced for all accommodated versions (computer-based accommodations and paper-based accommodations, such as braille and large print). ITN Reference 7.3.7.5 and 7.4.9.6	(1) Provide Department email reflecting approval of the practice tests and tutorials that reflect the requirements for each year of the assessment. For year 1 of the contract, this will be PDFs for all grades and subjects, and computer-based practice tests for all grades and subjects that will be offered as computer-based subjects the first year. As grades and subjects are added each year (per the schedule in Appendix A), the appropriate computer-based practice tests must also be released. This delivery includes the annual delivery of requested paper-based accommodated versions, which are the only versions that are shipped to districts. (All others are published or linked for distribution.)	November 2014	$121,502.00
404					November 2015	$8,000.00
405					November 2016	$8,000.00

	A	B	C	D	E	F
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component E All Components**
1277	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Test Construction Specifications	The Contractor will deliver Test Construction Specifications for ELA/Literacy and Mathematics, Algebra 1, Algebra 2, Geometry, and Retake Assessments. The final specifications shall be evaluated and approved by the Department. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution. ITN Reference 7.6.0, 7.6.1, and 7.6.2	(1) Test Construction Specifications are secure, and therefore the Contractor shall provide a report which indicates the completed status of Specifications posted to Secure File Transfer Protocol (SFTP). (2) Provide Department email reflecting receipt and approval of the Test Construction Specifications.	May 2014	$137,819.00
1278					May 2015	$5,000.00
1279					May 2016	$0.00
1280					(Renewal 1 - May 2017)	$0.00
1281					(Renewal 2 - May 2018)	$0.00
1282					(Renewal 3 - May 2019)	$0.00
1283	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Test Forms for Field Test and/or Operational Administrations	All paper-based and computer-based forms for the tests, as agreed upon by the Department and memorialized in the approved Test Construction Specifications, must be submitted and approved. ITN Reference 7.6.0 and 7.6.1	(1) Test forms are secure, and therefore the contractor shall post them to SFTP. The Department shall maintain a copy of the materials on file as needed for evidence of completion of the deliverable. (2) Provide Department email reflecting receipt and approval of the final paper-based and computer-based forms.	July 2014	$218,492.00
1284					July 2015	$218,492.00
1285					July 2016	$218,492.00
1286					(Renewal 1 - July 2017)	$218,492.00
1287					(Renewal 2 - July 2018)	$218,492.00
1288					(Renewal 3 - July 2019)	$218,492.00
1289	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Sampling Plans	Detailed plan for sampling of students from the State. Sampling plan must describe the initial analyses on the SSR files, introducing plans for how to collect data, and the list of post-hoc analyses for representativeness checks when data from test administrations are in for operational processing. ITN Reference 7.6.2.2	(1) Final versions of sampling plans posted to SFTP. (2) Provide Department email reflecting receipt and approval of the sampling plans.	July 2014	$14,911.00
1290					July 2015	$5,000.00
1291					July 2016	$5,000.00
1292					(Renewal 1 - July 2017)	$5,000.00
1293					(Renewal 2 - July 2018)	$5,000.00
1294					(Renewal 3 - July 2019)	$5,000.00
1295	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Drawing Samples for Operational and/or Field Test Administrations	Delivering the data files including sampled units from the populations and the respective reports. Sampling report must describe the initial analyses on the SSR files, procedures for how to collect data, evaluate the representativeness of resulting sample and a list of post-hoc analyses for representativeness checks when data from test administrations are in for operational processing. ITN Reference 7.6.0, 7.6.1, and 7.6.2.2	(1) Data files, including sampled units from the populations, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the samples.	August 2014	$14,537.00
1296					August 2015	$5,000.00
1297					August 2016	$5,000.00
1298					(Renewal 1 - August 2017)	$5,000.00
1299					(Renewal 2 - August 2018)	$5,000.00
1300					(Renewal 3 - August 2019)	$5,000.00
1301	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the SES Specifications	Preparing a detailed plan for conducting all scaling and equating plans and procedures, scoring plans and procedures. The plan should include a comprehensive and detailed timeline for all tasks and events. The plan should also provide a detailed description of the outcomes produced from the	(1) SES Specifications (secure) posted to SFTP. (2) Provide Department email reflecting receipt and approval of the SES Specifications.	December 2014	$52,264.00
1302					December 2015	$5,000.00
1303					December 2016	$5,000.00
1304					(Renewal 1 - December 2017)	$5,000.00
1305					(Renewal 2 - December 2018)	$5,000.00

1330			submitting the final versions of the reports to the Department. ITN Reference 7.6.3.2		(Renewal 3 - December 2020)	$252,617.00
1331	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments	Scale Linking Plan for transitioning from FCAT 2.0 Reading & Mathematics and EOC Algebra 1 & Geometry to the Florida Standards Assessments ITN Reference 7.6.3.3	(1) Submit initial versions and the final versions of Scale Linking Plans (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	November 2014	$20,412.00
1332						$0.00
1333	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Linking Plan: Collecting Legal Opinion	Collecting legal opinion, subject to the Department's approval, about the defensibility of linking methodology. ITN Reference 7.6.3.3	(1) Submit final version of the legal opinion document (secure) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the linking plans.	October 2014	$99,654.00
1334						$0.00
1335	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Scales during transitioning years to find out FCAT 2.0 and EOC equivalents based on the performance of students on the Florida Standards Assessments	Conducting all linking operations and scoring activities as laid out in the approved linking specifications. ITN Reference 7.6.3.3	(1) Submit final look-up tables and scored files (secure files) to the Department, posted to SFTP. (2) Provide Department email reflecting receipt and approval of the files.	May 2015	$122,814.00
1336						$0.00
1337	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Standard Setting Work Plan	Prepare a Standard Setting Work plan for setting achievement level standards for ELA/Literacy, Mathematics, Algebra 1 &2, and Geometry assessments. Plan must include every detail of the methodology, internal and external data files, and the timeline for all of the activities during educator and reactor panel meetings. The Plan must be vetted by TAC members and the methodology must be approved by the department. ITN Reference 7.6.3.4	(1) Submit the final version of Standard Setting Work Plan and relevant materials, such as slides (secure materials), posted to SFTP. (2) Provide Department email reflecting receipt and approval of the documents.	January 2015	$2,000.00
1338	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Implement Achievement Level Standard Setting Meetings	Hold the required meetings and collect recommended cut scores from all relevant groups, as described in ITN Reference 7.6.3.4	(1) Submit the initial version of the Standard Setting Technical Report (secure file), including recommended cuts and impact data, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	October 2015	$230,802.00
1339	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Finalizing Standard Setting Technical Report	Preparing Technical Reports, as described in section 7.6.3.4. Collecting Feedback from the Department and Technical Advisory Committee (TAC), finalizing the reports after incorporating the feedback, and submitting the final versions of the reports to the Department. ITN Reference 7.6.3.4	(1) Submit the final version of the Standard Setting Technical Report (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	November 2015	$34,179.00

Best and Final Offer (BAFO)

State of Florida
Department of Education
Bureau of Contracts, Grants and Procurement Management Services
325 West Gaines Street
332 Turlington Building
Tallahassee, Florida 32399-0400

INVITATION TO NEGOTIATE
BEST AND FINAL OFFER (BAFO)

Reply Number: ITN 2014-47

Title: Florida Standards Assessments

Respondent: American Institutes for Research

Instructions for Best and Final Offer

The following questions are to be answered and acknowledged, and shall be included in your best-value, Best and Final Offer (BAFO) response.

Your BAFO should also include any corrections, additions and/or clarifications made as a result of the Negotiation Session.

The deadline to submit your BAFO response will be **Thursday, February 13, 2013 at 5:00 PM, E.T.**

We propose to provide the services being solicited within the specifications of ITN 2014-47.

SIGN BELOW. UNSIGNED OFFERS WILL NOT BE CONSIDERED.

VENDOR NAME: American Institutes for Research

MAILING ADDRESS: 1000 Thomas Jefferson St., NW

CITY/STATE/ZIP: Washington, DC 20007

AUTHORIZED AGENT (typed): Vickie L. Brooks

AUTHORIZED AGENT (manual): Vickie L Brooks

DATE: Feb. 10, 2014

Summary of Best and Final Offer (BAFO)

The American Institutes for Research is pleased to present this Best and Final Offer (BAFO) to develop and deliver the Florida State Assessment. As a result of negotiations, we have added a variety of options, as well as increasing the clarity of options proposed.

This BAFO responds to 28 questions (questions 1–29, omitting question 22, which was withdrawn). Within, we make clear that the base item bank from which the FSA can be constructed may be either the SAGE or the Smarter Balanced assessment. Prices are offered for each. The optional price for using the Smarter Balanced items in the same way that we proposed using the SAGE items amounts to $7,077,408 over the six-year life of the contract, or just over $1,000,000 per year.

At the Department's request, we have identified a host of other options that would more than offset this price increase. In our response to Question 7**,** we summarize the set of optional cost reductions, and identify a cluster of recommended cost reductions that, if taken as a package, would result in cost reductions of $24,715,666.

We re-submit our price sheets with only minor changes. Significant changes can result if the Department selects the optional reductions set forth in this offer.

Incorporation of Negotiations "Talking Points"

Finally, we appreciated the opportunity to clarify our original proposal during negotiations. We would like to incorporate our response to those talking points. AIR is happy to have Florida incorporate any or all of those responses into our BAFO.

AIR specifically wants to confirm the following commitments we made in those responses.

- **Test Content/Development**
  - AIR will incorporate any proposed or future changes to the Florida Standards into the test design.
  - AIR will construct test forms using only processes approved by the Department.
  - AIR will agree to a detailed schedule for review of test forms for each test and each administration that meets the Department review time requirements listed in the ITN.
  - AIR incorporates the following revised exhibits into our proposal to confirm we will support high school ELA/L:
    - Exhibit 7.3.5-1 (Summary of Planned Embedded Field Testing, pg. 7.3-81)
    - Exhibit 7.3.5-2 (Number and Types of Items and Forms Proposed as Part of Our Base Proposal, pg. 7.3-82)
  - AIR will produce scoring guides annually.
- **Test Administration, Including Computer-Based Testing**
  - AIR will deliver fixed-form, adaptive, and/or linear-on-the-fly tests, as selected by the Department.

- As shown during negotiations, AIR will configure tools and resources available to students (e.g., a student's ability to skip a test item for later review) to the Department's specifications. These configurations are independent of the item selection algorithm.
- AIR will work with the Department to confirm the real-time pre-ID process is acceptable before implementation.
- AIR will schedule the training resources on a schedule that meets the Department's' needs.

- **Scoring and Reporting**
  - AIR will negotiate with the Department to determine the use of AI and human scoring.
  - While SAGE and Smarter Balanced use three-dimensional rubrics, AIR will work with the Department to adopt, modify, change, or develop completely new rubrics.
- **Psychometrics**
  - AIR will always work the technical advisory committee and the Department on all aspects of the program.
  - AIR will work with the Department to secure the external legal opinion.
  - AIR incorporates our expanded discussion and chart of psychometric task assignments to staff into our proposal.
- **Other Management/Program Questions**
  - The Department will have direct access to DRC staff within a mutually approved communications protocol.
  - AIR will be flexible and responsive to late changes in the best interests of Florida's students.
  - AIR incorporates our expanded chart of editorial/production staff assignments, and the associated resumes, into our proposal.
  - AIR and DRC will deliver large shipments in complete pallets as part of single shipments, and will ensure shippers' security practices are documented and embedded into DRC's ISO 9001:2008 certified processes.
  - AIR will work with the Department to ensure any negotiated Pricing Sheet meets the Department's requirements.

Conclusion

We are excited by the possibility of working with Florida. Your state has been a leader in educational reform. AIR would be proud to help continue this tradition of innovation, accountability, and continuous improvement. Responses to the Best and Final Offer questions follow.

1. What are the additional costs for physical separation of systems? Are there any additional costs for physical separation in the Cloud, the hub and test delivery systems? If so, what are the costs?

Our plan as priced includes separate physical hardware for the hub and login system. The satellites, which actually deliver the real-time tests to students, were to be separate virtual systems on shared hardware. The advantage to this approach is that states test at different times; capacity not used by one state is available to others, reducing the total number of satellite servers required.

We note that student data is maintained on the satellite systems for a short period of time (typically a day or two), and is removed once it has been transferred and backed up.

Physically separating the satellites imposes costs because we must lease and support more servers. The total price would be $250,000 per year.

2. The current price submitted is for the use of SAGE items and some Smarter Balanced items for linking studies. Describe in more detail all the ramifications and costs and what is entailed with using the Smarter Balanced items and length of Smarter Balanced test items as compared to SAGE items. Will the Smarter Balanced items be similar enough that they integrate well into an assessment designed with SAGE items?

This question is best addressed in parts.

2a. The current price submitted is for the use of SAGE items and some Smarter Balanced items for linking studies. Will the Smarter Balanced items be similar enough that they integrate well into an assessment designed with SAGE items?

The Smarter Balanced and SAGE items are quite similar. In fact, the Smarter Balanced item formats represent a strict subset of the item formats found on SAGE. Please see the SAGE practice test items (https://utpt.tds.airast.org/Student/Pages/LoginShell.aspx) and the Smarter Balanced practice test items (https://sbacpt.tds.airast.org/student/) for a comparison. While assessment experts will note some small stylistic differences, students will not notice these sorts of small differences. Reviewers will see some item formats on the SAGE practice test that do not appear on the Smarter Balanced tests, as SAGE uses more of our item types than Smarter Balanced.

Readers will note that the item types, passage lengths, use of paired passages, and other features are quite similar across the two assessments.

2b. Describe in more detail all the ramifications and costs and what is entailed with using the Smarter Balanced items and the length of Smarter Balanced test items as compared to SAGE items.

We understand this part of the question to be asking about detailed differences if Florida were to choose to use Smarter Balanced as a base rather than SAGE. We see at least two ways that Florida might choose to use the Smarter Balanced assessment:

1. Florida could choose to administer the Smarter Balanced assessment in conformance with the Smarter Balanced specifications entirely—adaptively, with performance tasks in every grade in both Math and ELA, etc.
2. Florida could choose to use the Smarter Balanced assessment items as a basis for a Florida-specific test, either adaptively or using fixed form (as we proposed for SAGE).

We understand that Florida's current preference is for option 2. We include option 1 for your information (see Exhibit 2-1 below). Option 1 offers one advantage: cross-state comparisons are stronger if the states are administering the same test. When different tests are administered, they may be linked (not equated), and the comparisons are less precise. On the other hand, option 1 is more expensive and requires substantially more testing time.

Under option 1, each student would respond to a computer adaptive test of approximately 40 items, and a performance task in each subject. Total testing time for both subjects combined range from 7–8.5 hours, increasing by grade band.

The performance tasks for Smarter Balanced are designed to be scored by hand, which increases costs.

Finally, the Smarter Balanced blueprint is designed to support different reporting categories than those that Florida may expect. The ELA blueprint is designed to support the following reporting categories:

- Reading
- Writing
- Speaking/Listening
- Research

The Smarter Balanced Math blueprint is designed to support the following reporting categories:

- Concepts and Procedures
- Problem Solving and Modeling/Data Analysis
- Communicating Reasoning

Under option 2, Smarter Balanced items could be used exactly as described in our proposal in place of SAGE items. That is, Florida could select items from the pool to meet a Florida-specific blueprint. We have examined the pool, and we believe that the pool contains sufficient numbers of machine-scored items across the Common Core content standards to measure the full range of standards without the mathematics performance tasks or other human-scored items.

Every Smarter Balanced item is aligned to a Common Core State Standard; however, the Smarter Balanced blueprint describes the test at the cluster level (clusters are generally collections of two or three related standards). Attachment 4 summarizes the number of items by cluster and depth of knowledge. We note that a minority of these items will be removed from the pool to support interim testing, so the actual pools will be smaller; however, it is clear from the charts that the Smarter Balanced machine-scored items cover the full breadth and depth of the mathematics standards in grade 3–8 and high school.

As with the SAGE items, a performance task in writing is needed to cover the full breadth and depth of the writing and research standards, but otherwise the pool offers a robust pool covering both the depth and breadth of the content.

Exhibit 2-1: Options for Using Smarter Balanced Assessment

	Option 1: Administer the Smarter Balanced Assessment in full according to Smarter Balanced Specifications			Option 2: Use the Smarter Balanced items as the basis for a unique Florida State Assessment		
Year	Additional License Fee	Additional Printing	Additional Handscoring	Additional License Fee	Additional Printing	Additional Handscoring
1	($1,134,200)	$3,782,557	$14,296,873	$703,204	$0	$0
2	($1,134,200)	$2,739,093	$18,808,058	$703,204	$0	$0
3	($1,134,200)	$652,165	$20,636,400	$703,204	$0	$0
4	$1,950,824	$652,165	$21,948,636	$2,291,084	$0	$0
5	$1,451,776	$652,165	$22,457,169	$1,655,932	$0	$0
6	$952,728	$652,165	$22,872,596	$1,020,780	$0	$0
Total	$952,728	$9,130,310	$121,019,732	$7,077,408	-	-

	Option 1 Total	Option 2 Total
Total Additional Costs	$131,102,770	$7,077,408

3. Provide a price breakdown on adding new, unique forms. How many forms can we support with current items? Are the pre-classroom activities required when using Smarter Balanced items? If they are not done does it diminish the effectiveness of the Smarter Balanced items?

Number of forms supported

Either SAGE or Smarter Balanced pools will support multiple forms. The specific number of forms will depend on the blueprint and the overlap among forms. The most restricted pools will be found in ELA, where most items are associated with passages. Since passages must be assembled with items onto forms, ELA will have the smallest number of available forms. However, we expect that the smallest number of forms supported in any grade/subject would be about five, and some pools would support more than 10.

We assume that "unique" forms include sufficient overlap to support post-equating.

Price breakdown for adding new, unique forms

Utah has agreed to waive any additional fees for using multiple forms, and Smarter Balanced has indicated that they may reduce some of their fees if Florida uses a sufficient number of forms. Smarter Balanced fees include an item replacement charge because they will consider items over-exposed if used for all students in Florida; however, the exposure of any item is reduced when there are multiple forms. Smarter Balanced is willing to negotiate elimination of the item replacement fees if Florida uses enough forms to mitigate exposure concerns.

The prices in Exhibit 3-1 reflect the assumption that each form will be post-equated, and that only a single form will be used for accommodations and for the paper form in the online grades/subjects.

Exhibit 3-1: Price Breakdown for Each Additional Form

If the grade/subject is	The price for each additional form is	
	ELA/L	Math
Online	$98,422	$67,566
Paper	$118,404	$78,441

Are the pre-classroom activities required when using Smarter Balanced performance tasks

Smarter Balanced is requiring these activities when they administer their tests. The activities are designed not to cue the item, and are intended to avoid any content that might be tested in a related performance task. Hence, for example, classroom activities for math performance tasks are not supposed to teach math content. Instead, they are to familiarize the students with the context and related non-math vocabulary.

Simply put, nobody knows whether the classroom activities will affect student performance or comprehension of the tasks. The activities have been redesigned since the pilot test, and even there the data were quite sparse. This is a decision that Florida content experts and educators would have to make, and it would likely have to be based on expert judgment. Data will be available to help guide these decisions by fall 2014.

4. Provide a clarification of the makeup of items as priced. How much is Smarter Balanced and how much is Sage? Will Smarter Balanced alone be enough for state comparison? Please provide a price for using Smarter Balanced items instead of Sage items.

Provide a clarification of the makeup of items as priced

The makeup of items as priced in our original proposal includes the following:

- The license to use the Utah SAGE items for all years of census paper testing and for the first three years of online testing in each grade/subject and EOC assessment (By that point for each assessment. AIR will have developed sufficient items that Florida will have transitioned to a completely Florida-developed and Florida-owned assessment.)
- The license to administer the summative Smarter Balanced assessments to 4,000 students per grade/subject and EOC assessment during Year 1 to support a linking study.
- The license for the integration of the PISA items to link FSA to the PISA scale.

How much is Smarter Balanced and how much is SAGE?

Our proposal includes a bank made up of Smarter Balanced items or SAGE items. If Florida selects SAGE, we will include Smarter Balanced items in sufficient quantities to conduct a linking study, which will make it possible to compare the rigor of FSA standards to the rigor of Smarter Balanced standards. Under the SAGE scenario, the Smarter Balanced items would not contribute to students' FSA scores, but would be used in a linking study.

We interpret this question as addressing the cost of using SAGE versus Smarter Balanced items as the bank from which the initial FSA form would be pulled.

Exhibit 4-1 presents the license fees for Smarter Balanced and SAGE. The SAGE license fees are included in AIR's proposed fixed prices. These estimated license fees are based on using Smarter Balanced in the same manner as SAGE. For both Smarter Balanced and SAGE, the license fees for Years 4 through 6 are lower because Florida will have transitioned many grade/subjects to completely Florida-developed and Florida-owned items.

Exhibit 4-1: Estimated License Fees for Smarter Balanced and SAGE

Year	Smarter Balanced	SAGE
1	$7,820,000	$7,200,000
2	$7,820,000	$7,200,000
3	$7,820,000	$7,200,000
4	$4,020,000	$2,000,000
5	$2,660,000	$1,200,000
6	$1,300,000	$400,000
Total	$31,440,000	$25,200,000

The details behind these license fees are discussed below. Our response to Question 7 also discusses options for Florida to reduce these license fees.

In summary, Smarter Balanced items would increase license costs by $7,077,408, or approximately $1,000,000 per year. (This is the difference between Smarter Balanced and SAGE of $6,240,000 plus AIR's General and Administrative rate of 13.42%.).

Smarter Balanced

Smarter Balanced has agreed to license Smarter Balanced items for $6.20 per student, capped at 1 million students. Therefore, the total base license fee would be $6,200,000.

In additional to this base license fee, Smarter Balanced would also charge an additional fee of $1,200 per item used on a fixed form to address item exposure concerns. This will total approximately $1,620,000, estimating 50 items per form for each ELA/L and Math assessment plus 50 items for each of four forms for each EOC assessment, or a total of 1,350 items. If Florida adopted a design other than single fixed form per grade/subject that reduces exposure and security concerns, Smarter Balanced is willing to enter into good faith negotiations to reduce or eliminate this fee.

The total based on current design is approximately $7,820,000 for Years 1 through 3.

SAGE

The Utah State Office of Education (USOE) has agreed to license SAGE items to Florida for a license fee of $2.00 per student per subject for the purpose of this ITN. We contacted USOE after negotiations and they offered this license fee arrangement, which is less expensive and less restrictive than the arrangement included in our original Price Reply.

USOE recognizes that Florida may need to, or may unintentionally, release items. In this case, USOE has agreed to allow release of the items selected by Florida for a price of $5,000 per released item (intentional or otherwise) to reimburse USOE for the cost of replacing these items in the pool.

The total based on the current design is approximately $7,200,000 for Years 1 through 3.

Will Smarter Balanced alone be enough for state comparison?

Should the Department elect to license SAGE items, AIR can embed a sample of Smarter Balanced items (and PARCC items when available) in the embedded field-test slots in the base-year administrations that will allow the Department to link the FSA scale to the consortia assessments. We note that because the FSA blueprints will be modified somewhat from those used to administer the Smarter Balanced assessments, test scores between the two assessments cannot considered equated. Rather, test scores are considered to be linked, meaning that while test scores between the two assessments do not have the same meaning (they measure somewhat different constructs), the test scores do index a common level of ability so that two test scores can be said to index the same level of rigor. While Smarter Balanced will not allow test scores based on non-equated test administrations to be reported on the Smarter Balanced scale, the linkage will allow the Department to identify the location of the Smarter Balanced performance standards on the FSA, which the Department can use to adopt performance standards that are consistent with consortia standards and that can be used to facilitate state comparisons. We describe this approach in detail under Section 7.6.3.4 in the proposal and also in Question 13. As we noted in our plan, the statistical linkage to PARCC would have to await the completion of PARCC post-equating activities in spring 2015.

Strong linkages to the consortia scales can be established economically by embedding consortia items in the field-test slots. For each linkage, we recommend using an item set equivalent to an operational test administration to ensure that the linkage is based on a representative sample of the intended content domain. Embedding approximately 48 Smarter Balanced items in the EFT blocks of eight operational forms (assuming six-item EFT slots) administered to 4,000 students would allow us to estimate item parameters based on 500 students per item, which is sufficient to yield stable item parameters for linking to the Smarter Balanced scale.

If the Department licenses Smarter Balanced items to form the core of the FSA assessments for the base-year assessment instead of SAGE, linkages to the Smarter Balanced scale can be made directly from the operational test items and would not require additional linking items to be administered in the EFT slots. In all other respects, however, the strategy for facilitating state comparisons is the same. The linkage between the FSA and Smarter Balanced scales would allow the Department to identify the location of Smarter Balanced performance standards on the FSA scale, which will allow standard setting workshop panelists and the Department staff to adopt Florida performance standards that are consistent with the consortia adopted standards. As noted previously, AIR can also embed a sample of PARCC items in the embedded field-test slots of the Florida assessments to provide linkages to the PARCC scales, facilitating comparisons with states in both consortia.

Please provide a price for using Smarter Balanced items instead of Sage items.

Question 7 directly compares the prices for using Smarter Balanced items rather than SAGE items. There we describe two different alternatives. The first is to administer the Smarter Balanced assessment as designed by Smarter Balanced, and the second is to use the Smarter Balanced assessment items the same way that we proposed to use the SAGE items: to construct FSA assessments. We understand that Florida is more interested in the second option.

In this option (using AIR's design to use the Smarter Balanced or SAGE items pools to build a Florida-specific assessment) Florida can choose Smarter Balanced instead of SAGE for a difference of $7,077,408. (This is the additional Smarter Balanced fee of $6,240,000 plus AIR's General and Administrative rate of 13.42%.)

5. Clarify that the time for testing is the same (90 mins) even including the Smarter Balanced Items and whether it is adaptive or not.

We expect the reading/listening/language section of the ELA test and the mathematics test to take 90 minutes whether SAGE items or Smarter Balanced items are used. However, there are two reasons the FCAT might take more or possibly less time than the anticipated 90 minutes. The first reason is the final blueprint that FCAT will use and the second reason is the inclusion of performance tasks in the assessments.

Because the blueprint determines the number of items presented to the student and the number of items is directly linked to testing time, if the Florida reading/listening/language and mathematics assessment item count roughly equals the number of items on the SAGE operational blueprints (which is not atypical of the item counts per assessment found in most state blueprints), the assessment is projected to take 90 minutes.

Thus, an assessment with the following blueprint specifications will take approximately 90 minutes to administer:

- Fifty items (ELA) and sixty items (mathematics)
- A mix of multiple-choice items and machine-scored constructed-response items
- Ten field-test items per assessment

If Florida opts to include performance tasks on their writing and mathematics assessments, the total ELA or mathematics testing time will increase based on the number of performance tasks included. An ELA performance writing task that is similar to the SAGE writing tasks (which require students to read a series of selections prior to writing a response) can be anticipated to take approximately 45 to 50 minutes to administer. Adding an additional writing response so students will respond to two prompts will increase the writing assessment to 90 minutes. This assumes that one prompt requires a short response (of three to four paragraphs) and the other prompt requires a longer response (of five to six paragraphs).

The Utah SAGE bank does not include mathematics performance tasks but the Smarter Balanced item bank does. These performance tasks are expected to take between one and two and one-half hours to complete. A Florida operational assessment that is administered as a linear form or adaptive assessment will take the same amount of time regardless of the test format because in both cases the test blueprint must be met and the blueprint determines the number of items within content strands. In either an adaptive or a linear assessment, it is important to ensure that each student is administered an assessment that spans the standards included in the test blueprint and is exposed to the number of items per standard included in the blueprint for each standard. Thus, if the geometry strand should have a total of 10 items that span the geometry content standards taught at the grade level, an assessment, whether adaptive or linear, must contain 10 geometry standards. In both cases, the assessment is truly an assessment of the range of content knowledge the student has acquired during the year of instruction.

The difference between a blueprint-driven linear assessment and an adaptive assessment is not the number of items but the fact that with an adaptive assessment, the items presented to students can be more precisely selected to match the student's ability level, thereby allowing for a more precise estimate of a student's ability level.

6. Provide estimated licensing fees for use of items from other states.

In AIR's experience, states do not charge each other any licensing fees under item sharing agreements. The "payment" is the reciprocal sharing of items that allows each state to expand its item bank.

AIR has supported the following item sharing:

- Delaware, Oregon, Hawaii, and Utah have shared items for summative assessments.
- Delaware, Hawaii, and New Mexico have shared items for summative assessments for alternate assessments for students with disabilities.

To date, the states have shared several thousand items.

AIR has supported item sharing through two different methods:

1. Item sharing agreement between states. With permission from the participating states, we have attached the Delaware-Oregon-Hawaii item sharing agreement so Florida can review the provisions (see Attachment 1). Utah was added in 2013 via an amendment.
2. Contractual provisions. Other sharing arrangements have been negotiated as provisions within AIR's prime contracts. As an example, we have attached an amendment to AIR's contract with New Mexico that modifies the copyright clause to allow AIR to share New Mexico items with Delaware (see Attachment 2).

7. Ranking of the cost drivers:

a. Including paper based tests
b. Strategies for reducing costs
c. Writing prompts
d. Reduction in hand scoring
e. Include recommendations for other cost drivers/ ways to reduce costs

Exhibit 7-1 presents a summary of the cost options requested by the Department in these BAFO questions, plus some alternatives and recommendations from AIR.

The Department can choose any configuration of options, or none. If you choose the options we recommend, our total price will reduce by $24,715,666.

Exhibit 7-1: Summary of Cost Options

#	Option		Savings	Recommendation
1	Reduce or eliminate paper accommodation (5%, 4%, 3%, 2%, 1%)	4%	$3,468,776	
		3%	$6,937,552	
		2%	$10,406,328	
		1%	$13,875,104	✓
	100% selected response for the 5% paper; eliminate hand-scored TE-replacement items		$8,212,034	
2	Eliminate large print		$2,352,474	✓
3	Eliminate one-item-per-page (OIPP)		$902,888	✓
4	Use AIR's print-on-demand function to eliminate Reading Passage Booklets		$780,000	✓
5	Reducing Writing to three grades (3, 7, and 10)		$16,726,157	
6	Front-load item development, moving to a wholly Florida-developed test after first year online		$15,332,480	
7	Eliminate the second copy of color score reports		$6,805,200	✓
	Total Recommended Savings		$24,715,666	
	Maximum Possible Savings		$56,774,303	

Discussion of Options

1. AIR responded to Question 10, which addresses reducing the paper accommodation from 5% to 4%, 3%, 2%, and 1%.

   As an alternative, the Department might consider cutting costs by keeping the paper accommodation at the 5% ITN requirement and instead moving to a 100% selected-response test for these paper tests. This would not eliminate Writing in English Language Arts/Literacy (ELA/L); AIR would still retain the performance tasks in Writing to cover the full breadth and depth of the writing and research standards. This option would eliminate the cost of handscoring the approximately five items AIR proposed for each test to replace the technology-enhanced (TE) and/or machine-scored constructed-response (MSCR) items on the corresponding online assessment. AIR content experts would work with the Department to select replacement items.

2. AIR responded to Question 10, which addresses eliminating large print. Our system offers the large print on-screen function, as well as the large print print-on-demand function, which can eliminate the need for large print.

3. AIR responded to Question 10, which addresses eliminating the one-item-per-page (OIPP) accommodation. Our system offers the OIPP print-on-demand function, which can eliminate the need for OIPP to be printed and shipped.

4. AIR responded to Question 12, which describes how AIR's print-on-demand function can eliminate Reading Passage Booklets and support the paper accommodation reductions addressed in Question 10.

5. AIR responded to Question 23, which addresses reducing Writing to three grades.

6. The Department might consider a faster transition from the Student Assessment of Growth and Excellence (SAGE) or from the Smarter Balanced item bank to the Florida-owned item bank. AIR would still use the chosen item bank for paper testing and for the first year of online testing. AIR would front-load item development into Year 1 of the contract. We would recommend developing no more than three years of item development (225 items per assessment) in a single year, to enable the Department and committees to have sufficient review time. This would not change AIR's total item development cost, but we would need to move approximately $2 million from Years 2–5 into Year 1.

7. In the ITN, the Department requires two hard copies of the student report. In other states, we do not provide a second copy, and educators use AIR's online reporting system (ORS) to access student results. Data on the student report is available to educators in ORS and will follow the student over time.

8. Reconcile differences in price for scoring and reporting for ELA and Math grades 3–8. Also, scoring and reporting price for high school ELA and EOCs. Clarification: For the same number of grade levels why is ELA 3–8 $30 million more expensive than Math 3–8? Same issue for ELA 9–10 and EOCs.

Differences in Component Pricing

In AIR's individual Component A and B pricing in the original proposal, ELA Grades 3–8 ($129,595,191 over 6 years) was higher than Math Grades 3–8 ($105,611,149) for the following reasons.

- Item Development: $663,996 higher for ELA, primarily to account for the extra costs associated with passages. This includes both copyright expenses and costs associated with review of passages before item writing.
- Test Materials Printing and Distribution: $6,194,758 higher for Math because the ITN includes more full paper administrations of Math than ELA.
- Scan/Edit: $3,153,823 higher for ELA, primarily because ELA will be delivered in two separate testing windows, requiring two retrieval and scanning efforts.
- Handscoring: $26,479,255 higher for ELA, primarily because of the handscored Writing tasks on each assessment.

For high school assessments, the $17,109,799 variance between Component C ELA Grades 9–11 and Component D Math EOCs is almost entirely driven by the ELA handscoring of Writing tasks ($17,112,116). The other differences include

- higher item development costs for ELA due to passages;
- higher test administration costs for ELA driven by two testing windows; and
- higher test administration costs for Math EOCs driven by more administrations.

This information is summarized in Exhibit 8-1.

Exhibit 8-1: Price Differences Between ELA and Math (3–8 and High School/EOCs)

Original Prices and Variance	Grades 3–8	ELA 9–11 and EOCs
ELA	$129,595,191	$83,654,479
Math	$105,611,149	$66,544,680
Total Variance	**$23,984,042**	**$17,109,799**

Reconciliation of Variances	Grades 3–8	ELA 9–11 and EOCs
Item Development	$663,996	$424,068
Test Materials Printing and Distribution	($6,194,758)	
Storage of Test Materials	($118,274)	
Scan/Edit	$3,153,823	
Handscoring	$26,479,255	$17,112,116
Other Tasks		($426,385)
Total Variance	**$23,984,042**	**$17,109,799**

Differences in Prices Over Time

During negotiations, Florida also asked questions about AIR's price changes between Year 1 and Year 6.

- Overall, AIR's total price (Component E) decreases every year from $59,933,754 in Year 1 to $48,090,457 in Year 6.
- The total number of tests increases significantly. As shown in Exhibit 8-2, the ITN requires 16% more tests in Years 4–6 than in Year 1. While moving to computer from paper reduces costs, the increase in the total number of tests (and the associated handscoring) offsets some of the reductions. This may be obscured on the pricing sheets.

Exhibit 8-2: Number of Tests in ITN

Year	Year	Online	Paper	Total
1	2014–2015	2,741,609	1,198,823	3,940,432
2	2015–2016	3,606,830	847,283	4,454,113
3	2016–2017	4,112,254	439,034	4,551,288
4	2017–2018	4,372,252	228,981	4,601,234
5	2018–2019	4,372,252	228,981	4,601,234
6	2019–2020	4,372,252	228,981	4,601,234

Other Notes

AIR would like to note two items:

- AIR reaffirms that our proposed price on the Attachment 1b Deliverables Pricing Form covers all of the work of the ITN and our proposal. This includes meeting all of the

requirements of the ITN by delivering all of the tasks, activities, staffing, systems, and other supports described in our proposal.

- After calculating our total costs for the entire program (Component E), AIR did our best to complete each of the applicable 1,300+ prices for Components A–D. If Florida still has concerns with our attempt to match payments to specific line items or Components, we would be happy to review our assumptions and move payments to different lines.

9. Detail and explain text complexity—Lexile and other features of a text.

Both Smarter Balanced and Student Assessment of Growth and Excellence (SAGE) provide measures of text complexity for passages that include both quantitative and qualitative measures. Both classification schemes derive from the Common Core State Standards, and both are research-based. Both Smarter and SAGE define complexity separately for informational and literary text.

Exhibit 9-1 summarizes the qualitative dimensions used in each classification scheme. In addition, each ontology includes Lexile scores and other quantitative measures of readability.

Exhibit 9-1: Qualitative Dimensions Contributing to Passage Complexity by Testing Program

	Smarter Balanced	SAGE
Informational	Purpose	Levels of Purpose
	Text Structure	Structure
	Language Features	Language
	Knowledge Demands	
Literary	Meaning	Level of Meaning
	Text Structure	Structure
	Language Features	Language
	Knowledge Demands	

Both assessment systems use an ordinal scale to describe complexity on each qualitative dimension. Smarter Balanced uses a four-point scale ranging from "Slightly Complex" to "Exceedingly Complex," and SAGE uses a three-point scale (low, medium, and high).

The SAGE complexity scale offers definition of complexity along each of its three dimensions for each grade band, with the grade bands being defined as 3–4, 5–6, 7–8, and 9–11.

In SAGE, the levels of meaning and purpose, structure, and language are derived from the Common Core, and our review of quality research indicates that they all should contribute to passage difficulty. Below, we briefly summarize that research.

Levels of Meaning and Purpose

Less complex texts tend to have single, concrete purposes and main ideas. These texts require readers to make few inferences and generalizations. As texts become more complex, main ideas, themes, and purposes become more abstract and obscure. The author's intended meaning becomes less explicit, and readers must synthesize information and make inferences in order to understand the full meaning of a text. Research suggests that richer texts—those with more levels of meaning—are more difficult to understand (Fisher, Frey, & Lapp, 2012) and that more explicit clues to meaning reduce the difficulty (Britton, Holdredge, Curry, & Westbrook, 1979). Similarly, research shows that concrete passages are easier to comprehend and recall than abstract ones (Sadoski, Getz, & Fritz, 1993). Characterization also proves critical to a text's complexity. Comprehension becomes more challenging when readers have to interpret dialogue and draw inferences about characters' traits, motivations, and feelings (Gillioz, Gygax, & Tapiero, 2012; Long & De Ley, 2000).

Structure

The simplest texts have a simple structure. For example, a clear, consistent narrative and single point of view eases comprehension. When authors alter the structure and incorporate multiple points of view, particularly when they do so in complex ways that are not explicitly indicated for the reader, comprehension becomes more challenging. Research shows that as the number of narrators and shifts in perspective increase, comprehension becomes more difficult (Kucer, 2010). Conversely, readers more easily comprehend texts told in a linear fashion (Calisir & Gurel, 2003) and with a single perspective (Fisher et al., 2012). Tense and temporal cues also affect comprehension. Research suggests texts with time shifts and fewer cues about temporality are harder to understand and, consequently, more complex (Zwaan, 1999; Huggins & Adams, 1980).

Language

As vocabulary becomes more challenging so, too, does the text. More complex texts not only have less familiar vocabulary, but they also include words with multiple and abstract meanings. When analyzing authors' writing, these works often have purposefully ambiguous language and ironic tones. Research shows the strong correlation between vocabulary and comprehension. Specifically, as the amount of familiar vocabulary increases, comprehension increases (Schmitt, Jiang, & Grabe, 2011), and comprehension decreases in texts with unfamiliar, domain-specific, and archaic language (Fisher et al., 2012). Perhaps more important, research shows that readers who focus on the superficial meaning of words and phrases do not fully understand texts and miss the author's deeper intended meaning (Earthman, 1992). Consequently, their overall comprehension suffers.

Attachment 5 presents Smarter Balanced stimulus specifications. Attachment 6 presents the detailed complexity definitions used by SAGE.

10. Detail and separate costs for the line item for accommodation materials. Also, what would be the savings if Florida should go from 5%, to 4%, 3%, 2%, 1% for paper based assessments?

Exhibit 10-1 presents the costs for Braille, Large-Print and One-Item-per-Page (OIPP) accommodation materials. These costs are included within our fixed prices.

Exhibit 10-1: Braille, Large-Print, and OIPP Costs Included in AIR's Fixed Prices

Year	Braille	Large-Print	OIPP
1	$311,124	$312,892	$128,512
2	$439,837	$384,165	$145,857
3	$453,032	$395,689	$150,233
4	$466,623	$407,560	$154,740
5	$480,622	$419,787	$159,382
6	$495,040	$432,381	$164,164
Total	$2,646,277	$2,352,474	$902,888

AIR's Price Reply includes the 5% ITN requirement for paper accommodations for assessments delivered primarily online. Exhibit 10-2 presents the savings for reducing paper from the 5% ITN requirement in 1% increments.

Exhibit 10-2: Savings from Reducing Paper Accommodations

Year	5%	4%	3%	2%	1%
1		$375,223	$750,446	$1,125,669	$1,500,891
2		$502,356	$1,004,713	$1,507,069	$2,009,425
3		$561,533	$1,123,066	$1,684,600	$2,246,133
4		$658,887	$1,317,773	$1,976,660	$2,635,547
5		$678,156	$1,356,313	$2,034,469	$2,712,625
6		$692,621	$1,385,241	$2,077,862	$2,770,482
Total	N/A	$3,468,776	$6,937,552	$10,406,328	$13,875,104

11. What kinds of security are provided for the print on demand function? What is available?

The print-on-demand function is protected with security controls at three levels:

- Embedded security in the print-on-demand function
- Authentication, ensuring that only authorized users access information
- Policy and Test Administration procedures, ensuring secure materials are properly handled, retrieved, and tracked

Embedded Security

The print-on-demand function has the following security features:

- It requires that the student's request to print is approved (or denied) by the Test Administrator (TA) overseeing that testing session.
- Only a TA can print the request.
- Since TAs typically are not allowed to view test items, this feature restricts what they see through the print preview and the print output. All print requests have a cover page with a security warning, and each corresponding page has a header containing information about the student, the test, and the item. None of the test content is displayed on print preview.

In addition, the system collects and stores all information about the print request so data can be used for further tracking, analysis, and auditing purposes. Data collected on each page includes a unique identifier, identifiers on the item or passage, student information, test information, and timestamps. In other words, the system has the ability to track every document printed and conduct reconciliation processes between what was requested by the student and what was collected. Currently, as required in the ITN, AIR and DRC have proposed shipping and retrieving secure paper materials, such as the Reading Passage Booklets; we can leverage the same standard security procedures for the printed materials. Similar to these materials, these printed requests will be identified to each student and Test Administrator.

Last, this function is configurable so, at the Department's specification, it can be restricted in different ways or a combination thereof.

Authentication

The print-on-demand function can only be "turned on" for the student test by authorized users. At the Department's request, authorized users can be set up in the system based on roles, so that they only have access to information they can view. Authorized users can predetermine and set the print-on-demand function through the Test Information Distribution Engine (TIDE). In addition, if the Department chooses to empower TAs to turn this function on, AIR can set it up such that only *certified* TAs are authorized to do so. Certified TAs complete an online TA Certification/Training program, which includes signing a TA confidentiality form.

Policy and Test Administration Procedures

Ensuring secure materials are properly handled and discarded can be done through strict test administration procedures, such as:

- All secure test materials must be collected by the TA at the end of each testing session and stored in a secure location. Secure shipping and tracking procedures previously described can take place afterwards.
- Once an item or passage has been printed for a student, that item or items associated with the passage must be answered before pausing or exiting the test.

Finally, as noted above, AIR and DRC are prepared to track every page produced through the print-on-demand feature. We will collect and securely process each page and will include these items on the missing materials report.

12. How could the print on demand feature be used to reduce paper/pencil expenses?

The print-on-demand function has made it possible for Oregon to be 100% online and for Hawaii to only have 15 students with paper test accommodation. (These are incarcerated students who are not allowed to access computers.)

There are two ways to reduce paper-and-pencil expenses:

- The print-on-demand function can be used as an accommodation for students who cannot take online tests. This would allow the Department to achieve the savings identified in Question 10 by reducing the need for paper accommodations to below the 5% requirement. In these cases, the TA prints the items, the student responds to a multiple-choice or equation editor item type (for example), and, if necessary, a scribe enters the student response on behalf of the student.

- The print-on-demand function can also replace the production and shipping of the Reading Passage Booklets, which would save $130,000 per year. The function can be set up as a feature to be turned on for test passages specifically for students who require printed passages to take the test.

With this function, it is also worth noting other benefits:

- Florida can have a later test window (so more time for instruction can be given) because the booklets and answer documents no longer need to be shipped.
- Immediate test results are available (with machine-scorable tests).

13. Explain in more detail how cross state comparisons can be made. How to link to comparisons with other states? What are the options when comparing to other states?

The mechanism for linking Florida's reporting scales to those of Smarter Balanced (and PARCC, if desired) is straightforward. To link the Florida scales to the Smarter Balanced assessments, AIR will identify a set of linking items that satisfy blueprint specifications for an operational test administration. These items will be administered to Florida students via embedded field-test slots in the base year operational test forms as we describe in our response to question 4. Random assignment of EFT forms ensures that a simple random sample of students who are representative of the Florida student population will respond to each Smarter Balanced linking item. Parameter estimates for these items will be calibrated concurrently with the operational test items to place them on the Florida reporting scale. Because these items will also be calibrated on the Smarter Balanced scale, we can identify the linking constants necessary to represent the Florida banks on the Smarter Balanced scale. This same approach can be used to link the Florida assessments to other scales, including PARCC or even NAEP at the appropriate grade levels.

We must emphasize that if the test uses a different blueprint it can be linked, not equated, to the Smarter Balanced scale. Furthermore, Smarter Balanced will seek to prohibit the use of its scale if the test is not administered according to its specifications. By embedding items measuring the Smarter Balanced construct in the field-test slots of the FSA, we can establish a linkage, just as we might link to PISA or NAEP. Using a custom FSA blueprint, Florida will not be able to claim that (for example) score *x* on the FSA means the same thing as score *y* on Smarter Balanced; however, Florida will be able to support the claim that score *x* on the FSA represents the same level of rigor on the common core content as a score of *y* on the Smarter Balanced test. The difference is subtle, but it reflects the fact that the composition of the trait measured under different blueprints differs somewhat.

Nevertheless, the linkage allows the Department to identify the location of the Smarter Balanced, PARCC, or other performance standards on the Florida scale, thereby allowing the Department to compare the performance of Florida students to all states participating in the consortium assessments.

The question is how best to report comparisons with other states. Ideally, the Department will adopt performance standards that are informed by the performance standards adopted by the consortia. In this approach, and as described in detail in our plan for establishing performance standards, panelists participating in the standard setting workshops would be provided with contextual information about the location of consortia (and other) cut scores as part of their review of the ordered item books used for recommending performance standards. Panelists can then be instructed that, while they are not being asked to adopt or endorse an external standard, they should strive to identify cut score locations that are consistent with performance standards identified in the other systems. In this way, although the Florida standards will be uniquely Floridian, the location of important cut scores will be consistent with consortia standards, allowing meaningful comparisons of student achievement between Florida and other states. Moreover, this approach provides Florida with flexibility in terms of how to label and report student achievement. For example, should the consortia adopt performance standards that cannot realistically be implemented in practice, the Department, in conjunction with standard setting panelists, might establish an aspirational College and Career Ready standard consistent with the consortia standards, but differentiate that from a Minimally Proficient performance standard to be used for accountability purposes.

Alternatively, the Department could choose to identify the location of consortia cut scores on the Florida scale as part of their score reporting activities. This approach allows users to compare student performance against Smarter Balanced and PARCC (and other) standards directly, including state comparisons. While providing users with the contextual information directly might be appealing to some measurement experts, it risks making test score interpretation unnecessarily confusing to most users. Moreover, presentation of external benchmarks may undermine the value of state adopted performance standards.

14. Confirm that PARCC items are QTI format and that AIR can deliver them on AIR platform.

AIR understands that all PARCC items are to be in QTI format. PARCC's guidelines and every PARCC RFP have required development and delivery of PARCC items in QTI format. For example:

> "Once the item has been approved, the final version of the item will be transmitted to PARCC…. The item must be transmitted to PARCC as part of a PARCC APIP Content Package that includes:
>
> - "The item encoded in QTI with all associated media assets."
>
> Source: PARCC Item Development Technical Guide, V 0.65: public draft 20130912, page 3
>
> "All PARCC items developed under this contract must be encoded by the Contractor using QTI and APIP interoperability standards, and be HTML5 compliant without requiring self-contained scripts or external plug ins to render the items on common web browsers and across the range of PARCC supported computer devices (See PARCC Technology Guidelines for device specifications). The partnership is establishing a profile of QTI schemas, score response models, and APIP elements that will be acceptable for PARCC item development, with particular emphasis in the use of standard QTI models and PARCC-developed QTI extensions. Currently the use of other QTI custom interactions or portable custom interaction (PCI) models is discouraged within PARCC technical specifications."
>
> Source: RFP# 40-000-13-00027 for PARCC Operational Assessments, Page 47

AIR can deliver these on the AIR platform. AIR can deliver QTI items with perhaps the most complete implementation of the QTI response processing engine in the industry. QTI includes many different item types and capabilities, and the collection of these required by an assessment is called a *profile*. PARCC has not published its profile, but we can deliver all the QTI item types displayed on the PARCC sample item site. Should PARCC items include QTI features that we have not implemented, AIR commits to implementing these features within eight months after identifying the gap. We also note that our system is currently capable of delivering all of the accommodations that PARCC is promising for their operational test.

15. Confirm that AIR can deliver any items that are QTI formatted.

As discussed in our response to question 14, AIR can deliver QTI items with perhaps the most complete implementation of the QTI response processing engine in the industry. QTI includes many different item types and capabilities, and the collection of these required by an assessment is called a *profile*. PARCC has not published its profile, but we can deliver all the QTI item types displayed on the PARCC sample item site. Should PARCC items include QTI features that we have not implemented, AIR commits to implementing these features within eight months after identifying the gap.

16. Provide details of what school districts need to do and what assistance AIR would provide to help the districts in order to deliver the test.

a. Practice Tests
b. Diagnostics

What do schools need to do?

AIR's system imposes minimal demands on a school's technology or technology expertise. The steps that must be taken to prepare for testing include:

- Install the secure browser, which can be done using standard administration tools to push it out to entire schools or districts, or the browser can be installed by hand without requiring even administrative rights on the machine. In this way, the installation is simple for both the largest districts and the smallest charter school.
- Test the system to see that the connection can support the intended number of students. This is accomplished by invoking the secure browser on any machine in the lab, on the cart, or in the classroom, and pressing the diagnostic button.
- Train test administrators to administer the test. As we demonstrated during negotiations, this is a very simple process, and is supported by an online training course.
- Provide students time to familiarize themselves with the system by interacting with the practice test.
- Ensure that all students are enrolled in our Test Information Distribution Engine (TIDE), which can be accomplished through state, district, or school uploads.
- Administer the tests during the testing window.

Before the beginning of the school year, schools must install AIR's secure browser. The secure browser is simply a special build of the Mozilla (Firefox) browser that is modified to protect the security of the test and support certain accommodations.

The diagnostic system asks the user to indicate the number of students that they expect to simultaneously test, and the system does the rest, testing the bandwidth and calculating the peak simultaneous loads given the desired number of testers. The system reports back confirmation that bandwidth is adequate, or suggests a likely maximum number of students supported.

AIR will provide training for test administrators on how to set up a test session, modify test settings, and monitor participation in multi-opportunity testing. In addition, test administrators will learn how to reset and invalidate tests. We will also offer our Online Test Administrator Certification Course, which is self-paced and includes detailed instruction on creating and managing test sessions, monitoring student activity, setting accommodations, and implementing test security measures. The course is designed to familiarize test administrators with the student interface, the approval process, and the tools students will use during testing. To ensure that course-takers have learned the skills necessary to proctor tests using the new online system, each user must pass a quiz at the end of the course before being permitted to sign in to the online testing system. Users who need to refresh their memory of course content can retake the course as many times as needed.

AIR will provide online practice tests for all assessments prior to the opening of the test window. The online practice test site uses the same applications as the operational test site, such as the Test Administrator Interface, the Student Interface, and the test management reports. This design ensures that students, educators, and teachers become familiar with the online testing system before operational testing begins. Training will be provided for educators, school and district test administrators, and technology coordinators. Training will prepare educators to set up, pause, resume, and end live tests sessions; set accommodations; and use the same functionality as the operational test administrator site. In addition, user guides and systems documentation will be made available to help educators prepare for testing.

TIDE allows school, class, and other information to be uploaded by the state, districts, or schools. Authorized users can upload or enter student information, including demographics, required accommodations for each test, and student relationships to classes, schools, and other entities in the system. Our training on how to use TIDE will prepare schools and districts to register users in TIDE. This training includes instructions on how to add users at the district and school level so they can access appropriate online systems. The training also covers other TIDE functionality, including updating student test settings and setting test restrictions.

What training and assistance will AIR provide?

We propose to conduct up to 10 face-to-face onsite training workshops annually. Florida educators are invited to participate in onsite training, attending a comprehensive half-day session with breakout groups addressing different topics on the online testing system in an interactive manner. We are prepared to work with the Department to identify training locations throughout Florida on up to 10 dates chosen by the Department in the fall or winter preceding the first spring 2015 administration.

We also propose to provide two moderated webinar sessions and two online interactive sessions to prepare schools and districts for online testing and administering the test (see Training Phase 1 and Training Phase 2 on page 7.4-51 of Section 7.4.9.8 of our proposal). In addition, we will post the webinar sessions on the Department's information portal as webcasts, thus providing access to follow-up training throughout the year.

Exhibit 16-1 is a summary of AIR's training plan.

Exhibit 16-1: Training Resources and Support

What Schools Need to Do	Training Resources and Support	Quantity
Install the secure browser	Face-to-face training	Covered in 10 half-day workshops for up to 500 Florida educators, at up to 10 Florida locations
	User guide	Posted in PDF format on Florida's information portal
Test the system and check network performance	Diagnostic tool	
	Training on using the diagnostic tool	Included in the 10 half-day face-to-face workshops for installing the secure browser, at up to 10 Florida locations
	User guide	Posted in PDF format on Florida's information portal
Learn how to set up and administer the test	Face-to-face training	Included in the 10 half-day face-to-face workshops for installing the secure browser, at up to 10 Florida locations
	Webinar	One webinar will be recorded and posted as a webcast on Florida's information portal
	Online Test Administrator Certification Course	One self-paced, online interactive course to train test administrators
	Online interactive session	One 15-minute online interactive session will be posted on Florida's information portal
Interact with the practice test	Face-to-face training	Included in the 10 half-day face-to-face workshops for installing the secure browser, at up to 10 Florida locations
	Online practice test	
	User guide	Posted in PDF format on Florida's information portal
How to Use TIDE—Registering users and ensuring all students are enrolled in TIDE	Face-to-face training	Included in the 10 half-day face-to-face workshops for installing the secure browser, at up to 10 Florida locations
	Webinar	One webinar will be recorded and posted as a webcast on Florida's information portal
	Online interactive session	One 15-minute online interactive session will be posted on Florida's information portal
Administer the test	Help desk	

AIR will be pleased to schedule the planned training at any time of the Department's choosing.

Additional support will be provided by AIR's toll-free customer support line, chat service, and e-mail for state users, educators, and administrators Monday through Friday from 7 a.m. to 8:30 p.m. Eastern time. Our help desk operations are designed to provide

- flexibility to meet peak call times throughout the year;
- strategic monitoring of all help desk activity through daily, weekly, and monthly reports;
- a tiered-level approach to escalating and resolving each query quickly and efficiently;
- access to network engineers to answer technical questions and help troubleshoot problems; and
- consistent responses to multiple calls about the same issue by providing an electronic repository of FAQ documents, guides, manuals, and other resources that all Florida help desk agents will refer to. These documents will be developed in consultation with the Department.

17. What is included in management tools and confirm that all are included in the price?

All tools, schedules, reports, plans, and specifications identified in Section 7.7.6 of AIR's proposal are included in our price. The KnowledgeTree and secure FTP sites are included in the price as well.

Included among these management tools, AIR will provide the five types of reports identified in Section 7.7.6 of the ITN that are to be prepared to facilitate and document program management communications with the Department. These reports are as follows: (1) the Program Schedule, (2) the Weekly Management and Weekly Action Item Reports, (3) a Technical Report, (4) Annual Program Review, including the Operational Addendum, and (5) the Accounting Report.

18. Is the project schedule/calendar accessible to all? And what software is used? Provide more detail to the Master Schedule with major milestones.

AIR project management will work with the Department leadership to determine who at the Department should have access to the master program schedule and specific subset schedules generated from the program schedule. For example, the full program schedule could be viewable to project leadership while the mathematics content team only sees tasks assigned to those team members. AIR is accustomed to generating different reports or views of the master project schedule to best suit the needs of those working on the project. AIR would manage this access by posting the schedules on KnowledgeTree in folders that only particular user groups can access. We will define these groups with the Department in the initial stages of the project.

AIR uses Microsoft Project for the master program schedule and subset schedules. As required in the ITN, AIR will deliver the program schedule in Microsoft Excel. Additionally, AIR can share the source Project schedule file or a PDF version. AIR understands that the program schedule is developed annually and revised quarterly, or more frequently if required. In addition to the schedule, the Weekly Management Report and Action Item Report will report the status of recent and upcoming tasks.

Please see Attachment 3 for major project milestones and a master schedule.

19. In regard to the Risk Register, provide more information as to how the risks are identified and addressed, managed and monitored. What about shared risks?

a. Add detail about the knowledge tree.

AIR understands the need to analyze and monitor risks in all our programs. Managing risk begins with proactive planning to prevent and mitigate risks to all project elements before they can escalate into project issues.

It is critical that the risk management plan be vetted and completed as early in the project as possible.

AIR looks forward to working with the Department staff to complete and approve this process. In conjunction with the Department, an initial risk management plan defining all processes used in risk management will be developed and delivered to the Department within a mutually agreeable timeframe.

Because of the high stakes associated with this program, it is vital that schedules be monitored closely and that sufficient time be provided for reviews and production of materials.

High-stakes statewide assessment programs share many of the same risks; however, states differ on how to mitigate them. These risks are shared by the Department and AIR and can include changing legislation, a denial of copyright permission, a local security breach, inclement weather, or a departure of key staff members.

Even when the source of some risks rests with the Department, such as changing legislation, a hiring freeze, or a sudden departure of key team member, AIR shares these risks and the mitigation strategies. AIR will work closely with the Department to discuss and enact a mitigation strategy that keeps the project moving along the critical path.

AIR uses a risk register to identify, record, monitor, and manage risks. Typically, the risk register will be reviewed with the Department at each cycle kickoff meeting, as well as during weekly progress meetings throughout the life of the project. AIR will work with the Department's project leadership to agree on the frequency of sharing the risk and approach to raising and discussing risks.

A sample risk register format can be found in Appendix J of our proposal; however, we are accustomed to collaborating with our partners to design a document that best suits the needs of each project.

The risk register identifies and classifies project risks organized by function and area and summarizes proposed mitigation strategies. Often, when risks are identified and a remediation strategy is required, the topic is added to the program issues log for discussion at the weekly project meeting; however, AIR will work with the project leadership at the Department to determine the best approach to discussing these strategies.

On assessment projects at AIR, risk is discussed at every internal team meeting. All team members are encouraged to raise concerns that may cause the project to stray from its critical path. Often, the internal team meeting, which brings together leads from across each team for open communication, provides the forum to resolve concerns on the spot. In other cases, the risks raised by team members are evaluated by project leadership and added to the risk register.

AIR's project leadership encourages an environment in which any team member, regardless of role or responsibility, may identify a potential risk for cross-team discussion. All team members are encouraged to discuss risk. Ultimately, even if a team member's concern does not warrant an addition to the risk register, fostering this environment leads to terrific opportunities to engage all team members so that they are committed to providing timely, quality deliverables and superior service to the Department.

AIR's formal **Project Risk Management Process** includes:

- **Risk Management Planning**—Determine resource and time requirements and establish an agreed-on basis for evaluating program risks.
- **Identification of Risk**—Identify risks throughout the project life cycle and record them in the project's risk register. Methods for risk identification include brainstorming with project team members and other experts and interviewing experienced project participants and stakeholders.
- **Qualitative and Quantitative Risk Analysis**—Analyze which elements of the project, if compromised, would produce the greatest risk to successful completion of the project. Qualitative analysis ranks the identified risks for further action. Quantitative analysis determines the impact of a risk through numerical/statistical analysis; this is usually stated in terms of cost and/or schedule impact.
- **Risk Response Planning**—Respond to possible risks that have been identified. The responses may include contingency plans, ways to minimize the risk in certain areas, or ways to avoid a risk altogether.
- **Risk Monitoring and Control**—Monitor newly arising risks and keep track of identified risks; alert the project team to possible risks throughout the contract.
- **Leadership Reviews**—Monthly, AIR's senior leadership conduct project reviews to discuss the key issues and risks for each of our projects. Processes and solutions arising from individual projects are shared across teams for the benefit of all projects.

AIR's program managers understand that risk analysis is not optional, but rather a critical management process that will directly affect the success of the Florida project. By taking ownership of project risks and encouraging discussion of risks, AIR's Florida project team will ensure a well-run and high-quality program for the Department.

With regards to the risk register, each client differs on how often risks should be discussed and which team members should be part of these discussions. AIR will work with the Department to establish this protocol. AIR has found it helpful to leverage KnowledgeTree to govern access to certain key project documents.

For all project documentation and technical specifications, AIR uses KnowledgeTree, a web-based content management system. KnowledgeTree can help manage the project risks in several ways:

- Access Management is the ability to control read-only or read-and-write access to authorized users and roles at the document or folder level. This helps reduce project risk by ensuring that only authorized users can view (and/or write) documents.
- Version Control is the ability to manage proper versioning of all documents. This helps reduce project risk by ensuring that everyone is accessing the latest (and/or approved) changes.
- Workflow Management is the ability to manage lifecycles for types of documents. This helps reduce project risk by ensuring that specific documents follow a review and approval process.

20. In regard to scope changes: What type of change management system does AIR use and who can bring a scope change forward? Describe the change process.

AIR will work with the Department program leadership during the initial planning stages of the project to clearly identify and define any issues related to scope and price before work begins. This will include establishing roles, understanding responsibilities, outlining deliverables, identifying process requirements, and formalizing the project baseline. However, we recognize that program plans, objectives, and schedules will change during the life of a complex program and scope changes will need to be identified and managed; AIR has processes in place to ensure that changes are managed and controlled effectively.

Knowing that change requests will often come from the broader team members as they work to provide day-to-day project deliverables, AIR will establish with the Department the authorization process the Department requires before any change request is moved forward. When a change is requested AIR will analyze the impact associated with cost, schedule, and risk and then present the analysis to the Department staff identified to have approval authority. Only after authorization has been given will AIR move forward with implementation of a scope change.

We recognize that change *requests* will come from Department staff, AIR staff, and subcontractor staff; however, the process to log, evaluate, escalate, and *approve* requests will follow a standard process.

AIR's change management process is facilitated by four primary roles. Those roles and the typical order of their involvement in the process are as follows:

1. Change initiator
2. Change manager
3. Department authorization of change
4. Change implementation team

Change Initiator

Most often, team leads initiate scope change requests based on program implementation needs by completing a change request form and submitting it to the project director. Team members may originate requests but they are discussed with the appropriate team lead before an official change request is submitted. The project director may also initiate a scope change.

Change Manager

The project director acts as the change manager, facilitating the completion of change requests. He or she reviews the change request with the initiator to identify needed information and next steps, then he or she logs all change requests into the change control log and assigns a subject matter expert (SME) to analyze the impact of the change request on the scope/deliverables, schedule, budget, and overall project quality. The SME also determines and prioritizes the tasks that must be completed before the change is implemented.

As necessary, the project director communicates and coordinates with other personnel to gather information at this stage. For example, it is important to determine the resource dependencies and how resources will be allocated for the proposed change, so the project director may need to involve relevant staff managers.

Even a small change might include a high amount of risk. The SME analyzes the request and documents the impact, including the feasibility of making the change and any dependencies and risks associated with the change. In some instances it may be necessary to define the impact if the change is not made.

The project director will engage key stakeholders, including the Department, who are capable of ensuring that all changes are adequately assessed from both a contract and a technical perspective. Stakeholders may include technical project managers, senior software engineers, Help Desk managers, senior content developers, DRC staff, and quality assurance staff. Some requested changes will require input and guidance from the Florida Technical Advisory (TAC); AIR will ensure that the TAC is properly engaged on such issues.

Change Authorized by the Department

At this point, the requested change needs to be approved or rejected by the Department. AIR will provide the Department with implications regarding cost, schedule, quality, feasibility, and associated risks. AIR will not be implemented a change until the Department has confirmed and authorized the decision in writing. Whether the change is approved or rejected, the project director will update the change control log to reflect the updated status.

Change Implementation Team

The implementation team consists of the project director, project managers, team leads, and other affected parties.

The implementation team is responsible for identifying the project documentation that must be changed or updated to reflect the approved change, and for ensuring such changes are made and communicated to stakeholders in a timely fashion.

Most changes will require updates to the statement of work (SOW), change control log, and risk register. Additionally, in order to incorporate the changes to deliverables or completion dates, project schedules at all levels may need to be reviewed and updated. When a change has a financial impact, the SOW will be updated and an amendment will be executed with the Department. If the Department prefers to use a document other than an amendment AIR will work to establish process to accomplish that. Technical specifications, the test plans, the quality management plans—all may require updates.

Each document owner is responsible for ensuring that the changes are accurately drafted, reviewed, and accepted by each stakeholder, including the Department. As noted above, a change will not be implemented until the Department has signed off on the change in writing.

21. Integrated Math: Explain how items from an integrated math test will be used to create separate tests for each of the EOCs.

SAGE items were written to measure the Common Core State Standards. At the high school level, these items can be organized to measure an integrated math sequence or a more traditional math sequence. All high school math items align to individual Common Core State Standards, which closely align to the Florida Next Generation Sunshine State Standards.

The item specifications used to develop these items outline content limits for each standard. The items were not designed to individually integrate across domains; rather, each was designed to measure a standard within a domain. The content limits were generated based on the full range of content for each individual Common Core State Standard. The content covered in some standards could span multiple courses. Items measuring these standards were classified based on the type of content presented in the item. For example, items written to high school standard F.IF.2.4 have been classified based on the types of functions used. This will allow for the pool of items to be divided appropriately into those items assessing Algebra I content and those items assessing Algebra II content.

A portion of the item specification used for creating items aligned to A-CED.1.1 is shown in Exhibit 21-1. Notice how the content limits allow for all types of equations. Separate metadata are collected on each item capturing the content presented.

Exhibit 21-1: Portion of item specification used for creating items aligned to A-CED.1.1

Content Standard	CCSS.Algebra.Creating Equations CCSS.Math.Content.HSA.CED.A—Create equations that describe numbers or relationships. CCSS.Math.Content.HSA-CED.A.1—Create equations and inequalities in one variable and use them to solve problems. *Include equations arising from linear and quadratic functions, and simple rational and exponential functions*.
Content Limits	Limit 1: Linear and exponential equations with integer exponents. Limit 2: Quadratic equations. Limit 3: Any function including exponential functions with non-integer exponents, simple root functions and trigonometric functions.
Acceptable Response Mechanisms	Equation Response Graphic Response Multi-Select Table Match
Math Practice Cluster	PC1, PC2, PC3
DOK	1, 2, 3

The current SAGE pool of items most likely covers all of the content in each mathematics course. However, there are seven standards currently not represented in the pool.

Exhibit 21-2 shows the number of items for each Common Core State Standard that is currently available. It also shows the Florida course in which each standard is assessed. As these charts show, the bank includes items covering virtually all of the standards. Only 4 standards across all courses are missing. Items measuring these can be embedded for field-testing in the first year.

Exhibit 21-2: Number of items per standard for each course:

Algebra I

Common Core State Standard	Number of Items	FL Course
A-REI.10	6	FL Alg I
A-REI.12	24	FL Alg I
A-REI.5	5	FL Alg I
F-IF.1	9	FL Alg I
F-IF.2	16	FL Alg I
F-LE.1	8	FL Alg I
F-LE.3	7	FL Alg I
N-Q.1	14	FL Alg I
N-Q.3	1	FL Alg I
N-RN.3	14	FL Alg I
S-ID.1	6	FL Alg I
S-ID.2	6	FL Alg I
S-ID.3	4	FL Alg I
S-ID.3.8	0	FL Alg I
S-ID.5	1	FL Alg I
S-ID.7	3	FL Alg I
S-ID.9	1	FL Alg I

Algebra I and Algebra II

Common Core State Standard	Number of Items	FL Course
A-APR.1	32	FL Alg I & II
A-APR.3	7	FL Alg I & II
A-CED.1	12	FL Alg I & II
A-CED.2	40	FL Alg I & II
A-CED.3	10	FL Alg I & II
A-CED.4	12	FL Alg I & II
A-REI.1	2	FL Alg I & II
A-REI.11	7	FL Alg I & II
A-REI.3	45	FL Alg I & II
A-REI.4	44	FL Alg I & II
A-REI.6	47	FL Alg I & II
A-SSE.1	26	FL Alg I & II
A-SSE.2	22	FL Alg I & II
A-SSE.3	19	FL Alg I & II
F-BF.1	37	FL Alg I & II
F-BF.3	16	FL Alg I & II
F-IF.3	5	FL Alg I & II
F-IF.4	44	FL Alg I & II
F-IF.5	17	FL Alg I & II
F-IF.6	14	FL Alg I & II
F-IF.7	78	FL Alg I & II
F-IF.8	10	FL Alg I & II
F-IF.9	12	FL Alg I & II

22. Deleted by the Department.

23. Provide a pricing option that only provides writing items in three grade levels one in elementary, one in middle and one in high school.

The savings if Florida tested Writing at only Grades 3, 8, and 10 are shown in Exhibit 23-1.

Exhibit 23-1: Savings if Florida Tested Writing at Only Grades 3, 8, and 10

Year	Savings ($)
1	$4,081,497
2	$3,697,804
3	$2,837,542
4	$1,983,461
5	$2,042,048
6	$2,083,807
Total	**$16,726,157**

Keeping Writing at Grades 3 and 10 produces smaller savings than other grades, because Grade 3 is on paper longer and Grade 10 has a 100% human scoring and resolution. We would be happy to price the reductions for different grade combinations.

24. What is the cost for third party oversight? And how will AIR accomplish this. How will AIR choose and contract with a firm. What credentials will that firm be required to have.

The role of the third party is to provide independent review of AIR's technical work. In this capacity, it is important that the vendor maintain a credible independence from AIR influence. For this reason, we recommend that the Department take an active role in the selection of the vendor.

AIR offers the following structured process to facilitate the *selection*:

- AIR will produce a scope of work request for corporate capabilities from each of three outside companies.
- These materials will be provided to the Department for review and questions will be addressed by AIR.
- AIR will consult with the Department about the various options.
- The Department can either make the selection or provide direction to AIR.

AIR initially proposes that the Department evaluate the following three organizations, each having been selected based on comparable experience performing the tasks the Department will be requesting:

1. Buros Center for Testing
2. Assessment *and Evaluation Service* (AES)
3. Human Resources Research Organization (HumRRO)

These organizations are well respected; their existing staff have technical, statistical, and assessment process understanding and psychometric *credentials* in the assessment industry. They are capable of acting in the best interest of the Department while fulfilling their role, providing independent third-party oversight.

If the Department wishes to include another organization in the evaluation AIR will prepare materials for that organization as well.

AIR suggests review of the following processes and procedures; these costs are included in our BAFO:

- Scanning at DRC's center
- Essay and constructed response scoring at DRC's centers
- Review of Scaling and Equating
- Scoring reporting

The Department might wish to include an alignment study, which AIR has priced as a separate option.

AIR is open to either *contract directly* with the selected firm or follow a *contracting choice as directed by the Department*.

Our best and final price includes $200,000 per year to cover the cost of the third-party vendor.

25. Explanation of your review of student test results for testing irregularities at the student, testing group and school level. Include in your explanation how the analysis may be different computer and paper based assessments (similarities, erasures etc.). Is it the same analysis for both computer and paper based?

As the move toward online testing has accelerated, AIR has worked not only to automate a range of quality assurance procedures, but also to ensure that psychometricians and other assessment staff are able to act on that information in a timely fashion. To this end, we have developed a series of quality assurance reports that can be generated at any time during the online assessment window. The current suite of reports reflects priorities based on the assessment needs of existing and previous clients, but we continue to add new reports as the needs arise.

In Section 7.5.6.3, Checking Data for Anomalous Scores, we detail a suite of automated quality assurance reports that allow psychometricians to monitor the quality of online assessments and to identify possible irregularities in test administrations. Three reports are designed to alert assessment staff to possible testing irregularities: (1) analysis of performance change over time to detect unusually large gains in performance over time, (2) analysis of person fit to identify test administrations in which students are responding in uncharacteristic ways to test items (answering too many difficult items correctly given their ability), and (3) evaluation of response latencies to identify test administrations that are either unusually fast or slow and so may also indicate testing irregularities. In addition, we describe two procedures for detecting testing irregularities as part of our paper-based processes: response similarity and response change/mark discrimination. We have not yet implemented response change or response similarity reports into the online QA system for two reasons. First, to date most of the assessments we have delivered online are adaptive, which reduces significantly the possibility of students copying answers from one another, because students are being administered thousands of distinct test forms. Second, because students are administered unique test forms, even the possibility of investigating patterns of response similarity is eliminated. However, because the Department intends to continue administering fixed-form assessments in the online environment, we can readily adapt existing code to produce an additional QA report that examines response similarity for online assessments exactly as described for paper-based assessments.

In contrast, evaluation of response changes must necessarily be different between online and paper-based test administrations. For paper-based assessments, we use differences in mark density to infer student erasures, which is then used to identify instances where students may have changed an initial response from incorrect to correct, from incorrect to incorrect, or from correct to incorrect. A set of flagging rules is then used to identify an unusually large number of incorrect to correct erasures at the targeted level of analysis, whether student, testing group, or school. In the online environment, students may change their responses multiple times, and each of those response changes can be recorded. Unlike with the mark discrimination analyses, there is no ambiguity about which response was selected or the order in which responses were made. The ease with which response changes can be made, and the accuracy of response capture (i.e., students no longer need to worry that an “erased” response might result in the detection of multiple marks that either cannot be resolved or do not correspond to the student’s intended response), means that students may now feel freer to change responses, even multiple times for a single item. To illustrate, in the 2010 Ohio Achievement Assessments (grades 3–8), fewer than 10% of all answer documents across subject areas and grades contained a response with multiple marks, and the average number of response changes per assessment was 0.24. Response changes in paper-based assessments are thus rare. Conversely, in the grades 3–8 Hawaii HSA assessments administered online in spring 2011, response changes were made in more than 90% of test administrations across grades and subject areas, with an average of 5.27 response changes per test

administration. As these results indicate, response change behavior differs dramatically across mode of test administration.

Because we are still working to understand differences in response change behavior between online and paper test administrations, we have not yet incorporated analysis of response changes into our QA report system. At a minimum, different rules for flagging response changes between paper and online test administrations must be identified. However, we would be pleased to work with the Department and their TAC to identify and implement flagging rules for online response changes and implement them into the QA reporting system for future test administrations.

We also note that the automated QA reports derive from the database of record (DoR). This means that for tests administered online, evaluation of testing irregularities can be monitored regularly and routinely throughout the test administration window. For paper-based assessments, test records will not appear in the DoR until after answer documents have been scanned and results have been uploaded to the DoR following close of the test administration window.

There are, of course, some testing irregularity checks that can be performed only for tests administered online. For example, analysis of response latencies is limited to tests administered online. In addition, we monitor testing sessions that are open at unusual times of the day, which may also indicate irregularities in test administration procedures. These kinds of analyses are simply not possible with paper-based test administrations.

26. Compare and discuss the different costs for performance tasks if performance tasks are reduced from all grade levels to some grade levels, different levels and some grades, reduced from all to some.

Performance tasks impose a greater cost because they require hand scoring. We proposed hand-scored performance tasks only in English Language Arts (ELA). In question 23, we summarize the costs for reducing the writing performance tasks to a limited number of grades.

27. Regards to post equating, what would be the impact of the scheduling of test administration?

AIR can support all handscoring and post-equating and still meet all of milestone dates in the RFP. In fact, the majority of Florida students can still test later in the school year than the test windows in the ITN. However, we cannot move the test windows as late as our original proposal.

There are several conditions required for us to support post-equating:

- Approve an early return window for
  - a representative sample of 10% of tests delivered only on paper (grades 3 and 4 ELA/L and Math, and grade 8 Math in Year 1); and
  - a representative sample of 10% of tests delivered online and all students testing on paper in all online grade/subjects.
- Allow AIR and DRC to collect early return materials directly from the schools, rather than the districts. AIR and DRC will implement processes to protect schools and districts from accusations of missing materials.

Exhibit 27-1 presents a summary of the schedule from testing to reporting with post-equating.

Exhibit 27-1: Test Windows with Post-Equating

	ELA/L Paper Grade 3 and 4	ELA/L Online Grades 5–9, 11	ELA/L Online Grade 10	Math Online All Grades	Math Paper All Grades	EOCs
Testing Window (RFP)	3/2 to 3/13	3/2 to 3/13	3/2 to 3/13	3/2 to 3/13	3/2 to 3/13	4/7–4/24
Return Date for Early Return Sample	3/10	3/10	3/6	3/10	3/10	4/13
Window End Date (Paper)	3/13	3/13	3/6	3/13	3/13	4/13
Florida Could Choose to Leave the Online Testing Window Open until this Date for Everyone but the Early Return Sample		4/9	3/23	4/9		4/24
Primary QC Window (AIR, Department, and Independent Psychometric Contractor)	4/9–4/22	4/9–4/22	3/24–4/8	4/9–4/22	4/9–4/22	4/25–5/1
Final SDF	5/14	5/14	4/30	5/14	5/14	5/7
Scores in Online Reporting System	5/15	5/15	5/1	5/15	5/15	5/8
RFP Requirement	5/15	5/15	5/1	5/15	5/15	5/8

To integrating post-equating in the schedule implies that we must remove hand-scored items from the paper EOC tests. The 0–5% of students taking the EOC assessments on paper would need to receive a test that is entirely multiple choice and gridded response.

28. Please provide options for inclusion of PARCC and Smarter Balanced items over time and the costs of these options as well as any changes to testing time and types of items.

Our response to Question 2 includes details on costs to include Smarter Balanced items as the base item bank. Smarter Balanced's price for using the items alone is $6.20 per student, to which AIR would add our standard General and Administrative fees of 13.42%. If the items are used to establish linkage, and to check the linkage in later years, we suggest that 4,000 students per grade should be sufficient.

We are actively engaged with PARCC to obtain pricing for the use of their items. PARCC is currently working with their Governing Board to establish a pricing policy and administration guidelines for use outside of the PARCC consortium. Unfortunately, their price is not yet available. Please see the email from Laura Slover, CEO of PARCC, in Attachment 7.

As we discuss in earlier questions, the testing times are a function of the test blueprint, and should be similar regardless of whether the items to meet that blueprint come from SAGE, PARCC, or Smarter Balanced. If the consortium items are used for linking only, they will go in field-test slots, and therefore should not affect testing time, either.

As mentioned in Question 2, the Smarter Balanced items and all the PARCC items that are publicly viewable are subsets of the types of items found on SAGE. Students should not notice differences aside from minor stylistic ones.

Redacted Copy Question 29

Reply Number: ITN 2014-47

Title: Florida Standards Assessments

Respondent: American Institutes for Research

29. Discuss your processes to ensure student data integrity and student data loss prevention.

Redacted

Redacted

Redacted

6. Database of Record

Redacted

Backup

As described in our proposal, every system is backed up nightly.

This set of systems and processes is designed to provide complete data integrity and prevent loss of student data. Redundant systems at every point, real-time data integrity protection and checks, and well-considered real-time backup processes prevent loss of student data, even in the unlikely event of system failure.

Price Reply
Best and Final Offer
(BAFO)

Best and Final Price Reply

Attached please find:

- Completed Attachment 1: Summary Price Reply
- Completed Attachment 1b: Deliverables Pricing

AIR has made only two changes to our Price Reply:

1. Increased the budget for the Scaling, Equating, and Scoring (SES) subcontractor to $200,000 per year. We placed these additional costs in Line 1307, “Periodic: Performing SES Activities: Conducting All Scaling, Equating, and Scoring Activities As Laid out in the Specifications. ITN Reference 7.6.0, 7.6.1, and 7.6.2.”

2. Corrected an error in Line 1333, “Periodic: Development of Scale Linking Plan: Collecting Legal Opinion.” Our price in Component E was correct, but the prices in Components A–D were overstated significantly. AIR’s total price for Component E is $323,888,291.

In the responses to Best and Final Offer questions, AIR identifies possible savings totaling $56,774,303. We would be happy to revise these pricing forms to reflect any of the savings the Department selects.

Attachment 1
ITN 2014-47 Florida Standards Assessment

RESPONDENT : American Institutes for Research

We propose to provide the services being solicited for ITN 2014-47 Florida Standards Assessments. All work shall be performed in accordance with the specifications of this ITN, which has been reviewed and understood. **The below prices are all inclusive. Payment for services will be made based on the deliverables and dates specified. There shall be no additional costs charged for work performed under this ITN, unless changes are made during the negotiation phase.**

Respondents may submit bids on any individual assessment components (A, B, C or D), any group of assessment components, or to provide all assessment components (A, B, C and D). The prices on this sheet will be used for evaluation purposes. All accommodations and deliverable costs should be included in each component price. In addition, Respondents should complete the pricing per deliverable in SECTION 7.8, for each assessment component, which will be used for negotiation purposes and any resulting contract.

57	Test Development	Periodic: Interpretive Products: Test Item Specifications Documents	Test item specifications will be produced for all grades/subjects and may be grouped together in one booklet by grade band or content area. They are based on the standards and define both the content and the format of the test items. Their primary purpose is to establish guidelines for test item writers and reviewers. ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of each test item specification document. (2) Final PDF files provided via SFTP.	November 1, 2015	$35,812.00	$35,812.00	$35,812.00	$35,812.00	$59,687.00

Attachment 1b - DELIVERABLES PRICING

Specify Component A, B, C, D or E (A-D): _____A, B, C, D, and E_____

	A	B	C	D	E	F	G	H	I	J
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component A 3-8 ELA/L**	**Component B 3-8 Math**	**Component C 9-11 ELA/L**	**Component D EOC**	**Component E All Components**
58	Test Development	Periodic: ELA/L and Mathematics Sample Scoring Guides	The contractor will be expected to post electronic publications that provide information to help educators understand the scoring of constructed-response items included on student reports. These publications provide information about the test design, standards and benchmarks, item types, and how items are scored. They also provide scoring rubrics and the annotated papers used to train scorers for the constructed-response items. Each sample item from the scoring papers is displayed as it appeared on the test and responses for each score point, images of student responses, and annotations explaining why the response received a particular score are provided. ITN Reference 7.3.10	(1) Provide Department email reflecting approval of each scoring guide. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$31,444.00	$31,444.00	$15,722.00	$15,722.00	$67,380.00
59					2016	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$2,000.00

61					(Renewal 1 - 2018)	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$2,000.00
62					(Renewal 2 - 2019)	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$2,000.00
63					(Renewal 3 - 2020)	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$2,000.00
64	Test Development	Periodic: Understanding Florida's Assessment Reports	This publication describes the various reports of test results distributed to students, schools, and districts. An explanation and an image of each type of report are provided. The booklet also includes information about the test content areas and a glossary of technical terms. The contractor will deliver the electronic ADA-compliant PDF for posting to the DOE website so files can be posted to coincide with the first results delivery (RD1). ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of Understanding Florida's Assessment Reports. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$67,402.00	$67,402.00	$67,402.00	$67,402.00	$84,252.00
65					2016	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$2,000.00
66					2017	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$2,000.00
67					(Renewal 1 - 2018)	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$2,000.00
68					(Renewal 2 - 2019)	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$2,000.00
69					(Renewal 3 - 2020)	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$2,000.00
70	Test Development	Periodic: Test Design and Blueprint	The Test Design and Blueprint will clearly delineate the number of items, types and placement of items, time allotted for each test session, and location of field-test items for all grades and subjects. ITN Reference 7.3.1 and 7.3.2.1	(1) Provide Department email reflecting approval of Test Design and Blueprint (2) Appearance of completed schedule in weekly management report	June 1, 2015	$147,745.00	$147,745.00	$73,872.00	$73,872.00	$316,596.00
71	Test Development	Periodic: Content Item Review "Cleans"	After Content Item Review, the contractor, in conjunction with the Department, will conduct an editorial and content review of the items to ensure that changes have been applied correctly and that all editorial and content issues are corrected. ITN Reference 7.3.4.2	(1) Provide Department email reflecting completion of the “Cleans” process (2) Appearance of completed schedule in weekly management report	February 1, 2016	$3,956,087.00	$3,845,421.00	$1,985,716.00	$1,915,038.00	$11,472,807.00
72					February 1, 2017	$4,036,987.00	$3,926,321.00	$2,026,166.00	$1,955,488.00	$11,710,747.00
73					(Renewal 1 - February 1, 2018)	$2,137,072.00	$2,026,406.00	$1,076,209.00	$1,005,531.00	$6,122,763.00
74					(Renewal 2 - February 1, 2019)	$1,867,100.00	$1,756,434.00	$941,222.00	$870,544.00	$5,328,726.00
75					(Renewal 3 - February 1, 2020)	$1,584,816.00	$1,474,150.00	$800,081.00	$729,403.00	$4,498,480.00
76	Test Development	Periodic: Field Test Item Sets and Forms Review	Whether an embedded or stand-alone model is used, the contractor, in conjunction with the Department, will construct field-test forms. ITN Reference 7.3.5 and 7.3.6	(1) Provide Department email reflecting completion of the field test forms process (2) Appearance of completed schedule in weekly management report	May 1, 2015	$4,034,877.00	$3,924,211.00	$2,025,111.00	$1,954,433.00	$11,704,540.00
77					May 1, 2016	$32,066.00	$32,066.00	$16,033.00	$16,033.00	$89,906.00
78					(Renewal 1 - May 1, 2017)	$32,066.00	$32,066.00	$16,033.00	$16,033.00	$89,906.00
79					(Renewal 2 - May 1, 2018)	$32,066.00	$32,066.00	$16,033.00	$16,033.00	$89,906.00
80					(Renewal 3 - May 1, 2019)	$32,066.00	$32,066.00	$16,033.00	$16,033.00	$89,906.00

Attachment 1b - DELIVERABLES PRICING

Specify Component A, B, C, D or E (A-D): _____A, B, C, D, and E_____

	A	B	C	D	E	F	G	H	I	J

87	Test Development	Periodic: Item Development Plan	To ensure the quality and number of items/passages developed is sufficient to create future operational test forms, the contractor will submit an item development plan delineating the number and types of items to be developed. ITN Reference 7.3.0	1) Provide Department email reflecting completion of the Item Development Plan. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$23,304.00	$23,304.00	$11,652.00	$11,652.00	$49,938.00
88					December 1, 2016	$23,304.00	$23,304.00	$11,652.00	$11,652.00	$49,938.00
89					(Renewal 1 - December 1, 2017)	$23,304.00	$23,304.00	$11,652.00	$11,652.00	$49,938.00
90					(Renewal 2 - December 1, 2018)	$23,304.00	$23,304.00	$11,652.00	$11,652.00	$49,938.00
91	Test Development	Periodic: Item Writer Training	The contractor must identify and recruit a sufficient number of highly-qualified writers for passages and items to ensure variety and quality of development. The contractor, in conjunction with the Department, will conduct an annual training session for all Item Writers. ITN Reference 7.3.3	1) Provide Department email reflecting completion of Item Writer Training. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$19,359.00	$19,359.00	$9,679.00	$9,679.00	$41,483.00
92					December 1, 2016	$9,109.00	$9,109.00	$4,555.00	$4,555.00	$19,520.00
93					(Renewal 1 - December 1, 2017)	$9,109.00	$9,109.00	$4,555.00	$4,555.00	$19,520.00
94					(Renewal 2 - December 1, 2018)	$9,109.00	$9,109.00	$4,555.00	$4,555.00	$19,520.00
95	Test Development	Periodic: Meetings with Educators	The contractor is responsible for organizing and convening meetings for the purpose of reviewing assessment items and otherwise supporting the assessment program. These meetings are referenced in the ITN in 7.3.4 and 7.7.7. This deliverable includes the cost of preparing for and administering the meeting, but it does not include the cost of travel for meeting participants, which is covered as a reimbursable category in 7.7.9.	(1) Include support for all meetings since the previous invoice. (2) Provide the meeting costs, a final agenda, and a final list of attendees for each meeting.	(Dates to be negotiated.) 2015	$111,390.00	$111,390.00	$55,695.00	$55,695.00	$278,476.00

403	Test Administration	PERIODIC: Develop and deliver approved practice tests and tutorials for the computer-based and paper-based assessments (sample test materials and computer-based practice tests).	According to production schedules, all practice materials must be developed and approved on a timeline to be established that offers students enough time to practice prior to each administration. All practice tests (computer-based and paper-based) must contain 10-20 sample items. For the paper-based practice materials, there should be a separate test booklet and a separate answer key booklet for teachers. These paper-based practice materials are produced in ADA-compliant PDF files for posting. Practice materials must also be produced for all accommodated versions (computer-based accommodations and paper-based accommodations, such as braille and large print). ITN Reference 7.3.7.5 and 7.4.9.6	(1) Provide Department email reflecting approval of the practice tests and tutorials that reflect the requirements for each year of the assessment. For year 1 of the contract, this will be PDFs for all grades and subjects, and computer-based practice tests for all grades and subjects that will be offered as computer-based subjects the first year. As grades and subjects are added each year (per the schedule in Appendix A), the appropriate computer-based practice tests must also be released. This delivery includes the annual delivery of requested paper-based accommodated versions, which are the only versions that are shipped to districts. (All others are published or linked for distribution.)	November 2014	$63,181.00	$63,181.00	$31,591.00	$31,591.00	$121,502.00

700	Scoring and Reporting	Fall EOC: Early district and full-state scan/edit and CBT extract data files: Development of the file layouts, scan/edit and CBT extract data files	The contractor will work with the Department to develop the layouts for scan/edit and CBT extract data files. For each administration, the contractor unpacks and scans the documents to be scored and provides the scan files by grades for ELA/L and Mathematics and by subject for EOC. The Edited scanned data are loaded to online management system with the extracts for any CBT data. Additional processing is performed to resolve PreID data with gridded data, invoke any defaults necessary, and make some transformations for final scoring and creation of the State Student Results file during the editing process. ITN References 7.5.3, 7.5.6.2, and 7.5.6.4	(1) Final approved file layouts, early/full state scan/edit, and CBT extract data files, posted to online management system and SFTP. (2) Provide Department email reflecting receipt and approval of the file layouts and data files.	October 2015	$0.00	$0.00	$0.00	$103,694.00	$103,694.00

1242					(Renewal 3 - April 2020)	$0.00	$0.00	$1,000.00	$0.00	$1,000.00
1243	Scoring and Reporting	Spring ELA/L and Mathematics: Manual Rescore Log: Development of the log to record the PBT test with passing scores for manual rescoring.	The contractor will create a log to identify students who qualified for manual rescoring and provide this log to the Department. The log will follow the requirements specified in the SR Specification. ITN Reference 7.5.6.5	(1) Manual rescore log posted to the online management system. (2) Provide Department email reflecting receipt of log.	April 2015	$2,000.00	$2,000.00	$1,000.00	$0.00	$4,000.00
1244					April 2016	$1,000.00	$1,000.00	$1,000.00	$0.00	$1,000.00
1245					April 2017	$1,000.00	$1,000.00	$1,000.00	$0.00	$1,000.00
1246					(Renewal 1 - April 2018)	$1,000.00	$1,000.00	$1,000.00	$0.00	$1,000.00
1247					(Renewal 2 - April 2019)	$1,000.00	$1,000.00	$1,000.00	$0.00	$1,000.00
1248					(Renewal 3 - April 2020)	$1,000.00	$1,000.00	$1,000.00	$0.00	$1,000.00
1249	Scoring and Reporting	Fall EOC: Manual Rescore Log: Development of the log to record the PBT test with passing scores for manual rescoring.	The contractor will create a log to identify students who qualified for manual rescoring and provide this log to the Department. The log will follow the requirements specified in the SR Specification. ITN Reference 7.5.6.5	(1) Manual rescore log posted to the online management system. (2) Provide Department email reflecting receipt of log.	October 2015	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1250					October 2016	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1251					(Renewal 1 - October 2017)	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1252					(Renewal 2 - October 2018)	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1253					(Renewal 3 - October 2019)	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1254	Scoring and Reporting	Winter EOC: Manual Rescore Log: Development of the log to record the PBT test with passing scores for manual rescoring.	The contractor will create a log to identify students who qualified for manual rescoring and provide this log to the Department. The log will follow the requirements specified in the SR Specification. ITN Reference 7.5.6.5	(1) Manual rescore log posted to the online management system. (2) Provide Department email reflecting receipt of log.	December 2015	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1255					December 2016	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1256					(Renewal 1 - December 2017)	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1257					(Renewal 2 - December 2018)	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1258					(Renewal 3 - December 2019)	$0.00	$0.00	$0.00	$1,000.00	$1,000.00

Attachment 1b - DELIVERABLES PRICING

Specify Component A, B, C, D or E (A-D): _____A, B, C, D, and E_____

	A	B	C	D	E	F	G	H	I	J
1	**Deliverable Category**	**Contractor Deliverable**	**Deliverable Description**	**Evidence of Completion**	**Due Date(s)**	**Component A 3-8 ELA/L**	**Component B 3-8 Math**	**Component C 9-11 ELA/L**	**Component D EOC**	**Component E All Components**
1259	Scoring and Reporting	Spring EOC: Manual Rescore Log: Development of the log to record the PBT test with passing scores for manual rescoring.	The contractor will create a log to identify students who qualified for manual rescoring and provide this log to the Department. The log will follow the requirements specified in the SR Specification. ITN Reference 7.5.6.5	(1) Manual rescore log posted to the online management system. (2) Provide Department email reflecting receipt of log.	April 2015	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1260					April 2016	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1261					April 2017	$0.00	$0.00	$0.00	$1,000.00	$1,000.00

1264					(Renewal 3 - April 2020)	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1265	Scoring and Reporting	Summer EOC: Manual Rescore Log: Development of the log to record the PBT test with passing scores for manual rescoring.	The contractor will create a log to identify students who qualified for manual rescoring and provide this log to the Department. The log will follow the requirements specified in the SR Specification. ITN Reference 7.5.6.5	(1) Manual rescore log posted to the online management system. (2) Provide Department email reflecting receipt of log.	July 2015	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1266					July 2016	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1267					July 2017	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1268					(Renewal 1 - July 2018)	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1269					(Renewal 2 - July 2019)	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1270					(Renewal 3 - July 2020)	$0.00	$0.00	$0.00	$1,000.00	$1,000.00
1271	Scoring and Reporting	Periodic: Writing Image CD/DVD or jump drives and proof to delivery: Development of the Writing Image CD/DVD or jump drives.	The contractor will create and ship Writing images for all students who submitted a folder to be scored and ship these CDs to the districts with one CD/DVD or jump drives for each grade tested. The contractor will submit proof of delivery to the Department after all of the Writing Image CD/DVD or jump drives are delivered to districts. ITN Reference 7.5.5	1) Provide Department email reflecting receipt and approval of the sample CD/DVD or jump drives. (2) Provide proof of delivery spreadsheet listing the following for each shipment: date/time delivered, who received materials, destination address, quantity and type of material delivered. Must show proof of successful delivery to all participating districts.	July 2015	$28,620.00	$28,620.00	$12,266.00	$12,266.00	$40,886.00
1272					July 2016	$28,620.00	$28,620.00	$12,266.00	$12,266.00	$40,886.00
1273					July 2017	$28,620.00	$28,620.00	$12,266.00	$12,266.00	$40,886.00
1274					(Renewal 1 - July 2018)	$28,620.00	$28,620.00	$12,266.00	$12,266.00	$40,886.00
1275					(Renewal 2 - July 2019)	$28,620.00	$28,620.00	$12,266.00	$12,266.00	$40,886.00
1276					(Renewal 3 - July 2020)	$28,620.00	$28,620.00	$12,266.00	$12,266.00	$40,886.00
1277	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Test Construction Specifications	The Contractor will deliver Test Construction Specifications for ELA/Literacy and Mathematics, Algebra 1, Algebra 2, Geometry, and Retake Assessments. The final specifications shall be evaluated and approved by the Department. To the extent possible, the Department expects to be involved in any test construction activities for 2015 assessments still to be completed after contract execution. ITN Reference 7.6.0, 7.6.1, and 7.6.2	(1) Test Construction Specifications are secure, and therefore the Contractor shall provide a report which indicates the completed status of Specifications posted to Secure File Transfer Protocol (SFTP). (2) Provide Department email reflecting receipt and approval of the Test Construction Specifications.	May 2014	$96,473.00	$96,473.00	$41,346.00	$41,346.00	$137,819.00
1278					May 2015	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$5,000.00
1279					May 2016	$0.00	$0.00	$0.00	$0.00	$0.00
1280					(Renewal 1 - May 2017)	$0.00	$0.00	$0.00	$0.00	$0.00
1281					(Renewal 2 - May 2018)	$0.00	$0.00	$0.00	$0.00	$0.00
1282					(Renewal 3 - May 2019)	$0.00	$0.00	$0.00	$0.00	$0.00
1283	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Test Forms for Field Test and/or Operational Administrations	All paper-based and computer-based forms for the tests, as agreed upon by the Department and memorialized in the approved Test Construction Specifications, must be submitted and approved. ITN Reference 7.6.0 and 7.6.1	(1) Test forms are secure, and therefore the contractor shall post them to SFTP. The Department shall maintain a copy of the materials on file as needed for evidence of completion of the deliverable. (2) Provide Department email reflecting receipt and approval of the final paper-based and computer-based forms.	July 2014	$39,726.00	$39,726.00	$59,589.00	$79,452.00	$218,492.00
1284					July 2015	$39,726.00	$39,726.00	$59,589.00	$79,452.00	$218,492.00
1285					July 2016	$39,726.00	$39,726.00	$59,589.00	$79,452.00	$218,492.00
1286					(Renewal 1 - July 2017)	$39,726.00	$39,726.00	$59,589.00	$79,452.00	$218,492.00
1287					(Renewal 2 - July 2018)	$39,726.00	$39,726.00	$59,589.00	$79,452.00	$218,492.00
1288					(Renewal 3 - July 2019)	$39,726.00	$39,726.00	$59,589.00	$79,452.00	$218,492.00
1289	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of the Sampling Plans	Detailed plan for sampling of students from the State. Sampling plan must describe the initial analyses on the SSR files, introducing plans for how to collect data, and the list of post-hoc analyses for representativeness checks when data	(1) Final versions of sampling plans posted to SFTP. (2) Provide Department email reflecting receipt and approval of the sampling plans.	July 2014	$6,000.00	$6,000.00	$6,000.00	$6,000.00	$14,911.00
1290					July 2015	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$5,000.00
1291					July 2016	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$5,000.00

1337	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Standard Setting Work Plan	Prepare a Standard Setting Work plan for setting achievement level standards for ELA/Literacy, Mathematics, Algebra 1 &2, and Geometry assessments. Plan must include every detail of the methodology, internal and external data files, and the timeline for all of the activities during educator and reactor panel meetings. The Plan must be vetted by TAC members and the methodology must be approved by the department. ITN Reference 7.6.3.4	(1) Submit the final version of Standard Setting Work Plan and relevant materials, such as slides (secure materials), posted to SFTP. (2) Provide Department email reflecting receipt and approval of the documents.	January 2015	$2,000.00	$2,000.00	$2,000.00	$2,000.00	$2,000.00
1338	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Implement Achievement Level Standard Setting Meetings	Hold the required meetings and collect recommended cut scores from all relevant groups, as described in ITN Reference 7.6.3.4	(1) Submit the initial version of the Standard Setting Technical Report (secure file), including recommended cuts and impact data, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	October 2015	$161,561.00	$161,561.00	$115,401.00	$115,401.00	$230,802.00
1339	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Finalizing Standard Setting Technical Report	Preparing Technical Reports, as described in section 7.6.3.4. Collecting Feedback from the Department and Technical Advisory Committee (TAC), finalizing the reports after incorporating the feedback, and submitting the final versions of the reports to the Department. ITN Reference 7.6.3.4	(1) Submit the final version of the Standard Setting Technical Report (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the technical report and excel tables with interactive impact data and graphs.	November 2015	$30,761.00	$30,761.00	$30,761.00	$30,761.00	$34,179.00
1340	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Vertical Scaling Specifications	Preparing a detailed plan for conducting all vertical scaling procedures. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.5 The plan must be vetted by TAC members. ITN Reference 7.6.3.5 (Repeated in contract renewal)	(1) Post the plan for Vertical Scaling (secure file) via SFTP. (2) Provide Department email reflecting receipt and approval of the Vertical Specifications.	November 2014	$9,000.00	$9,000.00	$0.00	$0.00	$10,000.00
1341					(Renewal 1 - November 2017)	$5,000.00	$5,000.00	$0.00	$0.00	$5,000.00
1342	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Vertical Scaling Activities and Preparing Technical Report	Conducting all scaling and equating, and scoring activities as laid out in the specifications. ITN Reference 7.6.3.5 (Repeated in contract renewal)	(1) Submit Final Technical Report and Scored SSR Files (secure files), including vertically aligned scale scores, to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2015	$18,407.00	$18,407.00	$0.00	$0.00	$20,452.00
1343					(Renewal 2 - August 2018)	$5,000.00	$5,000.00	$0.00	$0.00	$5,000.00
1344	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Scale Drift Study Specifications	Preparing a detailed plan for conducting scale drift study. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.6	(1) Submit the plan for conducting the scale drift study (secure) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the scale drift study specifications.	(Renewal 1 - July 2017)	$17,819.00	$17,819.00	$17,819.00	$17,819.00	$19,799.00

			The plan must be vetted by TAC members. ITN Reference 7.6.3.6			$0.00	$0.00	$0.00	$0.00	$0.00
1345										
1346	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Scale Drift Research and Preparing Technical Report	Conducting all scaling and equating, and scoring activities as laid out in the specifications. ITN Reference 7.6.3.6	(1) Submit Final Technical Report and rescaled item parameters (secure files) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	(Renewal 2 - August 2018)	$45,291.00	$45,291.00	$45,291.00	$45,291.00	$50,323.00
						$0.00	$0.00	$0.00	$0.00	$0.00
1347										
1348	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of Specifications for Comparability Between Devices Delivering Assessments	Preparing a detailed plan for conducting comparability study. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.7 The plan must be vetted by TAC members. The plan should include the degree of comparability of item-level and test-level statistics across devices. The plan should include the degree of comparability of item-level and test-level statistics across various input types. For the questions above, the plan should address to what degree of comparability can be obtained through scaling items onto a single metric, linking or concordance. The plan should also include what interactions exist among device, input type and item/task characteristics, grade, subject, and relevant student characteristics. ITN Reference 7.6.3.6.1	(1) Submit the plan for conducting the comparability study (secure file) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the study specifications.	November 2014	$5,400.00	$5,400.00	$5,400.00	$5,400.00	$6,000.00
						$0.00	$0.00	$0.00	$0.00	$0.00
1349										
1350	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Performing Study for Comparability Between Devices Delivering Assessments, Preparing its Final Report, and Recommendations with TAC Committee	Conducting all of the planned analyses, preparing its technical report, and sharing the findings and recommendations with TAC members. ITN Reference 7.6.3.6.1	(1) Submit Final Report and Recommendations to the Department. These materials are secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2015	$29,752.00	$29,752.00	$29,752.00	$29,752.00	$33,058.00
						$0.00	$0.00	$0.00	$0.00	$0.00
1351										
1352	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of a study plan for linking Florida Standards Assessments to other assessments measuring the same standards	Preparing a detailed plan for conducting the linking study. The plan should include a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.8 The plan must be vetted by TAC members.	(1) The plan for conducting comparability study is secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the study specifications.	November 2015	$900.00	$900.00	$900.00	$900.00	$1,000.00

Attachment 1b - DELIVERABLES PRICING

Specify Component A, B, C, D or E (A-D): _____A, B, C, D, and E_____

	A	B	C	D	E	F	G	H	I	J

1353			The plan should include a review of the most promising and most feasible methods in linking, discuss the technical feasibility of such methods, and explain the process of establishing the linking relationship(s) in detail. ITN Reference 7.6.3.6.2			$0.00	$0.00	$0.00	$0.00	$0.00
1354	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Florida Standards Assessments to other assessments	Conducting all of the planned analyses, preparing a final technical report, and sharing the results of linked relationships with TAC committee to discuss the validity of interpretations. ITN Reference 7.6.3.6.2	(1) Submit Final Report and Recommendations (secure files) to the Department via SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2016	$9,868.00	$9,868.00	$9,868.00	$9,868.00	$10,964.00
1355						$0.00	$0.00	$0.00	$0.00	$0.00
1356	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Development of a study plan for the linking Florida Standards Assessments to International Assessments	The Contractor's plan will include, review of the most promising and most feasible methods likely to be used in international linking, discuss the technical feasibility of each method given the nature and design of the Florida Standards Assessments and those of international assessments such as PISA and TIMSS, propose method(s) for linking the scales of assessments, propose alternative ways for collecting data, explain the process of establishing the linking relationship(s) in detail, and provide a comprehensive and detailed timeline for all tasks and events, as described in section 7.6.3.9. The contractor will share the report with the Department and its TAC members. Upon approval from the Department, the contractor will finalize the plan for the linking. ITN Reference 7.6.3.6.3	(1) The plan for conducting the linking study is secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the study specifications.	November 2015	$900.00	$900.00	$900.00	$900.00	$1,000.00
1357						$0.00	$0.00	$0.00	$0.00	$0.00
1358	Scaling, Equating, Scoring, and Special Psychometric Studies	Periodic: Linking Florida Standards Assessments to International Assessments	Conducting all of the planned analyses, preparing a final technical report, and sharing the results of linked relationships with TAC committee to discuss the validity of interpretations. ITN Reference 7.6.3.6.3	(1) Submit Final Report and Recommendations to the Department. These materials are secure, and therefore contractor shall post them to SFTP. (2) Provide Department email reflecting receipt and approval of the documents and files.	August 2016	$900.00	$900.00	$900.00	$900.00	$1,000.00
1359						$0.00	$0.00	$0.00	$0.00	$0.00
1360	Program Management	Periodic: Production Schedule	The production schedule shows the Department's beginning and ending review dates by test document for each review round. ITN Reference 7.7.2	(1) Appearance of schedule in weekly management report (2) Provide Department email reflecting approval of proposed or revised production schedule.	April 15, 2014	$66,198.00	$66,198.00	$47,285.00	$47,285.00	$94,569.00
1361					April 15, 2015	$27,930.00	$27,930.00	$19,950.00	$19,950.00	$39,900.00

Attachment 1:
Item Sharing Agreement

FORM OF LICENSE AGREEMENT

This Copyright License Agreement (the "Agreement") is effective as of 30th day of June, 2010, by and between the Delaware Department of Education (hereinafter "DDOE"), the Hawaii Department of Education (hereinafter "HIDOE"), and the Oregon Department of Education (hereinafter "ODE"). DDOE, HIDOE, and ODE may be referred to individually as a "Party" and collectively as the "Parties."

WITNESSETH:

WHEREAS, each Party desires to enter into an agreement with all other Parties to share the copyrighted materials listed in Schedules A, B, and C (collectively the "Licensed Materials") in order to increase the depth and breadth of each Party's state assessment test item pool, and each Party is willing to enter into such an agreement with all Parties on the terms and conditions hereafter stated.

NOW, THEREFORE, in consideration of the mutual covenants herein and other good and valuable consideration, receipt of which is hereby acknowledged, the Parties agree as follows:

1. Definitions.
"Originating Party" shall mean a Party to this Agreement acting in the role of providing Licensed Materials to other Parties under the terms of this Agreement.

"Recipient Party" shall mean a Party to this Agreement acting in the role of receiving Licensed Materials from other Parties under the terms of this Agreement.

"Test Items" shall mean any state assessment test questions and prompts, including but not limited to response options, scoring rubrics, graphics, passages, and translations, and all other data associated therewith provided by a Party under the terms of this agreement.

2. Grant of License. Each Party grants to all other Parties, in accordance with the terms and conditions set forth herein, a non-exclusive, non-transferable, and royalty-free license to reproduce, and prepare derivative works from the Licensed Materials solely in connection with the state assessments and state practice tests (collectively the "State Assessments") that are developed and administered by each Party, including the further right to reproduce portions of the Licensed Materials as provided by each Party in Section 3.c. below, and to authorize third party test distribution vendors to do the same, solely for the same such purposes and subject to the conditions of Section 3 below. The Licensed Materials, including any modifications thereto, are and shall at all times remain the sole property of the Originating Party, and no Recipient Party shall have rights thereto or ownership interests therein except as may be expressly granted herein. Each Recipient Party shall identify and track those Licensed Materials received from other Parties to this Agreement.

3. Terms of Use. Each Party's use of the Licensed Materials shall be in accordance with the following terms and conditions:

a. Each Party shall comply at all times with the security procedures and measures set forth in Schedule D hereto;

b. Each Party shall follow the selection and scoring guidelines set forth in Schedule E hereto;

c. No Recipient Party shall publish, copy, or reproduce the Licensed Materials or any portion thereof, including but not limited to the reproduction of any items in the State Assessments, or modify such Licensed Materials in any such publication, copy, or reproduction, except as may be agreed to in writing by the Originating Party;

d. Each Recipient Party shall: (a) maintain the confidentiality of the Licensed Materials, including but not limited to taking measures no less protective than those it employs to maintain the confidentiality of its State Assessments, (b) not disclose, deliver, provide access to or otherwise make available the Licensed Materials or any copies or reproductions thereof to any unauthorized party, and (c) limit access to and use of the Licensed Materials to only those personnel of each Recipient Party who have a need to access or use such Licensed Materials for the purposes specified herein; and (d) require test distribution vendors or other contractors granted a sublicense pursuant to Section 2 above to limit access to the Licensed Materials to only those personnel of the vendor or contractor who have a need to access or use the Licensed Materials to carry out the purposes specified herein, to the extent licensed by the Recipient Party; and

e. Regarding Licensed Materials for which the Originating Party obtained copyright permission from a third-party source, each Recipient Party shall identify the source of the Licensed Materials by including the same copyright notice as contained on the original Licensed Materials. Each Recipient Party shall independently obtain copyright permission from the source prior to using the Licensed Materials under the terms of this Agreement.

4. Term and Termination. The term of this Agreement and the license granted herein commence on the effective date stated herein and expire on June 30, 2018, unless terminated earlier in accordance with the provisions herein. In addition, each Originating Party may terminate this Agreement with respect to either Recipient Party without any liability or further obligation to the Recipient Party (i) upon thirty (30) days' prior written notice if the Recipient Party commits a material breach hereof and fails to fully cure such breach within said 30-day period, or (ii) immediately upon written notice if the breach is incapable of cure. Upon the expiration or termination of this Agreement, the Recipient Party shall mark all Licensed Materials received from other Parties to this Agreement as no longer available for either operational use or for use on practice tests within thirty (30) days of the date of expiration or termination, as the case may be. This restriction notwithstanding, each Recipient Party may retain electronic copies of all Licensed Materials received from other Parties to this Agreement for archival purposes. Termination of this Agreement between two Parties does not terminate the Agreement with respect to other Parties. Upon concurrence of the Parties and upon a suitable Amendment duly executed and approved to the degree required by applicable law, this Agreement may be extended for additional terms provided that the maximum duration of this Agreement, including all extensions, shall not exceed ten (10) years.

5. Release of Licensed Materials. Each Originating Party retains the right to release its Licensed Materials for publication or use on its Practice Tests. Each Party agrees to notify all other Parties by June 30 of the current school year of the intent to cease using any of its Licensed Materials for the following school year and agrees to wait one (1) full school year before releasing such Licensed Materials for publication or use on its Practice Tests. Each Recipient Party retains

the license for continued use of the Licensed Materials following the release of the Licensed Materials by the Originating Party, subject to the terms of Section 4 above.

6. Warranties.

a. Except with respect to third-party materials described in Section 3.e above, each Party warrants it is authorized to license the Licensed Materials to be provided to the other Parties to this Agreement. EXCEPT AS STATED HEREIN, NO PARTY MAKES ANY OTHER REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

b. All Parties respectively warrant (i) execution of this Agreement will not result in any violation or default of or conflict with any provision of any other agreement to which it is a party or to which it is bound, or of any law, judgment, decree, order or regulation of any governmental agency, or of any action or proceeding before any court or governmental agency; and (ii) it shall promptly notify all other Parties in writing of any changes to any laws, judgments, decrees, orders or regulations of any governmental agency that would compel the Party to breach, or prevent the Party from performing, any of the terms and conditions of this Agreement, or prevent any Party from exercising its rights herein.

7. Assignment and Sublicensing. Neither this Agreement, the license granted hereunder, nor the Licensed Materials may be, directly or indirectly, sold, transferred, sublicensed, assigned in whole or in part, conveyed, pledged, encumbered or otherwise disposed of by any Recipient Party without the prior written consent of the Originating Party, its successors, or assigns.

8. Venue. With respect to any claim under this Agreement one Party might bring against another Party, each Party agrees to bring such claim in the state courts of the Party against whom the claim is brought. If the claim must be brought in federal court, the Party shall bring the claim in the federal courts in the state of the Party against whom the claim is brought. Each Party further agrees to accept service of process by mail.

9. Unauthorized Use or Disclosure. Each Party acknowledges and agrees the Licensed Materials contain highly confidential and sensitive information and the unauthorized use or disclosure thereof will cause the Originating Party immediate and irreparable harm. In addition to any other remedies available to each Originating Party in the event of a Recipient Party's unauthorized use or disclosure of the Licensed Materials, the Parties agree the Originating Party shall be entitled to injunctive relief.

10. Entire Agreement; Order of Precedence. This Agreement, together with all Schedules referenced herein and attached hereto, is the complete and exclusive agreement between the Parties with respect to the subject matter hereof and supersedes all prior or contemporaneous agreements and communications (both written and oral) relating to such subject matter.

11. Amendments.

a. No modification, amendment to, or alteration of this Agreement, including, without limitation, any Schedules referred to herein and attached hereto, shall be effective unless such modification, amendment, or alteration is reduced to writing; states the clear intent of the

Parties to modify, amend, or alter the specified provisions of this Agreement; and is signed by all Parties, except for a change of contact information provided by one Party to the others.

b. Notwithstanding the provisions of Section 11.a. above, if any modification of this Agreement is required in order for this Agreement to conform to any applicable state law or regulation, the Party seeking a modification shall: (i) provide a copy of such relevant law or regulation with an explanation of why this Agreement would not otherwise be in compliance therewith but for an amendment; and (ii) a copy of the proposed amendment to this Agreement, which amendment shall modify this Agreement solely to the extent necessary to render this Agreement in conformity with the relevant law or regulation. If the required modification materially affects the intent or purpose of this Agreement or materially alters a provision hereof, any Party may terminate this Agreement without liability or further obligation to the other Parties.

12. Survival. Any provision of this Agreement which contemplates performance or observance subsequent to termination or expiration of this Agreement shall survive termination or expiration of this Agreement and continue in full force and effect.

13. Notices.

a. Unless otherwise stated, all notices required under this Agreement shall be in writing and shall be considered given: (i) When delivered personally, (ii) Five (5) days after mailing, when sent certified mail, return receipt requested and postage prepaid, (iii) Upon receipt when sent via a commercial overnight carrier, fees prepaid, or (iv) Upon receipt when sent by facsimile transmission confirmed by telephone, and retaining copy of transmission confirmation receipt.

b. All communications will be addressed as follows (unless changed by written notice):

14. Severability. If at any time any clause or part of this Agreement is found by any court tribunal, or administrative body of competent jurisdiction to be wholly or partly illegal, invalid or unenforceable in any respect, such provision will be deemed restated, in accordance with applicable law, to reflect as nearly as possible the original intention of the Parties, and the remainder of the Agreement will continue in full force and effect.

IN WITNESS WHERE, the Parties have caused this Agreement to be executed by their duly authorized representatives.

Schedule A

Licensed Delaware Materials

1. Test items for operational use developed by the Delaware Department of Education at grades 3, 4, 5, 6, 7, 8, and high school in the content areas of Reading/Literature, Math, Science, and Social Sciences as available.

2. Released practice test items developed by the Delaware Department of Education at grades 3, 4, 5, 6, 7, 8, and high school in the content areas of Reading/Literature, Math, Science, and Social Sciences as available.

3. Item types, including but not limited to multiple choice items and machine-scored constructed response items.

4. Scoring rubrics for machine-scored constructed response items.

Schedule B

Licensed Hawaii Materials

1. Test items for operational use developed by the Hawaii Department of Education at grades 3, 4, 5, 6, 7, 8, and high school in the content areas of Reading/Literature, Math, Science, and Social Sciences as available.

2. Released practice test items developed by the Hawaii Department of Education at grades 3, 4, 5, 6, 7, 8, and high school in the content areas of Reading/Literature, Math, Science, and Social Sciences as available.

3. Item types, including but not limited to multiple choice items and machine-scored constructed response items.

4. Scoring rubrics for machine-scored constructed response items.

Schedule C

Licensed Oregon Materials

1. Test items for operational use developed by the Oregon Department of Education at grades 3, 4, 5, 6, 7, 8, and high school in the content areas of Reading/Literature, Math, Science, and Social Sciences as available.

2. Released practice test items developed by the Oregon Department of Education at grades 3, 4, 5, 6, 7, 8, and high school in the content areas of Reading/Literature, Math, Science, and Social Sciences as available.

3. Item types, including but not limited to multiple choice items and machine-scored constructed response items.

4. Scoring rubrics for machine-scored constructed response items.

Schedule D

Security Procedures and Measures

Protocols for Recipient Parties to Ensure Physical Security of Licensed Materials

Each Party agrees to maintain the physical security of confidential Licensed Materials obtained from other Parties to this Agreement at all times.

- Each Party agrees to ensure that all printed secure Licensed Materials are stored in a securely locked facility that can only be entered with a key or keycard by authorized personnel.
- To the extent printed secure Licensed Materials are taken out of locked storage areas, each Party agrees that they will be supervised by authorized personnel at all times.
- Each Party agrees to ensure that all personnel, including test distribution vendors or other contractors, with access to secure Licensed Materials, whether in printed or electronic format, will sign a confidentiality and security agreement that has been reviewed and approved by each Originating Party. Each Party will make signed copies of the confidentiality and security agreement available to all other Parties to this Agreement for review.

Recipient Party's Use of A Secure Item Tracking System

- Each Party agrees to use a secure network when viewing all Licensed Materials
- Each Party agrees to use a secure item tracking system (ITS) to store and track each item and stimulus included in the Licensed Materials.
- Each Party agrees that all electronic files of Licensed Materials will remain encrypted (PGP software) and secure within Party-owned computers.
- Each Party agrees that Licensed Materials will be shared only through the Parties' secure FTP sites and will be removed immediately on receipt at the site. The recipient of any secure items will be notified before secure items are put on the site to ensure immediate removal of the items from the FTP site.

Protocols for Recipient Parties to Ensure Security of Licensed Materials on State Assessments

- Each Party agrees to follow and implement security procedures consistent with this Agreement during the administration of the state assessments containing Licensed Materials obtained from other Parties to this Agreement.
- Each Party agrees that all Licensed Materials embedded in its State Assessments require the same level of security as required for the State Assessments;
- Each Party agrees that all personnel at the state, district, and school level who have access to the Licensed Materials will follow security protocols consistent with this Agreement when handling Licensed Materials. Each originating Party reserves the right to review and

approve the security protocols adopted by all Recipient Parties prior to sharing its Licensed Materials.

- In addition, each Party agrees to ensure that all personnel at the state, district, and school level, including state employees, project staff, and test administrators viewing and working with the Licensed Materials will sign a confidentiality and security agreement that has been reviewed and approved by each Originating Party.

Online Administration

- *Secure Access to System* To ensure test security during an online test, each Party agrees that test administrators responsible for administering tests that include shared items will receive security training and sign a confidentiality and security agreement that has been reviewed and approved by each Originating Party.
- *Security Protocol for Test Administration* At a minimum, each Party agrees to adopt security protocols to ensure that test administrators do not:
    - Make or retain copies of secure Licensed Materials;
    - Discuss or release descriptions of secure Licensed Materials to anyone;
    - Send secure Licensed Materials over e-mail or fax, or replicate secure Licensed Materials electronically;
    - Use secure Licensed Materials for instruction; or
    - Review, discuss, or analyze secure Licensed Materials before, during, or after testing.
- *Logon and Authentication* Each Party agrees to use the Licensed Materials in online tests administered through a secure online testing system.
- *Secure Browser* Each Party understands that students may not print reading passages included in the Licensed Materials directly, but they may submit a request to print to the test administrator. Each Party will ensure that all printed reading passages included in the Licensed Materials are collected at the end of each testing event and securely disposed of immediately following the testing event.
- *No Paper/Pencil Administration* Each Party agrees that Licensed Materials obtained from originating Parties will not be included in Paper/Pencil tests.

Data File Security

Each Party agrees that its scoring vendor will implement rigorous quality assurance activities throughout the scoring process to ensure the highest level of data quality, integrity, and security.

Schedule E

General Guidelines for Selecting Items to Share between Parties

Between June 30, 2010 and November 1, 2010, each Party will select at least 40 items for operational use and 20 released practice test items by subject and grade to provide to the other Parties to this Agreement. In addition, each Party may elect to exchange at least 40 items for operational use by subject and grade to provide to the other Parties to this Agreement annually between June 30th and November 1st thereafter. The items should be selected to cover as much of the shared test content standards as is possible and cover the range of item difficulty. The Parties will select items to reflect a broad range of depth of knowledge, including application skills. If a Party elects not to exchange items for a given year, the Party will notify all other Parties to this Agreement of this decision by May 31st of that year and will neither provide items to nor receive items from other Parties to this Agreement for that year.

Each Party will develop its own protocol for determining which items obtained from the other Parties to this Agreement match to its state's content standards.

General Guidelines for Scoring Constructed Response Items

The Parties shall use the scoring guides (rubrics, rater-reliability and back-read requirements, etc.) provided by the originating Party for machine-scored constructed response items. To the extent reasonably possible, the Parties agree to score the items in a manner consistent with the protocols set forth in such scoring guides.

Attachment 2:
New Mexico Contract Amendment

Contract ID#11 924 P527 0016

STATE OF NEW MEXICO

PUBLIC EDUCATION DEPARTMENT

PROFESSIONAL SERVICES CONTRACT# 11 924 P527 0016 – Amendment 1

THIS AGREEMENT is made and entered into by and between the State of New Mexico, Public Education Department, hereinafter referred to as the "Agency," and American Institutes for Research (AIR), hereinafter referred to as the "Contractor."

IT IS MUTUALLY AGREED BETWEEN THE PARTIES THAT THE FOLLOWING PROVISIONS OF THE ABOVE-REFERENCED CONTRACT ARE AMENDED AS FOLLOWS:

1. **Scope of Work**

Per the Scope of Work changes are located in item 1):

1) a) viii. The Contractor shall deliver a total of 50 Alternate Performance Assessment tasks to the Agency. During 2011-2012 and 2012-2013, approximately 25 of these tasks (with associated items) per year shall be Third-Party Assessment Items. They shall come from a bank of Common Core Standards-aligned Reading and Math tasks licensed to AIR by the Delaware Department of Education for secure use in New Mexico. These tasks may be edited/changed by the Agency and will go through the same annual review committee process as newly developed items.

2. **Compensation.**

A. Under this Agreement, the Agency shall pay to the Contractor in full payment for services satisfactorily rendered, a decreased compensation of $253,025.00, including gross receipts tax. **The total amount of the monies payable to the Contractor under this Amendment, including gross receipts tax, is $5,150,590.00, pursuant to the Budget Schedule in Attachments 2-B and 2-C.**

The Agency shall pay to the Contractor in full payment for services satisfactorily performed, pursuant to the Scope of Work 1-A compensation to equal and not to exceed $739,172.00 in FY 2011. The New Mexico gross receipts tax levied on the amounts payable under this Agreement in FY 2011 totaling **$0.00** shall be paid by the Agency to the Contractor. **The total amount of monies payable to the Contractor in FY 2011 under this Agreement, including gross receipts tax and expenses, shall not exceed $739,172.00.**

The Agency shall pay to the Contractor in full payment for services satisfactorily performed, pursuant to the Scope of Work 1-A, and Attachment 2-A of this Amendment, compensation to equal and not to exceed $1,269,054.00 in FY 2012. The New Mexico gross receipts tax levied on the amounts payable under this

Agreement in FY 2012 totaling **$0.00** shall be paid by the Agency to the Contractor. **The total amount of monies payable to the Contractor in FY 2012 under this Agreement, including gross receipts tax and expenses, shall not exceed $1,269,054.00, pursuant to the Budget Schedule in Attachments 2-B and 2-C.**

The Agency shall pay to the Contractor in full payment for services satisfactorily performed, pursuant to the Scope of Work 1-A, and Attachment 2-A of this Amendment, compensation to equal and not to exceed $1,293,536.00 in FY 2013. The New Mexico gross receipts tax levied on the amounts payable under this Agreement in FY 2013 totaling **$0.00** shall be paid by the Agency to the Contractor. **The total amount of monies payable to the Contractor in FY 2013 under this Agreement, including gross receipts tax and expenses, shall not exceed $1,293,536.00, pursuant to the Budget Schedule in Attachments 2-B and 2-C.**

The Agency shall pay to the Contractor in full payment for services satisfactorily performed, pursuant to the Scope of Work 1-A compensation to equal and not to exceed $1,848,828.00 in FY 2014. The New Mexico gross receipts tax levied on the amounts payable under this Agreement in FY 2014 totaling **$0.00** shall be paid by the Agency to the Contractor. **The total amount of monies payable to the Contractor in FY 2014 under this Agreement, including gross receipts tax and expenses, shall not exceed $1,848,828.00.**

Under Contract # 11-924-P527-0016 and all Amendments to said Contract, the total amount of the monies payable to the Contractor, including gross receipts tax and expenses, shall not exceed **$5,150,590.00**

12. Product of Service -- Copyright.

Section 12, Product of Services -- Copyright, is hereby amended to read as follows:

"All materials developed or acquired by the Contractor under this Agreement, with the exception noted below, shall become the property of the State of New Mexico and shall be delivered to the Agency no later than the termination date of this Agreement. The exceptions shall be any test tasks or items licensed to AIR from another State Education Agency for the purpose of secure testing. These test tasks shall remain property of the owning State Education Agency and may not be released by the State of New Mexico. Nothing developed or produced, in whole or in part, by the Contractor under this Agreement shall be the subject of an application for copyright or other claim of ownership by or on behalf of the Contractor, with the exception that the State of New Mexico shall grant the Contractor the license to use, but not release, up to 50 New Mexico-owned tasks in the State of Delaware for the sole purpose of secure testing." Assessment items originating from third-parties (e.g., items obtained from other states or entities based on licenses with AIR of on item-sharing or other agreements directly with New Mexico) shall be considered "Third-Party Assessment Items". Third-Party Assessment Items shall remain the property of their respective owners, and may not be released by New Mexico.

All other articles of this contract remain the same.

IN WITNESS WHEREOF, the parties have executed this Agreement as of the date of signature by the DFA Contracts Review Bureau below.

Administration		Summer 2015		
Subject/Course		Mathematics		
Grade		Algebra 1	Geometry	Algebra 2
Tasks	**Days**			
Department selects item bank (e.g. SAGE) and completes test design	1	5/14/2014		
AIR uses automated form building, with overage items, and sends bookmaps; 1 x 1s	1	6/2/2014		
Department completes selection of items from SAGE for operational forms	21	7/1/2014		
Complete New Item Development for Paper Field Testing, including Department Reviews (Expedited Grades)	1	7/1/2014		
Combined Bias/Data Review Committee meeting for operational items, paper EFT	10	7/18/2014		
Content Review Committee Meeting for operational items, paper EFT	10	8/1/2014		
Community Sensitivity Review Meeting for operational items, paper EFT	10	8/15/2014		
Onsite Test Construction; finalize forms				
AIR proposes revised forms (with bookmaps, 1 x 1s)	5	10/2/2014		
Department and AIR review/revise forms at onsite test construction meeting	5	10/9/2014		
Department approves forms	0	10/9/2014		
AIR Platform Review	10	6/15/2015		
UAT Review	10	6/29/2015		
Paper Test Forms Construction				
AIR produces Internal Blackline 1 of Operational (Base) Form	5	10/16/2014		
Content/Editorial/Operations Review of Internal Blackline 1	4	10/22/2014		
Revise Internal Blackline 1; Generate Blackline 1 for FDOE review	3	10/27/2014		
Department reviews Blackline 1 (Staggered)	7	11/5/2014		
AIR Revises Blackline 1	2	11/7/2014		
AIR Generates Blackline 2	4	11/13/2014		
Department reviews Blackline 2	7	11/24/2014		
AIR Revises Blackline 2	2	11/26/2014		
AIR Generates Final Blackline	3	12/2/2014		
Department reviews Final Blackline	7	12/11/2014		
AIR Generates Blueline	2	12/15/2014		
Department reviews Blueline	7	12/26/2014		
Department approval	1	12/29/2014

428	Portal go live	1 day	Fri 6/6/14	Fri 6/6/14	
429	**Training and Practice Tests**	**261 days**	**Tue 6/10/14**	**Tue 6/9/15**	

ID	Task Name	Duration	Start	Finish	Notes
430	PERIODIC: Develop and deliver approved practice tests and tutorials for the computer-based and paper-based assessments (sample test materials and computer-based practice tests).	1 day	Mon 11/3/14	Mon 11/3/14	
431	PERIODIC: Develop and deliver a training plan for the initial training and supply materials to support ongoing training for the audiences identified in the contract.	1 day	Tue 6/10/14	Tue 6/10/14	
432	PERIODIC: Develop and deliver materials to support ongoing training for the audiences identified in the contract.	1 day	Tue 6/9/15	Tue 6/9/15	
433	PERIODIC: Provide customer service throughout the year, with additional customer service provided at peak times leading up to and following each test administration.	261 days	Fri 6/6/14	Fri 6/5/15	
434	PERIODIC: Inventory, store, and destroy used and unused test materials as described in the contract.	1 day	Mon 11/2/15	Mon 11/2/15	
435	**Reports and Recommendations - All Online Comment Forms**				**Contigent upon final,**
443	PERIODIC: Deliver the Infrastructure Trial Test	1 day	Fri 8/1/14	Fri 8/1/14	
444	**Forms: Deliver Computer-Based Test Forms (including accommodated version**				**Contigent upon final,**
452	**Spring 2015 Scanning, Psychometric, Scoring, Reporting Activities**	**50 days**	**Fri 3/6/15**	**Fri 5/15/15**	
453	**ELA/L, Writing Grades 3-9, 11**	**48 days**	**Tue 3/10/15**	**Fri 5/15/15**	
454	**Return, Receipt, Scanning**	**32 days**	**Tue 3/10/15**	**Thu 4/23/15**	
455	**Early Return Testers (For Post-Equating Online and Paper Tests)**	**18 days**	**Tue 3/10/15**	**Fri 4/3/15**	
456	Test Window Ends	0 days	Tue 3/10/15	Tue 3/10/15	
457	Schools selected in early return sample return material	0 days	Wed 3/11/15	Wed 3/11/15	
458	Early Return material arrives at DRC	1 day	Thu 3/12/15	Thu 3/12/15	
459	Scanning	11 days	Fri 3/13/15	Fri 3/27/15	
460	Handscoring and Online Validation Scoring	12 days	Tue 3/17/15	Wed 4/1/15	
461	Merge MC and handscoring data to AIR	2 days	Thu 4/2/15	Fri 4/3/15	
462	**Paper Window Testers**	**29 days**	**Fri 3/13/15**	**Thu 4/23/15**	
463	Test Window Ends	0 days	Fri 3/13/15	Fri 3/13/15	
464	Districts return scorable material (mix of next-day and ground delivery)	1 day	Thu 3/19/15	Thu 3/19/15	
465	Scorable materials arrive at DRC	2 days	Tue 3/24/15	Wed 3/25/15	
466	Scanning	12 days	Fri 3/27/15	Mon 4/13/15	
467	Handscoring and Online Validation Scoring	12 days	Wed 4/1/15	Thu 4/16/15	
468	Merge MC and handscoring data	5 days	Fri 4/17/15	Thu 4/23/15	
469	**Online Window Testers**	**0 days**	**Thu 4/9/15**	**Thu 4/9/15**	

ID	Task Name	Duration	Start	Finish	Notes
470	Test Window Ends	0 days	Thu 4/9/15	Thu 4/9/15	
471	Response data to AIR	0 days	Thu 4/9/15	Thu 4/9/15	
472	**Post Equating**	**15 days**	**Fri 4/3/15**	**Fri 4/24/15**	
473	**Early Return: Paper**	**15 days**	**Fri 4/3/15**	**Fri 4/24/15**	
474	**AIR produces calibration and equating SDF (contains final item scores for operational items)**	**5 days**	**Fri 4/3/15**	**Fri 4/10/15**	
475	AIR receives early return data file from DRC	0 days	Fri 4/3/15	Fri 4/3/15	
476	AIR generates Operational Calibration & Post equating SDF	3 days	Mon 4/6/15	Wed 4/8/15	
477	Tech team, QA team and SAS team conduct QC on SDF	2 days	Thu 4/9/15	Fri 4/10/15	
478	AIR sends Operational Calibration & Post equating SDF to client and QA contractor	1 day	Fri 4/10/15	Fri 4/10/15	
479	**Calibration, equating, and scaling activities are conducted**	**10 days**	**Mon 4/13/15**	**Fri 4/24/15**	
480	**AIR, FDOE, and QA contractor conduct independent calibration, equating, and scaling activities**	**8 days**	**Mon 4/13/15**	**Wed 4/22/15**	
481	Data file intake QC	1 day	Mon 4/13/15	Mon 4/13/15	
482	Conduct classical item analysis and key check	2 days	Tue 4/14/15	Wed 4/15/15	
483	Cailbrate item parameters and link back to reference scale	2 days	Thu 4/16/15	Fri 4/17/15	
484	Identify and investigate items that demonstrate drift; agree with client on final linking set	2 days	Mon 4/20/15	Tue 4/21/15	
485	Generate final linking constants and apply to new item calibrations	1 day	Wed 4/22/15	Wed 4/22/15	
486	AIR submits final item parameters and score conversion tables (if applicable) to client	0 days	Wed 4/22/15	Wed 4/22/15	
487	Client signs off on final item parameters and score conversion tables	1 day	Thu 4/23/15	Thu 4/23/15	
488	AIR loads item parameters and score conversion tables into ITS	1 day	Fri 4/24/15	Fri 4/24/15	
489	**Re-Scoring/Reporting**	**16 days**	**Thu 4/23/15**	**Fri 5/15/15**	
490	AIR receives final merged response file from DRC	0 days	Thu 4/23/15	Thu 4/23/15	
491	**Build a new configuration file with updated item parameters**	**4 days**	**Mon 4/27/15**	**Thu 4/30/15**	
492	Draft and validate configuration file	3 days	Mon 4/27/15	Wed 4/29/15	
493	Final configuration file to CSSC	1 day	Thu 4/30/15	Thu 4/30/15	
494	Rescore tests in test environment	2 days	Fri 5/1/15	Mon 5/4/15	
495	AIR conducts initial QC of post-equated scoring	2 days	Tue 5/5/15	Wed 5/6/15	
496	AIR migrates item bank configuration to production site (overnight)	1 day	Wed 5/6/15	Wed 5/6/15	
497	AIR applies post-equated scoring to tests	2 days	Thu 5/7/15	Fri 5/8/15	
498	AIR produces student data file with post-equated scoring	2 days	Mon 5/11/15	Tue 5/12/15	

ID	Task Name	Duration	Start	Finish	Notes
499	AIR SAS, tech team and QA team QC SDFs	2 days	Wed 5/13/15	Thu 5/14/15	
500	AIR posts Final SDF for client and QA contractor	0 days	Thu 5/14/15	Thu 5/14/15	
501	Student results in Online Reporting System Available	1 day	Fri 5/15/15	Fri 5/15/15	
502	**Mathematics Grades 3-8 (Grade 8 Math is on paper)**	**48 days**	**Tue 3/10/15**	**Fri 5/15/15**	
503	**Return, Receipt, Scanning**	**32 days**	**Tue 3/10/15**	**Thu 4/23/15**	
504	**Early Return Testers (For Post-Equating Online and Paper Tests)**	**18 days**	**Tue 3/10/15**	**Fri 4/3/15**

Smarter Balanced Assessment Consortium: English Language Arts & Literacy Stimulus Specifications

Introduction

The English language arts (ELA) stimulus specifications assist item writers in selecting appropriate topics, features, and formats for developing items and tasks. These parameters are informed by best practices described in the Common Core State Standards (CCSS), the *Smarter Balanced Assessment Consortium Content Specifications for ELA*, and the practices prevalent in Smarter Balanced states' guidelines. These specifications provide guidance on appropriate kinds of texts, grade level-appropriate topics and complexity, and other features pertinent to the domain of ELA. Item writers should follow these guidelines and refer to the *Smarter Balanced Assessment Consortium Content Specifications for ELA*, the *Smarter Balanced Assessment Consortium Guidelines for Accessibility and Accommodations,* and the *Smarter Balanced Assessment Consortium Bias and Sensitivity Guidelines* when developing or selecting stimuli.

Most items/tasks for assessment include a stimulus along with a set of questions to which the student responds. Stimulus materials are used in ELA assessments to provide context for assessing the knowledge and skills of students. These stimuli are diverse. They can be traditional passages but viewed on a computer screen; audio presentations with images for students to listen to; simulated web pages for students to use for research; or scenarios to react to. Item writers need to understand how stimuli used in the Smarter Balanced assessments are similar to and different from stimuli used in traditional assessments. These guidelines explain these similarities and differences and provide parameters for stimulus use.

Wise use of technology can support the expectation for increasingly complex thinking by providing an array of stimuli in the Smarter Balanced assessment. Item writers can use stimuli to set up questions, to "kick start" thinking, so students can respond to selected-response and constructed-response items.

The Common Core State Standards for ELA address four strands: reading, writing, speaking and listening, and language. One key goal of the Common Core State Standards is for students to be able to read (listen to) increasingly more complex texts and write (deliver) increasingly more complex responses as they proceed through school, with a focus on being college- and career-ready as they exit high school. Stimuli that pose appropriate challenges must be sufficiently complex to elicit responses that demonstrate college- and career-readiness. Students whose work shows college- and career-readiness in ELA will exemplify the vision expressed in the Common Core State Standards. A college- and career-ready person is one

- who reads, understands, and enjoys complex works of literature;
- who reads through extensive amounts of information in print and digital form, both habitually and critically;
- who writes effectively for different purposes and audiences and uses writing to generate, organize, make sense of, and deeply understand information to produce new insights and ideas;

- who communicates effectively – demonstrating active listening, inter-personal communication, and the ability to integrate oral/visual/graphic information;
- who uses inquiry and critical thinking to produce insights, perspectives, and solutions;
- who demonstrates both cogent reasoning and the use of evidence in decision making in all aspects of life; and
- whose skills in reading, writing, listening and speaking, and language inform all language-based creative and purposeful expression.

The *Smarter Balanced Assessment Consortium Content Specifications for ELA* is a bridge document linking the CCSS to the Smarter Balanced assessment claims and targets. There are four claims for ELA/Literacy, each with a number of targets that provide evidence to support each claim. The four claims are

Claim #1 – Students can read closely and analytically to comprehend a range of increasingly complex literary and informational texts.

Claim #2 – Students can produce effective and well-grounded writing for a range of purposes and audiences.

Claim #3 – Students can employ effective speaking and listening skills for a range of purposes and audiences.

Claim #4 – Students can engage in research/inquiry to investigate topics, and to analyze, integrate, and present information.

Smarter Balanced ELA Content Specifications emanate from the Common Core State Standards and demand the same rigor, the same complexity, and the same expectation of college- and career-readiness. The Smarter Balanced assessment is different from previous assessments because it is more stringent, expecting students to demonstrate complex abilities in reading, writing, speaking and listening, and language.

Types of Stimuli

Stimuli Formats

Because many of the claims and targets may be assessed in a variety of ways, the stimulus formats may vary. For Claim 1, the stimuli should be texts, whether literary or informational. For constructed responses in Claim 1, a pair of poems that have a similar theme or format may be presented. Alternatively, there may be a poem and an informational text that have similar or different ideas. Informational texts may be paired to present support or opposition to a thesis. Regardless of the stimulus, the item must assess the student's ability to read complex texts. The reading passages used for Claim 1 should be on grade level. Constructed responses should usually take five, and no more than ten, minutes to complete.

The kinds of stimuli used on Smarter Balanced assessments can vary. These stimuli may include works of art, articles from newspapers and magazines, speeches, cartoons, lectures, and debates. The use of various kinds of scenarios is also possible and may include simulated Internet or web pages. Articles or editorials expressing opposing points of view are suitable for argument writing.

Claim 1: Reading Stimuli Specifications for Computer Adaptive Testing (CAT) Items

Reading stimuli must

- be clear and of fine quality;
- be rich enough to support well-developed questions;
- NOT include informational texts that are story-like or that contain an overly simplistic and chronologically sequenced structure beyond grade 5;
- meet the demands of grade-level interest and appropriateness;
- have an appropriate text complexity level for Claim 1 Reading literary and informational passages on the CCSS grade band;
- adhere to descriptions and the level of quality set forth in the Common Core State Standards, the S*marter Balanced Assessment Consortium Content Specifications for ELA*, and this document;
- consider accessibility concerns (see the *Smarter Balanced Assessment Consortium Accessibility and Accommodations Guidelines*);
- adhere to the Smarter Balanced Bias and Sensitivity Guidelines (see the *Smarter Balanced Assessment Consortium Bias and Sensitivity Guidelines*);
- include titles, authors' and artists' names, sources, and publication dates (for newspaper and magazine articles and cartoons); and
- identify the speakers, occasion, location, and date (for lectures and debates).

Some reading stimuli may contain text features (such as images, tables, charts, photographs, and artwork) that provide additional information to students. Text features must

- be clear and of fine quality;
- relate directly to the text of the stimulus;
- be true to the original if reproduced from another source;
- add to the complexity and worth of the text as a whole; and
- be identified by title, artist, and year completed (fine art only).

Claim 2: Writing Stimuli Specifications for Computer Adaptive Testing (CAT) Items

All Writing (Claim 2) stimuli are discrete and written by the item developer. Claim 2 stimuli must

- provide a specific grade-appropriate audience, purpose, and task;
- sound like authentic student writing for the targeted grade (content, language/vocabulary, and sentence structure of each stimulus should be similar to that of students in the tested grade);
- model good writing. Stimuli should NOT promote formulaic writing (e.g., topic sentence, three development sentences, and a concluding sentence that restates/repeats, or summarizes the topic sentence). When a Claim 2 stimulus includes an introduction, it should avoid obvious preview of supports/reasons; when stimulus provides a concluding statement/paragraph, that conclusion must do more than summarize information presented (see standards: emphasize the importance of claim, reflect on the experience, explain the significance of, etc.);
- be appropriately complex for the skill being assessed; and
- be consistent with the purpose and intent of the target and standard being measured.

<u>Writing Purposes</u>

The three purposes (text types) of Claim 2 stimuli are narrative, informational/explanatory, and opinion/argumentative:

- Narrative stimuli should reflect rich, quality writing in which the writer uses narrative strategies. (For Grade 11, Target 1a, narratives and narrative strategies can be employed in the service of explanatory or argumentative purposes.) Narratives are not told, they are shown through a variety of craft techniques.
- If an explanatory/informational stimulus is an excerpt from a report, the item writer should plan a larger report and pull an appropriate excerpt from the larger piece of writing.
- An opinion/argumentative stimulus should also appear to have been excerpted from a larger essay. Grades 3-5 will have opinion stimuli. Grades 6-11 will have argumentative stimuli. Argumentative essays include claims and counterclaims that are supported by reasons and credible evidence. Argumentative stimuli must be based on debatable issues, with two defensible positions.

Write Brief Texts Stimuli (Targets 1a, 3a, and 6a)

Writing stimuli included in brief write items should follow these guidelines:

- No more than 100 words for the elementary grade band
- No more than 200 words for the middle school grade band
- No more than 300 words for the high school grade band
- For brief writes 3a and 6a elaboration items, there are two parts to the stimuli:
  1. "Draft Student Writing" that responders will finish.
  2. "Student Notes" to provide information for students.
- Examples of appropriate stimuli for brief write items for Target 3 include excerpts from passages or articles and/or student research notes or summaries and other types of "raw data."
- Target 6 brief write items should include student notes so that the test taker will not need to rely on prior knowledge to provide evidence in the brief write (e.g., notes, pro/con list).

Revise Brief Texts Stimuli (Targets 1b, 3b, and 6b)

Writing stimuli included in revision items should follow these guidelines:

- No more than 100 words for the elementary grade band
- No more than 200 words for the middle school grade band
- No more than 300 words for the high school grade band
- Examples of appropriate stimuli for revision items include excerpts from student-written informational/explanatory, opinion/argumentative, and narrative papers.
- Stimuli used in evidence/elaboration items should be lacking supporting evidence or elaboration.
- Stimuli used in organization items should be lacking one or more key organizational elements, such as a topic sentence, transition words, or conclusion.

Language/Vocabulary Use Stimuli (Target 8)

Writing stimuli included in language/vocabulary items should show a variety of the narrative, explanatory/informational, and opinion/argumentative text types. Target 8 stimuli should be enhanced by the replacement of a vocabulary word/phrase and should be worthy of the new word choice (e.g., to fit the tone, audience, purpose, and other elements specific to each grade level).

Edit Stimuli (Target 9)

Writing stimuli included in conventions items should show a variety of the narrative, explanatory/informational, and opinion/argumentative text types. Target 9 stimuli should contain errors in capitalization, punctuation, spelling, or grammar usage.

All Writing stimuli should follow the guidelines for appropriateness given in this document. In some instances a content-specific vocabulary word may be on or above grade level as long as the word is easily decodable and has sufficient, explicit context to support the meaning and to avoid any prior knowledge needed of the word.

Claim 3: Listening Stimuli Specifications for Computer Adaptive Testing (CAT) Items

- Listening (Claim 3) stimuli are ~1 minute audio presentations used to measure listening.
- The stimulus should reflect the components noted in the qualitative measures rubric for listening stimuli (purpose or meaning, auditory structure, oral language features, knowledge demands) and meet the appropriate complexity levels by grade.

Audio presentations should also

- be informational and not narrative;
- at grade-level complexity;
- be clear and of fine quality;
- meet the demands of grade-level interest and appropriateness;
- be rich enough to support well-developed questions;
- adhere to descriptions and the level of quality set forth in the Common Core State Standards, the *Smarter Balanced Assessment Consortium Content Specifications for ELA*, and this document;
- consider accessibility concerns (see the *Smarter Balanced Assessment Consortium Accessibility and Accommodations Guidelines*);
- adhere to the Smarter Balanced Bias and Sensitivity Guidelines (see the *Smarter Balanced Assessment Consortium Bias and Sensitivity Guidelines*);
- contain crisp sound with no distracting background noise;
- allow students to pause, rewind, and replay as needed; and
- NOT be overly complex (scattered discourse and/or lack of restatement of key information can make the short-term memory load overly challenging).

Claim 4: Research/Inquiry Stimuli Specifications for Computer Adaptive Testing (CAT) Items

- Research (Claim 4) stimuli are discrete and written by the item writer.
- The stimulus should be a good model of grade-appropriate text.
- The stimulus should sound and look like authentic research.
- Most Claim 4 stimuli should appear to be excerpts from research sources.

- Examples of Claim 4 stimuli may include, but are not limited to, simulated journal articles, informational books/websites, paired excerpts on the same topic, or primary and secondary sources. All Claim 4 stimuli, with the exception of some primary-source stimuli (e.g., journal or letter from a historical time period), must be informational or argumentative. If the stimulus contains a visual with data expressed quantitatively, the stimulus should clearly provide information for research and not assess the student's ability to discern quantitative data, as in a math item.
- Although the item writer is creating the research source and visual stimuli, the information should be based in fact and contain acknowledgments in the metadata. If a study mentioned in the stimulus is real, then the study should contain a correct acknowledgement to the author.
- The length of the stimuli will vary by item and will be dependent on the task and text.
- Claim 4 stimuli should follow the guidelines for appropriateness given in this document; however, the complexity should be one grade level below the assessment level. The vocabulary used in the stimulus should be one grade level below the assessment level. In some instances content-specific vocabulary may be on or above grade level as long as the word is easily decodable and has sufficient, explicit context to support the meaning and to avoid any prior knowledge needed of the word.

Purpose-Setting Statements

For many of the Smarter Balanced assessments, stimuli will be excerpts from longer works. Both complete and excerpted passages need introductions. Media introductions may be appended to audio stimuli. Each introduction should provide only the information necessary for the student to understand the stimulus and be able to respond to the items/tasks. Extraneous information should be omitted. The full title of the original passage and author should be included with the text. The purpose of the written introduction is to provide background context for students before they read or listen to the stimulus. A date or year of publication will be stated if understanding is dependent on knowledge of the date or if content might become outdated. The introduction may include explanatory sentence(s) to provide additional background context. The introduction will not be so overly specific as to clue any items that are testing purpose, meaning, or audience; however, the introduction should not be overly general.

Guidelines for the Use of Images

Graphics may be included in ELA/Literacy stimuli for clarity, student engagement, or other purposes. All images should be provided in formats that will be accessible to students with varying abilities, including students who are visually impaired. Graphics should only contain information that will help students understand or process information. Because graphic images must be provided to visually impaired students through a verbal description or a tactile graphic using an embosser, the following guidelines should be followed in selected graphics to accompany stimuli for reading, writing, listening, and research.

Charts: Charts can be used as part of stimuli but should reflect the complexity of charts typically used in textbooks at the grade level. Charts should be simple and have clear text and numerals. Simpler versions of charts, such as timelines, can be used in stimuli if the graphics are short and clear. A vertical orientation of a timeline is suggested for items that may be provided in Braille.

Flowcharts and Tables: Flowcharts, tables, and similar figures have straightforward formatting in Braille and often can be described without tactile graphics. Information in tables should be organized clearly. The table or flowchart should not be too large or contain large amounts of text.

Photographs: While illustrative, photographs are often difficult to provide in an accessible format. Written descriptions that are created to describe photographs may impact the content of the stimulus or associated items. For this reason, photographs should be avoided except in Claim 3 (Listening).

Maps: Simple maps can be provided to students as tactile graphics. Maps should be clear, without text or numerals superimposed on other graphic elements. Maps should contain the minimum information required for the intended purpose. Large, complex maps may be difficult for students to interpret when converted to tactile graphics covering more than one page.

Diagrams: Simple diagrams may be useful in helping students understand information. Diagrams should be short, simple, and clear. More complex diagrams may require an accompanying description and should only be used if necessary to support the intended purpose of the stimulus.

Screen shots: Visually impaired students interact with web pages differently than sighted students. This should be considered in using screenshots, mock search pages, or other web-based visuals. Screen shots or web-page visuals should focus on the text information on the page rather than visual elements. For example, a stimulus might consist of various links to be evaluated (rather than various images). Images from screen shots or web pages may require accompanying descriptions. Such material introduces the potential for interference with the intended purpose of the stimulus or with the constructs being measured by the accompanying items.

Specifications for Visual Elements Associated with Audio Clips (Claim 3)

Images that accompany listening stimuli should enhance student understanding of the audio clip. The images that are selected should be purposeful, relate directly to the central ideas of the presentation, and augment the learning experience. The images should generally not contain text, and items associated with the audio clips should not be based on or refer to any element in images.

When to use images to enhance audio clips:

- to assist with transitions
- to provide visual support for organization of text
- to provide visual support for a topic that lends itself to diagrams, images, or other graphical representations (examples: the water cycle, branches of government, Ring of Fire map)
- to provide context and support for the listening text (Examples: a picture of a volcano or a sandy desert to ensure that students know what these phenomena look like while listening to text.)

Possible types of images that could enhance audio clips:

- diagrams
- maps
- photographs
- drawings

Claim 1 Reading and Claim 3 Listening Stimuli Metadata

Each Claim 1 and Claim 3 stimulus will have metadata provided to document whether the stimulus adheres to the specifications and whether the stimulus is grade-level appropriate. Metadata provided with each Claim 1 and Claim 3 stimulus include the following:

- unique identifying number
- title
- author
- source (permissioned, commissioned, or public domain)
- reading: informational or literary
- length (number of words in passages, number of seconds if recorded)
- readability level based on Flesch-Kincaid and Lexile (text complexity analysis worksheet)
- "listenability" level based on ELF (audio stimulus complexity analysis worksheet)
- subject matter tags for history/social studies and science/technical subjects
- stimulus type (text or audio)

Reading

ELA/Literacy-Specific Considerations

Choosing Appropriate Reading Stimulus Materials

Item writers must select well-crafted literary and informational stimulus pieces with topics that appeal to students' interests and that are appropriate for their grade level. While students may have some prior knowledge of topics that appeal to them, care should be taken to choose little-known information about topics of common interest since the goal is not to assess student's prior knowledge. When choosing informational texts of interest to students at a specific grade level, strongly consider finding stimulus pieces that relate to science, social studies, history, or technology as prescribed in the Common Core State Standards. Topics appropriate for elementary students might include animals, famous people and events in history, robots, and astronomy. These same topics may be appropriate for middle school students, but the topics should be addressed with greater complexity. High school students' interests vary but may include the previous topics as well as careers, philosophy, the Constitution, and current events. (These example topics are not meant to constrain or limit other topic considerations.)

Reading stimuli included in Smarter Balanced ELA assessments support items that assess the full range of assessment targets. Trained reviewers analyze and map texts to ensure that they align to the standards and are rich and complex enough to generate item sets that fulfill the precise assessment target coverage required in the overall test blueprint.

Accessibility Concerns Related to the Selection of Reading Stimulus Materials

Stimuli need to include topics pertinent to traditionally underrepresented students. Research shows that students from dominant groups fare well when they encounter topics with which they are not familiar; conversely, traditionally underrepresented students' performance is often negatively affected by topics/context with which they are not familiar.

Stimuli also need to bridge the gap of gender interest, or at least provide a balance between those of interest to or about males and those of interest to or about females. This balance should be considered from the beginning of the development cycle. In addition, item writers should become familiar with topics that are excluded from Smarter Balanced assessments and avoid stimuli that relate to them. These topics are included in the *Smarter Balanced Assessment Consortium Bias and Sensitivity Guidelines.*

Interest level, as important as it is, is second to the level of complexity and value set by the Common Core State Standards and the Smarter Balanced vision for students to graduate from high school with skills and knowledge that demonstrate college- and career-readiness.

Literary Texts and Informational Texts

Texts for Claim 1 of the *Smarter Balanced Assessment Consortium Content Specifications for ELA* are divided into two parts: literary texts and informational texts. These texts are listed in the Common Core State Standards on pages 31 and 57. A more detailed list of text types that reflect the Common Core State Standards classifications appears in the chart below:

Literary Texts				Informational Texts		
Text Types	**Grades 3–5**	**Grades 6–8**	**High School**	**Text Types**	**Grades 3–5**	**Grades 6–8 & High School**
Stories	Includes children's adventure stories, folktales, legends, fables, fantasy, realistic fiction, and myth	Includes the subgenres of adventure stories, historical fiction, science fiction, realistic fiction, parodies, and satire	Includes the subgenres of adventure stories, historical fiction, science fiction, realistic fiction, allegories parodies, satire, and graphic novels	**Literary Nonfiction and Historical, Scientific, and Technical Texts**	Includes biographies and autobiographies; books about history, social studies, science, and the arts; technical texts, including directions, forms, and information displayed in charts or maps; and digital sources on a range of topics	Includes the subgenres of exposition, argument, and functional text in the form of personal essays, speeches, opinion pieces, essays about art or literature, biographies, memoirs, journalism, and historical*, scientific, technical, or economic accounts (including digital sources) written for a broad audience *Grades 11-12: including The Declaration of Independence, the Preamble to the Constitution, the Bill of Rights, and Lincoln's Second Inaugural Address
Dramas	Includes staged dialogue and brief familiar scenes	Includes one-act and multi-act plays	Includes one-act and multi-act plays			
Poetry	Includes the subgenres of narrative poems and free-verse poems	Includes the subgenres of narrative poems, lyrical poems, free-verse poems, and ballads	Includes the subgenres of lyrical poems, free-verse poems, sonnets, and odes			

Literary texts include stories, drama, and poetry; informational texts include literary nonfiction and a broad range of texts and topics. Literary nonfiction texts convey factual information that may or may not employ a narrative structure or personal perspective. Smarter Balanced considers literary nonfiction as informational texts; however, expert judgment must be used to evaluate each text. In some cases, a literary nonfiction text will more rightfully belong with literary text if it contains the story structure of a fictional work and/or employs literary devices.

Passage Lengths

Passage-length specifications must be considered in any assessment. Because students have a limited amount of time to complete an assessment, expecting them to read and comprehend lengthy texts is unrealistic. The table below presents minimum and maximum word counts for texts to be used in Smarter Balanced items/tasks. Short texts contain 75% or less of the maximum number of words allowed in long texts.

GRADE	WORD COUNT RANGE (short text)	WORD COUNT RANGE (long text)
3	200-487	488-650
4	450-562	563-750
5	450-562	563-750
6	650-712	713-950
7	650-712	713-950
8	650-712	713-950
11	800-825	826-1100

Few passages meet the exact number of words in a chart. It is important to note that the maximum word counts are suitable for assessment situations, but they are not meant to be absolute.

Measures to Determine Text Complexity

The Common Core State Standards require students to read increasingly complex texts with greater independence and proficiency as they progress toward career- and college-readiness. The *Common Core State Standards Appendix A*: *Research Supporting Key Elements of the Standards* defines a three-part model for measuring text complexity: (1) quantitative evaluation of the text, (2) qualitative evaluation of the text, and (3) matching reader to text and task. For the purposes of this document, emphasis will be on the first two parts of this model.

Quantitative Measures

The traditional quantitative measures of text complexity, such as readability metrics and word count, should be used to identify appropriate text. However, the readability indices work best with continuous print-based texts. The time available for student reading or viewing during an assessment period limits the time a student may take to read and understand a stimulus. Therefore, most of the stimuli should be relatively short, as indicated on the previous page (see the *Smarter Balanced ELA Item Specifications*).

Several readability indices are available, and each has its own advantages and disadvantages. The most readily available is the Flesch-Kincaid index, because it is the metric used in Microsoft Word and other computer word-processing programs. It provides counts of a number of passage attributes and averages for the number of sentences per paragraph, words per sentence, and characters per word. It also provides readability data: the number of passive sentences, the Flesch Reading Ease score, and the Flesch-Kincaid Grade Level for the passage. The latter is calculated using the number of syllables in the passage. Advantages of this index are that it is readily available, it is intended for texts suitable for grades three through adult, and it gives a quick estimate of the complexity level of a passage. One notable drawback to this formula is that it may underestimate the readability levels of informational passages because it does not account for specialized vocabulary. No other readability metrics are as readily available, as wide-ranging in their capacity to cross several grade levels, and as convenient as Flesch-Kincaid.

Lexiles are used to offer readabilities for whole texts from which shorter passages may be taken. Lexiles may be used as one part of the evidence to determine whether a passage is viable for the Smarter Balanced assessments. Lexile levels for Common Core State Standards grade bands (Appendix B) are shown in the following chart. These “new” Lexiles meet the levels of complexity needed to meet the Common Core State Standards and Smarter Balanced guidelines for career- and college-readiness.

Grade	"Stretch" Lexile Band
3	420–820
4–5	740–1010
6–8	925–1185
9–10	1050–1335
11	1185–1385

Regardless of the readability estimate used, passage writers or finders should select texts that cover a range of difficulty. Item writers must use good judgment and a qualitative measure in selecting stimuli that are challenging and complex but still appropriate.

Qualitative Measures

Qualitative measures of text complexity have been described in the *Common Core State Standards Appendix A: Research Supporting Key Elements of the Standards* as "best measured or only measurable by an attentive human reader, such as levels of meaning or purpose; structure; language conventionality and clarity; and knowledge demands."

Smarter Balanced readabilities for Claim 1 Reading literary and informational passages are expected to be on a Common Core State Standards grade-band level for all Claim 1 items. However, complex narrative fiction can pose a challenge for all readability indices. One notable example is John Steinbeck's novel *The Grapes of Wrath*. Because Steinbeck uses more simple words to express complex ideas, both Flesch-Kincaid and Lexiles have rated it appropriate for grades 2–3. Although younger students may be able to read the words, they will not truly understand the complex ideas in the text.

In addition, it is not possible to produce an accurate readability estimate for some types of passages (e.g., poems or passages with a great deal of dialogue). Because no readability formula is perfect, qualitative measures and teacher content review committees should provide expert opinions on grade-level appropriateness for passages used in the Smarter Balanced assessments.

Rubrics appended to this document provide the qualitative measures for literary and informational text stimuli. These rubrics are followed by two sample texts that appear in the *Common Core State Standards Appendix B: Text Exemplars and Sample Performance Task* and text complexity analysis worksheets for these sample texts. As indicated on these worksheets, the quantitative measures suggest the appropriate grade band of the text while the qualitative rubrics pinpoint the specific grade level. These rubrics provide a powerful and comprehensive way of evaluating a range of stimulus materials that cover the literary and informational scope outlined in the Common Core State Standards.

Texts selected for the Smarter Balanced Assessment should have evidence of their complexity determination and grade-level placement, based on both quantitative and qualitative measures as specified above.

Measures to Determine Audio Stimulus Complexity

Quantitative Measures

The quantitative measure used to analyze the "listenability" of audio stimuli on the Smarter Balanced Assessments is the Easy Listening Formula (ELF). ELF is designed to determine "listenability" and is often used for radio and television broadcasts. The ELF program analyzes the density of complex words instead of sentence length. It uses the ratio of syllables to sentences. The ELF score is calculated by counting the number of syllables (above one) for each word.

Qualitative Measures

The Qualitative Measures Rubric for Listening Stimuli, appended to this document in Appendix C, provides the qualitative measures for Listening stimuli. This rubric is followed by a sample stimulus and an audio stimulus complexity analysis worksheet for the sample stimulus. As indicated on the worksheet, the quantitative measures suggest the appropriate grade band of the stimulus while the qualitative rubric pinpoints the specific grade level. The rubric provides a comprehensive measure for evaluating a range of stimulus materials that cover the Claim 3 Listening targets.

Audio stimuli selected for the Smarter Balanced Assessment should have evidence of their complexity determination and grade-level placement, based on both quantitative and qualitative measures as specified above.

Conclusion

The Smarter Balanced assessments that will be developed to measure student achievement in relation to the Common Core State Standards are ambitious and innovative in scope. They emphasize the creation of a new style of assessment that engages and challenges students. With this imperative in mind, it is important to emphasize that these specifications for stimulus materials are designed to foster the level of creativity and innovative assessment that the Smarter Balanced states have envisioned.

Appendix A: Reading Literary Stimuli

1. Qualitative Measures Rubric for Literary Texts
2. Sample Annotated Literary Text: *Where the Mountain Meets the Moon*, by Grace Lin, New York: Little, Brown, 2009.
3. Sample Worksheet: Literary Text Complexity Analysis of *Where the Mountain Meets the Moon* by Grace Lin

The sample text has been evaluated based on both quantitative and qualitative measures as illustrated on the following pages. The sample annotated text is followed by a text analysis worksheet that uses the quantitative measures to suggest the appropriate grade band of the text and the qualitative rubrics to pinpoint the specific grade level.

Text Complexity: Qualitative Measures Rubric

READING LITERARY TEXTS

The ELA State Collaborative on Assessment and Student Standards (SCASS) developed the following qualitative measures rubric for literary texts. The rubric examines the following criteria judged as central to students' successful comprehension of text meaning, text structure, language features, and knowledge demands. Each of these categories is ranked based on descriptors associated with the following levels: slightly complex, moderately complex, very complex, and exceedingly complex.

Features	Exceedingly Complex	Very Complex	Moderately Complex	Slightly Complex
Meaning	• **Meaning:** Several levels and competing elements of meaning that are difficult to identify, separate, and interpret; theme is implicit or subtle, often ambiguous and revealed over the entirety of the text	• **Meaning:** Several levels of meaning that may be difficult to identify or separate; theme is implicit or subtle and may be revealed over the entirety of the text	• **Meaning:** More than one level of meaning with levels clearly distinguished from each other; theme is clear but may be conveyed with some subtlety	• **Meaning:** One level of meaning; theme is obvious and revealed early in the text.
Text Structure	• **Organization:** Organization is intricate with regard to elements such as narrative viewpoint, time shifts, multiple characters, storylines, and detail	• **Organization:** Organization may include subplots, time shifts, and more complex characters	• **Organization:** Organization may have two or more storylines and is occasionally difficult to predict	• **Organization:** Organization of text is clear, chronological, or easy to predict
	• **Use of Images:** If used, minimal illustrations that support the text	• **Use of Images:** If used, a few illustrations that support the text	• **Use of Images:** If used, a range of illustrations that support selected parts of the text	• **Use of Images:** If used, extensive illustrations that directly support and assist in interpreting the written text

READING LITERARY TEXTS

Features	Exceedingly Complex	Very Complex	Moderately Complex	Slightly Complex
Language Features	• **Conventionality:** Dense and complex; contains abstract, ironic, and/or figurative language	• **Conventionality:** Complex; contains some abstract, ironic, and/or figurative language	• **Conventionality:** Largely explicit and easy to understand, with some occasions for more complex meaning	• **Conventionality:** Explicit, literal, straightforward, easy to understand
	• **Vocabulary:** Generally unfamiliar, archaic, subject-specific, or overly academic language; may be ambiguous or purposefully misleading	• **Vocabulary:** Somewhat complex language that is sometimes unfamiliar, archaic, subject-specific, or overly academic	• **Vocabulary:** Mostly contemporary, familiar, conversational; rarely unfamiliar or overly academic	• **Vocabulary:** Contemporary, familiar, conversational language
	• **Sentence Structure:** Mainly complex sentences, often containing multiple concepts	• **Sentence Structure:** Many complex sentences with several subordinate phrases or clauses and transition words	• **Sentence Structure:** Simple and compound sentences, with some more complex constructions	• **Sentence Structure:** Mainly simple sentences
Knowledge Demands	• **Life Experiences:** Explores complex, sophisticated themes; experiences are distinctly different from the common reader	• **Life Experiences:** Explores themes of varying levels of complexity; experiences portrayed are uncommon to most readers	• **Life Experiences:** Explores a single theme; experiences portrayed are common to many readers	• **Life Experiences:** Explores a single theme; experiences portrayed are everyday and common to most readers
	• **Intertextuality and Cultural Knowledge:** Many references or allusions to other texts or cultural elements	• **Intertextuality and Cultural Knowledge:** Some references or allusions to other texts or cultural elements	• **Intertextuality and Cultural Knowledge:** A few references or allusions to other texts or cultural elements	• **Intertextuality and Cultural Knowledge:** No references or allusions to other texts or cultural elements

© 2012 by the ELA SCASS

Sample Annotated Literary Text: Lexile: 1030; Flesch-Kincaid: 7.6; word count 283
***Where the Mountain Meets the Moon,* by Grace Lin. (Common Core State Standards, Appendix B, p. 66). From Chapter 1.**

Far away from here, following the Jade River,

There was once a black mountain that cut into the sky like a jagged piece of rough metal. The villagers called it Fruitless Mountain because nothing grew on it and birds and animals did not rest there.

Crowded in the corner of where Fruitless Mountain and the Jade River met was a village that was a shade of faded brown. This was because the land around the village was hard and poor. To coax rice out of the stubborn land, the field had to be flooded with water. The villagers had to tramp in the mud, bending and stooping and planting day after day. Working in the mud so much made it spread everywhere and the hot sun dried it onto their clothes and hair and homes. Over time, everything in the village had become the dull color of dried mud.

One of the houses in this village was so small that its wood boards, held together by the roof, made one think of a bunch of matches tied with a piece of twine. Inside, there was barely enough room for three people to sit around the table—which was lucky because only three people lived there. One of them was a young girl called Minli.

Minli was not brown and dull like the rest of the village. She had glossy black hair with pink cheeks, shining eyes always eager for adventure, and a fast smile that flashed from her face. When people saw her lively and impulsive spirit, they thought her name, which meant quick thinking, suited her well. "Too well," her mother sighed, as Minli had a habit of quick acting as well.

Knowledge Demands

The setting in China and the references to rice planting may be unfamiliar.

Language Features

The language is mostly basic with a few challenging words, such as "coax" and "impulsive," and some figurative language.

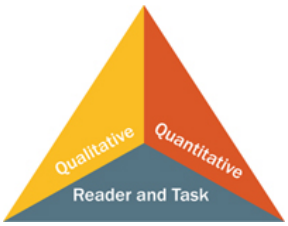
The sentences are lengthy with embedded clauses.

Text Structure and Meaning

The narrative is in a clear chronological order.

The meaning is implied, but it can be inferred from the description of the dull countryside at the beginning of this excerpt, which is sharply contrasted to the bright description of the main character in the last paragraph.

Worksheet: Literary Text Complexity Analysis		
Title	**Author**	**Text Description**
Where the Mountain Meets the Moon	Lin Grace	Literary text excerpt set in a village in China (283 word count, permissioned text)



Recommended Placement for Assessment: Grade 5

The quantitative Lexile and Flesch-Kincaid measures suggest an appropriate placement at the upper grades 4–5 band or early grades 6–8 band. The Common Core State Standards Appendix B (page 66) places this text in the grades 4-5 band level. The qualitative review supports grade 5. **Based on these sets of measures, this passage is of medium complexity and is recommended for assessment at grade 5.**

Qualitative Measures

MEANING
Moderately complex: The purpose is implied, but can be inferred from the bleak descriptions of the village and the contrast with Minli.

TEXT STRUCTURE
Organization: Slightly complex: The narrative is chronological with no text features.
Use of Images: n/a

LANGUAGE FEATURES
Conventionality: Slightly complex: The text includes some figurative language.
Vocabulary: Slightly complex: The vocabulary is mostly basic with only a couple of challenging words (coax, impulsive).
Sentence Structure: Moderately complex: Sentences are lengthy, with embedded clauses.

KNOWLEDGE DEMANDS
Life Experiences: Slightly complex: Life experience in the passage may be common.
Intertextuality and Cultural Knowledge: Moderately complex: The setting in China and references to rice planting may be unfamiliar.

Quantitative Measures

Common Core State Standards Appendix A Complexity Band Level (if applicable):

Grades 4–5

Lexile or Other Quantitative Measure of the Text:

Lexile: 990; upper grades 4-5 or early grades 6-8

Flesch-Kincaid: 5.8

Considerations for Passage Selection

Passage selection should be based on the ELA Content Specifications targets and the cognitive demands of the assessment tasks.

Potential Challenges This Text May Pose (check all that apply):

	Accessibility
X	Sentence and text structures
	Archaic language, slang, idioms, or other language challenges
X	Background knowledge
X	Bias and sensitivity issues
	Word count

Adapted from the 2012 ELA SCASS work

Appendix B: Reading Informational Stimuli

1. Qualitative Measures Rubric for Informational Texts
2. Sample Annotated Informational Text: *Narrative of the Life of Frederick Douglass, an American Slave, Written by Himself* by Frederick Douglass, Boston: Anti-Slavery Office, 1845
3. Sample Worksheet: Informational Text Complexity Analysis of *Narrative of the Life of Frederick Douglass, an American Slave, Written by Himself* by Frederick Douglass

The sample text has been evaluated based on both quantitative and qualitative measures as illustrated on the following pages. The sample annotated text is followed by a text analysis worksheet that uses the quantitative measures to suggest the appropriate grade band of the text and the qualitative rubrics to pinpoint the specific grade level.

Text Complexity: Qualitative Measures Rubric

READING INFORMATIONAL TEXTS

The ELA State Collaborative on Assessment and Student Standards (SCASS) developed the following qualitative measures rubric for informational texts. The rubric examines the following criteria judged as central to students' successful comprehension of text purpose, text structure, language features, and knowledge demands. Each of these categories is ranked based on descriptors associated with the following levels: slightly complex, moderately complex, very complex, and exceedingly complex.

Features	Exceedingly Complex	Very Complex	Moderately Complex	Slightly Complex
Purpose	• **Purpose:** Subtle, implied, difficult to determine; intricate, theoretical elements	• **Purpose:** Implied, but fairly easy to infer; more theoretical than concrete	• **Purpose:** Implied, but easy to identify based upon context or source	• **Purpose:** Explicitly stated; clear, concrete with a narrow focus
Text Structure	• **Organization of Main Ideas:** Connections between an extensive range of ideas or events are deep, intricate, and often implicit or subtle; organization of the text is intricate or specialized for a particular discipline	• **Organization of Main Ideas:** Connections between an expanded range of ideas, processes, or events are deeper and often implicit or subtle; organization may contain multiple pathways and may exhibit traits common to a specific discipline	• **Organization of Main Ideas:** Connections between some ideas or events are implicit or subtle; organization is evident and generally sequential	• **Organization of Main Ideas:** Connections between ideas, processes, or events are explicit and clear; organization of text is clear or chronological or easy to predict
	• **Text Features**: If used, are essential in understanding content	• **Text Features**: If used, greatly enhance the reader's understanding of content	• **Text Features**: If used, enhance the reader's understanding of content	• **Text Features**: If used, help the reader navigate and understand content but are not essential
	• **Use of Images:** If used, extensive, intricate, essential integrated images, tables, charts, etc., necessary to make meaning of text; also may provide information not otherwise conveyed in the text	• **Use of Images:** If used, essential integrated images, tables, charts, etc., may occasionally be essential to understanding the text	• **Use of Images:** If used, images mostly supplementary to understanding of the text, such as indexes and glossaries; graphs, pictures, tables, and charts directly support the text	• **Use of Images:** If used, simple images, unnecessary to understanding the text but directly support and assist in interpreting the written text

READING INFORMATIONAL TEXTS

Features	Exceedingly Complex	Very Complex	Moderately Complex	Slightly Complex
Language Features	• **Conventionality:** Dense and complex; contains abstract, ironic, and/or figurative language	• **Conventionality:** Complex; contains some abstract, ironic, and/or figurative language	• **Conventionality:** Largely explicit and easy to understand with some occasions for more complex meaning	• **Conventionality:** Explicit, literal, straightforward, easy to understand
	• **Vocabulary:** Generally unfamiliar, archaic, subject-specific, or overly academic language; may be ambiguous or purposefully misleading	• **Vocabulary:** Somewhat complex language that is sometimes unfamiliar, archaic, subject-specific, or overly academic	• **Vocabulary:** Mostly contemporary, familiar, conversational; rarely unfamiliar or overly academic	• **Vocabulary:** Contemporary, familiar, conversational language
	• **Sentence Structure:** Mainly complex sentences, often containing multiple concepts	• **Sentence Structure:** Many complex sentences with several subordinate phrases or clauses and transition words	• **Sentence Structure:** Simple and compound sentences, with some more complex constructions	• **Sentence Structure:** Mainly simple sentences
Knowledge Demands	• **Subject Matter Knowledge:** Extensive, perhaps specialized or even theoretical discipline-specific content knowledge; range of challenging abstract and theoretical concepts	• **Subject Matter Knowledge:** Moderate levels of discipline-specific content knowledge; some theoretical knowledge may enhance understanding; range of recognizable ideas and challenging abstract concepts	• **Subject Matter Knowledge:** Everyday practical knowledge and some discipline-specific content knowledge; both simple and more complicated, abstract ideas	• **Subject Matter Knowledge:** Everyday, practical knowledge; simple, concrete ideas
	• **Intertextuality:** Many references or allusions to other texts or outside ideas, theories, etc.	• **Intertextuality:** Some references or allusions to other texts or outside ideas, theories, etc.	• **Intertextuality:** A few references or allusions to other texts or outside ideas, theories, etc.	• **Intertextuality:** No references or allusions to other texts, or outside ideas, theories, etc.

Sample Annotated Informational Text: Lexile: 1030; Flesch-Kincaid: 7.6; word count 944
***Narrative of the Life of Frederick Douglass, an American Slave,* by Frederick Douglass.**
(Common Core State Standards, Appendix B, p. 71)

The plan which I adopted, and the one by which I was most successful, was that of making friends of all the little white boys whom I met in the street. As many of these as I could, I converted into teachers. With their kindly aid, obtained at different times and in different places, I finally succeeded in learning to read. When I was sent on errands, I always took my book with me, and by going one part of my errand quickly, I found time to get a lesson before my return. I used also to carry bread with me, enough of which was always in the house, and to which I was always welcome; for I was much better off in this regard than many of the poor white children in our neighborhood. This bread I used to bestow upon the hungry little urchins, who, in return, would give me that more valuable bread of knowledge. I am strongly tempted to give the names of two or three of those little boys, as a testimonial of the gratitude and affection I bear them; but prudence forbids;-not that it would injure me, but it might embarrass them; for it is almost an unpardonable offence to teach slaves to read in this Christian country. It is enough to say of the dear little fellows, that they lived on Philpot Street, very near Durgin and Bailey's ship-yard. I used to talk this matter of slavery over with them. I would sometimes say to them, I wished I could be as free as they would be when they got to be men. "You will be free as soon as you are twenty-one, but I am a slave for life! Have not I as good a right to be free as you have?" These words used to be trouble them; they would express for me the liveliest sympathy, and console me with the hope that something would occur by which I might be free.

I was now about twelve years old, and the thought of being a slave for life began to bear heavily upon my heart. Just about this time, I got hold of a book entitled "The Columbian Orator." Every opportunity I got, I used to read this book. Among much of other interesting matter, I found in it a dialogue between a master and his slave. The slave was represented as having run away from his master three times. The dialogue represented the conversation which took place between them, when the slave was retaken the third time. In this dialogue, the whole argument in behalf of slavery was brought forward by the master, all of which was disposed of by the slave. The slave was made to say some very smart as well as impressive things in reply to his master -- things which had the desired though unexpected effect; for the conversation resulted in the voluntary emancipation of the slave on the part of the master.

Language conventionality and clarity

Both long and short sentences with embedded clauses; wording is more formal than conversational.

Rich vocabulary: "testimonial," "bestow," "prudence," "disposed," "orator," "emancipation."

"Bread" used as an analogy.

Knowledge demands

Need understanding of time period of 1845 and what was happening in the U.S.

Perspective is first-person, narrated by a former slave.

Reference to "The Columbian Orator," a 19th c. schoolbook written to "improve youth … in the useful art of eloquence.

Structure and Levels of Meaning

P. 1 is a chronological account of how Douglass learned to read.

P. 2 relates a growing awareness of the burden of slavery through the reading Douglass did at a young age.

In the same book, I met with one of Sheridan's mighty speeches on and in behalf of Catholic emancipation. These were choice documents to me. I read them over and over again with unabated interest. They gave tongue to interesting thoughts of my own soul, which had frequently flashed through my mind, and died away for want of utterance. The moral which I gained from the dialogue was the power of truth over the conscience of even a slaveholder. What I got from Sheridan was a bold denunciation of slavery, and a powerful vindication of human rights. The reading of these documents enabled me to utter my thoughts, and to meet the arguments brought forward to sustain slavery; but while they relieved me of one difficulty, they brought on another even more painful than the one of which I was relieved. The more I read, the more I was led to abhor and detest my enslavers. I could regard them in no other light than a band of successful robbers, who had left their homes, and gone to Africa, and stolen us from our homes, and in a strange land reduced us to slavery. I loathed them as being the meanest as well as the most wicked of men. As I read and contemplated the subject, behold! That very discontentment which Master Hugh had predicted would follow my learning to read had already come, to torment and sting my soul to unutterable anguish. As I writhed under it, I would at times feel that learning to read had been a curse rather than a blessing. It had given me a view of my wretched condition, without the remedy. It opened my eyes to the horrible pit, but to no ladder upon which to get out. In moments of agony, I envied my fellow-slaves for their stupidity. I have often wished myself a beast. I preferred the condition of the meanest reptile to my own. Anything, no matter what, to get rid of thinking! It was this everlasting thinking of my condition that tormented me. There was no getting rid of it. It was pressed upon me by every object within sight or hearing, animate or inanimate. The silver trump of freedom had roused my soul to eternal wakefulness. Freedom now appeared, to disappear no more forever. It was heard in every sound, and seen in everything. It was ever present to torment me with a sense of my wretched condition. I saw nothing without seeing it, I heard nothing without hearing it, and felt nothing without feeling it. It looked from every star, it smiled in every calm, breathed in every wind, and moved in every storm.

Knowledge demands

Reference to (Lewis) Sheridan, who was an abolitionist

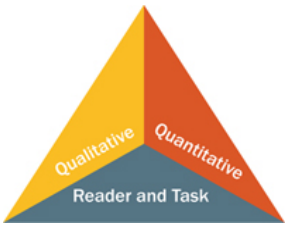
Language Tier 2 words:

choice	master
tongue	meanest
Language:	
denunciation	abhor
vindication	*loathe*
discontentment	
unutterable	detest

Levels of Meaning:

Douglass shifts from an account of learning to read, to the knowledge that reading brought him, to reflecting on how the awareness of his situation tormented him with injustice.

Worksheet: Informational Text Complexity Analysis		
Title	**Author**	**Text Description**
The Life of Frederick Douglass	Frederick Douglass	Informational literary nonfiction text excerpt from the classic autobiography (944 word count, public domain)



Recommended Placement for Assessment: Grade 9

The quantitative Lexile and Flesch-Kincaid measures suggest an appropriate placement between grades 6-8. The Common Core State Standards Appendix B (page 71) places this text in the grades 6-8 band level. The qualitative review, however, identifies this text as very complex. **Based on these sets of measures, this passage is of high complexity and is recommended for assessment at grade 9.**

Qualitative Measures

PURPOSE
Very complex: The purpose is implied, but can be inferred from the title and from very early on in the passage.

TEXT STRUCTURE
Organization of Main Ideas: Very complex: The narrative shifts between historical account and his reflections on the lessons of his early life, as well as how it later affected him. The perspective is first-person, told by a former slave.
Text Features: n/a
Use of Images: n/a

LANGUAGE FEATURES
Conventionality: Very complex: Includes both concrete and abstract or figurative language. The language overall is formal and will sometimes be unfamiliar.
Vocabulary: Very complex: There are instances of more challenging vocabulary (testimonial, bestow, prudence, disposed, orator, emancipation).
Sentence Structure: Very complex: Sentences are both short and long with embedded clauses.

KNOWLEDGE DEMANDS
Subject Matter Knowledge: Very complex: Some references with which students may not be familiar (Lewis Sheridan, the Columbian Orator).
Intertextuality: Very complex: Students with knowledge of the time period and US history of slavery will find the text more accessible than those without it.

Quantitative Measures

Common Core State Standards Appendix A Complexity Band Level (if applicable):
Grades 6-8

Lexile or Other Quantitative Measure of the Text:
Lexile: 1030; grades 6-8
Flesch-Kincaid: 7.6

Considerations for Passage Selection

Passage selection should be based on the ELA Content Specifications targets and the cognitive demands of the assessment tasks.

Potential Challenges This Text May Pose (check all that apply):

	Accessibility
X	Sentence and text structures
X	Archaic language, slang, idioms, or other language challenges
X	Background knowledge
	Bias and sensitivity issues
	Word count

Appendix C: Listening Stimuli

1. Qualitative Measures Rubric for Listening Stimuli
2. Sample Audio Stimulus: "Defining Sports"
3. Sample Worksheet: Audio Stimulus Complexity Analysis of "Defining Sports"

The sample audio stimulus has been evaluated based on both quantitative and qualitative measures as illustrated on the following pages. The sample stimulus is followed by an audio stimulus complexity analysis worksheet that uses the quantitative measures to suggest the appropriate grade band of the stimulus and the qualitative rubric to pinpoint the specific grade level.

Audio Complexity: Qualitative Measures Rubric

LISTENING STIMULI

The Smarter Balanced Assessment Consortium developed the following qualitative measures rubric for Listening stimuli. The rubric examines the following criteria judged as central to students' successful comprehension of audio stimulus purpose, auditory structure, oral language features, and knowledge demands. Each of these categories is ranked based on descriptors associated with the following levels: low complexity, medium complexity, and high complexity.

Features	Low Complexity	Medium Complexity	High Complexity
Purpose	• **Purpose:** Explicitly stated; clear, concrete with a narrow focus	• **Purpose:** Implied, but fairly easy to infer; more theoretical than concrete	• **Purpose:** Subtle, implied, theoretical elements
	• **Audience:** Speaker's approach is straightforward and transparent.	• **Audience:** Speaker's approach is somewhat layered and may include elements intended to persuade or influence audience.	• **Audience:** Speaker may include a variety of persuasive techniques; speaker may direct the message to multiple audiences, and the listener must decipher the meaning on more than one level.
	• **Presentation:** A single speaker presents the information.	• **Presentation:** Two or more speakers interact. Their patterns of communication may influence the meaning and flow of information.	• **Presentation:** Two or more speakers interact. The juxtaposition of the speakers may reveal a contrast or otherwise influence the meaning.

LISTENING STIMULI

Features	Low Complexity	Medium Complexity	High Complexity
Auditory Structure	• **Organization of Audio Text:** Connections between ideas, processes or events are explicit and clear; organization of text is clear or chronological or easy to predict.	• **Organization of Audio Text:** Connections between some ideas or events are implicit or subtle; organization is evident and generally sequential	• **Organization of Audio Text:** Connections between a range of ideas, processes or events are deeper and often implicit or subtle; organization may exhibit traits common to a specific discipline; organization may be different from chronological or sequentially (i.e., cause/effect, problem/solution, compare/contrast)
	• **Sound Variety**: Sound is distinct and approach is direct	• **Sound Variety:** Sound is somewhat layered. Overlapping voices or sounds require listener to integrate sounds for fullest understanding	• **Sound Variety:** Sound is multi-layered. Overlapping voices, music, or sounds provide context that listener needs to process (such as foreground noise, background noise, or music)
Oral Language Features	• **Conventionality**: Explicit, literal, straightforward, easy to understand	• **Conventionality**: Largely explicit and easy to understand with some occasions for more complex meaning	• **Conventionality**: Complex; contains some specialized abstract, ironic, and/or figurative language
	• **Vocabulary:** Contemporary, familiar, conversational language	• **Vocabulary:** Mostly contemporary, familiar, conversational; rarely unfamiliar or academic	• **Vocabulary:** Complex language that is sometimes unfamiliar, archaic, subject-specific, or academic
	• **Delivery:** Mainly direct, with simple declarative sentences	• **Delivery:** Somewhat variable—at times, speaker changes pitch and volume to create emphasis	• **Delivery:** Varied. Shifts in tone may be subtle and complex, requiring interpretation

LISTENING STIMULI

Features	• Low Complexity	• Medium Complexity	• High Complexity
Knowledge Demands	• **Subject Matter Knowledge:** Everyday, practical knowledge; simple, concrete ideas	• **Subject Matter Knowledge:** Everyday practical knowledge and some discipline-specific content knowledge; both simple and more complicated, abstract ideas; knowledge of speaker may affect interpretation of content	• **Subject Matter Knowledge:** Discipline-specific content knowledge; some theoretical knowledge may enhance understanding; range of recognizable ideas and challenging abstract concepts; knowledge of speaker or source affects interpretation of content
	• **Allusions/References:** No references or allusions to other texts, or outside ideas, theories, etc.	• **Allusions/References:** Some references or allusions to other texts or outside ideas, theories, etc.	• **Allusions/References:** Many references or allusions to other texts or outside ideas, theories, etc.
	• **Use of Images:** a range of images that help student understanding	• **Use of images:** minimal use of images that help student understanding	• **Use of images:** no use of images that help student understanding

Sample Listening Stimulus: Easy Listening Formula (ELF): 11.0; word count: 182

"Defining Sports"

Listen to the presentation. Then answer the questions.

Audio Transcript:

In the following presentation you will hear a speaker discuss a debate in sports.

For years, sports enthusiasts have debated what activities can be called sports. Supporters of limiting the use of the word "sport" claim that to be a sport an activity must be measured quantitatively. For example, they consider soccer a sport because the winner is determined by the number of goals scored. In contrast, they do not classify figure skating as a sport since judges give scores based on personal evaluation. Therein lies a contradiction, however. One cannot call skiing a sport when it involves a timed downhill race, and then call it something else in a competition of aerial tricks. Moreover, golf depends upon the quantitative measurement of strokes to determine a winner. However, the people in favor of limiting what activities can be called sports do not consider golf a sport.

Maybe the term "sport" should be defined as any activity that is based on competition, thereby eliminating restrictions based on the method with which winners are determined. Without the competition, it's just a display of physical talent. The heart of sports, after all, is the fight to be the best.

Worksheet: Audio Stimulus Complexity Analysis		
Title	**Author**	**Description**
Defining Sports	Cheryl Bradley	Informational stimulus (182 word count, commissioned)

Recommended Placement for Assessment: Grade 11

The quantitative ELF measures suggest an appropriate placement at grade 11. **Based on this set of measures, this audio stimulus is recommended for assessment at grade 11.**

Qualitative Measures

PURPOSE
Purpose: Medium complexity: Implied, but fairly easy to infer; more theoretical than concrete
Audience: Medium complexity: Speaker's approach is somewhat layered and may include elements intended to persuade or influence audience
Presentation: Low complexity: A single speaker presents the information

AUDITORY STRUCTURE
Organization of Audio Text: Low complexity: Connection between ideas is clear; sequence is linear; starts at beginning and proceeds to end
Sound Variety: audio not available at this time

ORAL LANGUAGE FEATURES
Conventionality: Medium complexity: Largely explicit and easy to understand with some occasions for more complex meaning
Vocabulary: Medium complexity: Mostly contemporary, familiar, conversational; rarely unfamiliar or academic
Delivery: audio not available at this time

KNOWLEDGE DEMANDS
Subject Matter Knowledge: Medium complexity: Everyday practical knowledge and some discipline-specific content knowledge; both simple and more complicated, abstract ideas; Knowledge of speaker may affect interpretation of content
Allusions/References: Low complexity: No references or allusions to other texts, or outside ideas, theories, etc.
Use of Images: n/a

Quantitative Measures

Easy Listening Formula (ELF) or Other Quantitative Measure of the Text:

ELF: 11.0

Considerations for Audio Stimulus Selection

Stimulus selection should be based on the ELA Content Specifications targets and the cognitive demands of the assessment tasks.

Potential Challenges This Stimulus May Pose (check all that apply):

	Accessibility
	Sentence and text structures
	Archaic language, slang, idioms, or other language challenges
	Background knowledge
	Bias and sensitivity issues

Appendix D: Annotated CAT Sample Stimuli for Claim 2 (Writing) Items

The following samples are intended to provide a guide for item writers challenged with determining what appropriate stimulus "looks like" at various grade levels for Claim 2 (writing) Items. While no one set of guidelines or check list can capture all the nuances of grade-appropriate writing, we hope the following samples will help to illustrate the information in the stimulus specifications document.

Grade 3, Target 1a–Organization (Item 59415) **A student is writing a story for his English class about being late for school one day. Read the beginning paragraph from the story and complete the task that follows.** This morning, I woke up late. My alarm clock never went off! The only reason I woke up at all was because I heard my dog barking. I walked down the hall to my mother's room to find she was still in bed. "Mom! Wake up," I yelled. "I think we both overslept." I looked over at the clock and it was 7:30 a.m. School starts in one hour—great! I jumped out of bed in a flash, and ran into the bathroom. There, I brushed my teeth, washed my face, and then looked in the mirror. My hair was standing straight up! I combed it down with water as fast as I could. After that, I threw on some clothes and shoes. Racing into the kitchen, I grabbed my backpack from the table and an apple from the fruit bowl. "Bye, Mom!" I yelled as I pushed through the screen door letting it slam shut behind me. As I ran for the sidewalk, I watched the bus pull away from the curb and turn down the next street. Soon it was out of sight. **Question:** **Write an ending to the story that follows from the events and experiences in the story.**	• The situation is one most students can relate to. Even if they don't take a school bus, there are enough details in the stimulus to communicate a clear "problem" for the writer to "solve" by writing "what happens next" (apple for breakfast, only an hour left, hair standing out, etc.). • The sparse dialogue, short sentences, dashes, and exclamation points all serve to echo the narrator's anxiety (rather than reflect immature choppy writing). These techniques also communicate a clear mood for the story.

Grade 3, Target 6a—Organization (Item 60738) **A student is writing an opinion letter for a class newsletter about serving flavored milk in school cafeterias. Read one paragraph from the draft of the letter and complete the task that follows.** Some people believe that schools should not serve flavored milk at lunch. According to them, students get too much sugar. It is true that flavored milk has more sugar than plain milk, but some students just will not drink plain milk. If that happens, they will not get the necessary calcium, vitamins, and other nutrients. That can't be good. Drinking flavored milk is certainly healthier than not drinking any milk at all. **Question:** **The beginning of the student's letter does not state his/her opinion. Write an opening paragraph that clearly states the opinion and explains what the topic is about.**	• The topic is of interest to students, making this an appealing stimulus for the grade level. • This stimulus is very short, but the preamble states that it is just *one* paragraph from a draft. Still, there is sufficient information for students to write an introduction with a clear opinion on the issue. • Again, despite brevity, the sentence structures (simple, compound, and complex) are mature and the sentences vary in length. • Some strong word/phrase choices reinforce the purpose. • The writer wants to support the opinion by proving why those against it are wrong and that is a sophisticated approach; however, phrases such as "according to them" and "It is true" help readers navigate the reasoning and clearly see the writer's opinion. • There are some specific reasons offered.

Grade 4, Target 6a—Organization (Item 62470) **Monica is writing an opinion essay for class about allowances. Read the draft of the body of her essay and complete the task that follows.** When I was eight years old, my parents gave me a list of chores to do each week. If I did my chores, I received an allowance of three dollars. But if I did not do my chores, I did not get my allowance. Since there was always something I wanted from the dollar store, my parents knew they could count on me to get my chores done on time. Giving children an allowance helps them learn how to handle money. They learn the value of a dollar and get a sense of what things cost. They also need to learn how to save money and how to figure out how much they need to earn to buy the things they want. In other words, kids learn to make smart choices. An allowance for children can even help parents. It is hard for working parents to keep up a household these days. By doing tasks around the house, children can be a big help to their parents even as they earn their own money. All in all, I am glad my parents helped me learn about our house and about managing money. Both skills will help me throughout my life. **Question:** **The beginning of the student's opinion essay does not state her opinion. Write an opening paragraph that clearly states the opinion and explains the topic.**	• This stimulus is actually slightly above grade level readability but certainly accessible to grade 4 students, most of whom probably do chores at home. • There is some nice sentence variety. For example, sentences starting with phrases and dependent clauses balance subject/verb/object sentences. • The writing is coherent: many transitions are subtle; others are straightforward ("in other words" and "all in all") to reinforce key concepts. • Some generalizations made enhance the stimulus, beginning to move students beyond just "themselves."

Grade 4, Target 3a—Organization (Item 59119) **A student is writing a report for her teacher about a place she visited on a recent class trip. Read the draft of the report and complete the task that follows.** We had a great time at the "world's largest children's museum." We dug for fossils in the Dinosaur Dig and saw some creepy mechanical insects. The museum had a unicorn beetle, a praying mantis, a scorpion, a black widow spider, a carpenter ant, and a dragonfly. Some of us even climbed a limestone wall and checked out mummies. Before we left, we visited the Planetarium, where we learned how a telescope works and saw the Milky Way. Looking at the stars on the ceiling made it easy to understand why David Wolf was inspired to become an astronaut when he visited the museum as a nine-year-old boy. Our trip ended too soon. But we have some great memories of our visit to this famous place. **Question:** **Write an introduction that clearly states the main idea of the paper and sets up the information to come in the body of the report.**	• This strictly informative (rather than explanatory) stimulus provides two body paragraphs with distinctly different subtopics for a report on a field trip to a children's museum. This allows students to write a coherent introduction that will set up the context for the subtopics. • Although many of the sentences remain subject/verb/object, there is sufficient variety to reflect the developing skills of intermediate writers (e.g., phrases such as "Before we left…," "Looking at the stars…"). Other syntactic complexities include compound verbs and a variety of dependent clause types. • Some specific vocabulary is evident ("inspired" rather than "made him want").

Grade 4, Target 6a—Organization (Item 64718) **Leo is writing an opinion letter to his principal about why his teacher should be named Teacher of the Year. Read the draft of his letter and complete the task that follows.** Dear Dr. Martin, I'm writing to you about the Teacher of the Year contest for our school. My teacher, Ms. Roland, should win the contest. The school year isn't over, but she has already made a big difference to me. Ms. Roland is more than a good teacher; she's also a great person. Ms. Roland takes the time to explain what she teaches. If a student doesn't understand the topic, she will go over the subject matter again. If the student still doesn't understand, she will work with that student while others are doing classwork. ***Just yesterday,*** Ms. Roland took time to explain a math problem I could not figure out. Ms. Roland does the best she can to make sure we all learn. Ms. Roland is kind enough to bring in extra school supplies. Some students run out of their own pencils or paper, and Ms. Roland will go to her desk and get more for them. I always forget my erasers, ***so*** Ms. Roland gave me two — and even wrote my name on them in permanent marker. How nice! Ms. Roland stays after school to tutor students in reading. I'm sure she has a lot to do after school, like grade our work and get ready for the next day. But she will stay as long as a student needs her help. ***Earlier in the year***, I was behind in my reading because I just couldn't make sense of what I was trying to read. ***One afternoon***, Ms. Roland spent an hour helping me find the key words and look up words I didn't know. I have stayed after school many afternoons, and Ms. Roland has always been patient with me. ***Now***, I'm reading at an even higher level than before. I could not have done it without her help. **Question:** **Leo's letter is missing a conclusion. Write a paragraph that concludes Leo's letter supporting Ms. Roland as Teacher of the Year.**	• This is an example of a longer stimulus, which is appropriate for the task--writing a conclusion. Despite the length, the writing is straightforward and accessible to 4th grade students. • Grade 4 writers are expected to write opinion-based texts for 6a rather than "argument," which is required in grade 6. Nonetheless, this stimulus shows support for an opinion that moves beyond the strictly personal. The reasons (such as she "explains what she teaches") are supported by examples that move from general to specific ("if a student…" followed by "Just yesterday…I could not figure out"). Some specific details then lead to generalizations ("…does the best she can to make sure we all learn"). • There are some sophisticated writing elements, ones that might not typically be associated with grade 4, that keep this stimulus from sounding formulaic (e.g., punctuation such as **semi-colon** and **dash**; commentary such as "How nice!"). • There are a range of sentence types (Simple, Compound, & Complex) and sentence lengths. Easy but not formulaic ***transitions*** provide coherence ("Earlier in the year…," "One afternoon…," "Now,…").

Grade 5, Target 1a—Organization (Item 56178) **A student is writing a story for class about a visit from a cousin from South America. Read the first paragraph of the story and complete the task that follows.** **Just yesterday** my parents surprised me with the news that my cousin was coming today to stay with us for a few weeks. The news made me excited and worried. I did not know much about Joe. For years he has lived in Peru in South America, and I have never met him. I know that his father is my mother's brother, and I know that he, like me, is ten years old. *What, I wondered, would he be like? Will he get along with my family? Will our life be strange to him*? My parents laughed at my concerns and said that he and I would get along great. Besides, they said, Joe has spent time in this country and knows some things about life here. My mother said that he would like to meet my neighborhood friends. She said that he would fit right in right away. I wasn't sure about that, but I'm going to find out **in a few minutes**. We are at the airport, and Joe's plane has just landed. As the passengers get off the plane, I try to guess which one could be Joe. Then my mother shouts, "There he is!" **Question:** **Write what happens next between Joe and the narrator.**	There are some notable features that make this sample suitable for a 5th grade writer: • While most sentences are still subject verb object, students are beginning to vary structure (Simple, Compound, Complex, even Compound-complex). • While still relying on some general language ("would get along great"), intermediate writers start to incorporate more task-specific word choices ("concerns" so as not to repeat "worried"). Also uses simple phrases effectively ("like me"). • Uses questions effectively to engage reader. • *Inner dialogue* is used effectively through the entire piece so that the reader can "visualize" the narrator's feelings. • The movement of time from "just yesterday" to "I'm going to find out in a few minutes" is a mature feature and sets up the coming action nicely for the writer. These **transitions** enhance coherence. • Note that the stimulus *nicely* sets up "the problem" for writers to solve via narrative.

Grade 6, Target 3a—Elaboration (Item 63698) **The student is writing a report for English class about community service. Read the draft of the introduction to the report and complete the task that follows.** Taking a few hours out of our busy week can make a world of difference for a community. Choosing to spend a couple of hours a week serving a local area can be a useful volunteer service. Community leaders are always looking to improve the place they and their neighbors live in. They are always seeking volunteers to serve in many parts of the community. Students can greatly benefit the community by being those volunteers. The student took these notes from reliable sources. Community service activities can include: • cleaning up trash along a highway • planting a tree • shoveling snow off sidewalks • cleaning cages at an animal shelter • walking and bathing dogs • visiting the elderly • raising funds for a local charity by running in a race • holding a game night for kids • supporting friends who sing or play in a band **Question:** **Using information from the student's notes, write one or two paragraphs developing and elaborating the ideas introduced in the first paragraph.**	• Although the stimulus is "just" an introduction, the introduction sets the expectation for an equally coherent response. • While less proficient writers may be tempted to "list" details from the notes; the question specifically directs students to develop/ elaborate the ideas and the exemplar shows elaborated details. • Word choices are as specific as they can be for an introduction ("benefit" and "a world of difference" rather than "do good things"). • Students in middle school are beginning to use verbals and this sample uses participial, infinitive, and gerund phrases effectively. The use of phrases also helps vary the sentence structures. • The notes provide sufficient information for elaboration, yet the information cannot simply be cut-and-pasted. Note also that while the details are mostly examples, they get beyond personal examples by emphasizing the larger community.

Grade 6, Target 6a—Organization (Item 54277)

A student is writing an article for the local humane society newsletter in honor of National Adopt a Shelter Cat Month. This article argues that cats are the best choice to have as a pet. This is the student's first draft of the article. Read the draft and complete the task that follows.

The Purr-fect Pet

When pondering the adoption of a pet, there are many options available at your local pet shelter. After learning more about the various types of pets, you may soon discover that a cat would make the best pet for you.

First of all, according to veterinarians and small animal breeders, cats are usually calm and quiet. They are unlikely to disturb neighbors with their quiet purring. In contrast, dogs that persistently bark may annoy those who live close by. It is important to be courteous to neighbors, especially if you live in an apartment or have close neighbors. Even if you are looking at a well-behaved and quiet dog, there are other reasons to consider a cat instead.

Cats require a minimal amount of work from their owners. Cats know how to groom themselves, so owners do not have to recall the date of the last kitty bath. In addition, cat owners will notice that cats demand less daily attention than dogs. Unlike dogs that need to go outside at least once each day for exercise, cats can get all the activity they need indoors. Cats also do not need to be taken out to take care of other physical needs. While it's true that cat owners pay money for litter boxes, a cat owner will not need to purchase fancy toys because a cat can find a paper bag, a box, or a few balls of wadded paper to be a great source of entertainment.

Question:
This essay is missing a conclusion. Write a concluding paragraph that follows from and supports the argument.

- The introduction is broad enough (sets the context for the "argument") and there is enough specific information in the body paragraphs for the writer to generalize about the argument (rather than repeating points) in the conclusion.
- Sentence structures are varied (paragraph 3 moves from simple to compound to complex) and sentence lengths are varied
- Vocabulary is mature but easily determined from context.
- Despite traditional transitions choices, there is syntactic maturity.
- "According to veterinarians and small animal breeders" shows the transition to "credible evidence" from opinion-based examples more prevalent in earlier grades.

Grade 7, Target 6a - Organization (Item 58242) **Mary is writing a letter to students and teachers about the amount of homework teachers should assign. Read her letter and complete the task that follows.** Homework serves at least three purposes. To begin with, it gives students a chance to practice what they have learned in class. This reinforces classroom lessons and helps students remember them. Homework also helps students learn to manage their time--a skill that will be essential as they become more involved in extracurricular activities in middle school and high school. Finally, homework helps students develop study skills that they will use throughout their academic and professional lives. Teachers should not give an excessive amount of homework, however. Certainly, the proper amount of homework--about 10 minute per grade level per night, according to some experts--is beneficial. But an excessive amount has harmful effects. Too much homework can negatively affect family life. For example, kids might not have time for dinner--an important time for family members to connect with one another. Also, too much homework can harm families by causing arguments between children and their parents. Excessive homework can rob students of time for other activities such as sports or music lessons. Worst of all, too much homework can cause students to hate school, something that obviously discourages learning. In conclusion, students who want to make higher grades need to do their homework. But teachers who want students to learn and be better prepared and well-rounded need to not give too much homework. **Question:** **Write an introductory paragraph to Mary's letter that establishes and introduces a clear claim about an appropriate amount of homework.**	Grade 7 is the first grade to require students to address the counterclaim. This stimulus shows the beginnings of this progression. • The first body paragraph presents and explains a clear claim about the purposes for homework. While this paragraph is highly formulaic (even at grade 6 *and* even if the number three is appropriate for the available support, transitions should be more subtle and not always occur at the beginning of the sentence). • The second paragraph *nicely* addresses (rather than just acknowledges) the opposing view point via concession and then moving to show why the opposing point of view falls short. While some of the "evidence" is still anecdotal, there are references to credible sources and some specific examples. As grade level increases, so should the nature of the evidence; more verifiable and specific information, such as actual data, would enhance this stimulus. • Sentence structures and lengths are increasingly mature and varied. • Strong vocabulary fits the tone and enhances the purposes ("reinforces," "manages," "academic and professional lives," "discourages").

Grade 7, Target 6a–Elaboration (Item 58515) **A student is writing a letter to the editor for the student newspaper about adopting dogs from shelters. Read the draft of the introduction to the letter and the student's notes, and then complete the task that follows.** If you and your family are thinking of getting a puppy, you should consider adopting one from an animal shelter. Although you could buy a puppy from a breeder, there are many good reasons for adopting from a shelter instead. Considering all the evidence can help families make an informed decision. The student took these notes from credible sources: • Shelters have many different types of dogs. • When you adopt a puppy from a shelter, you give it a second chance. • More than 25% of shelter dogs are purebred. • You can buy a puppy from a responsible dog breeder. • Responsible breeders keep their puppies in clean homes. • The average cost to own a dog for one year is between $600 and $900. • About 62% of all households in the United States have a pet. • A recent poll done by a shelter in Ohio showed 70% of people want dogs under one year old. • Shelters have older, mature dogs and also have puppies. • Breeders usually sell only puppies. • In the US there are 164 million pets, and 1 in every 20 will end up in a shelter by the end of the year. **Question:** **Write at least one paragraph supporting the writer's claim and at least one paragraph acknowledging the counter-claim. Use information from the student's notes in your paragraphs.**	• The notes provide a mix of verifiable "evidence," including actual data, and "credible" but anecdotal evidence. The evidence allows for integration of information (e.g., not all the information would necessarily be used). • Grade 7 is the first grade to require that students at least acknowledge the counterclaim and there is enough information in the student's notes for the counterclaim to be addressed. • Words/phrases such as "responsible breeders," "animal shelters," etc. enhance the argumentative purpose without being overly academic.

Grade 7, Target 3a—Elaboration (Item 59457) **A student is writing an article for a school newsletter explaining the purpose of seating charts. Read the draft of the student's first paragraph and complete the task that follows.** "Please take your seats," your teacher instructs, and you do as directed. You take the seat in the second row, third seat from the window. And why is that seat--and not the one in front or in back of it--your seat? Because your teacher uses a seating chart, and the seating chart says so. Although their purpose may not be immediately obvious to students, seating charts are useful for several reasons. The student took these notes from reliable sources: • Teacher is in control • Student names would be hard to learn • Benefits more than the teacher, i.e., counselors, computer specialist, administrators • Students don't like them • Organized classroom • Used in more places than the classroom, i.e., sporting events, concerts, plays, wedding receptions, and even business meetings **Question:** **Using the information in the student's notes, write one to two paragraphs that support the introduction.**	• While this stimulus is relatively short and straightforward, it is interesting enough to engage students. Specifically, the stimulus begins with a piece of dialogue (one that students have heard many times) and then uses a question with an [effective] sentence fragment as an answer. These techniques effectively hook the student. • The paragraph ends with a clear pathway for students to continue the response. • Sentence variety and structure, along with well-chosen word/phrase choices, help set a tone that once again engages students (e.g., fragment, using dash for interrupter)—readers can "hear" the tone. • Student notes provide sufficient information, yet they don't invite cut-and-paste listing.

Grade 8, Target 1a—Elaboration (Item 61955) **Austin is writing a realistic narrative about persistence for a class anthology. Read the draft of the introduction of his narrative and complete the task that follows.** Ken, my athletic rival throughout elementary and junior high, always had a knack for tackling new challenges and succeeding without really trying. Athletics simply came easily to Ken. It always seemed that I had to compete with blood, sweat, and tears just to be able to make it through tryouts. Although I was praised by the coaches for my hustle and effort, in the end, I would often be one of the players cut from the team. It was a constant uphill battle to measure up to Ken, but it was a mountain I was determined to climb and conquer. **Question:** **The student's draft introduction begins to describe a time when he faced a challenge and persisted until he achieved his goal. Write one to three paragraphs describing how Austin resolves his conflict.**	• What makes this [brief] stimulus appropriately rigorous (because the subject itself could be appropriate for most any grade level) is language use. Language choices are specific and lively ("knack for tackling," "uphill battle…mountain" "blood, sweat, and tears"). • Stimulus demonstrates sophisticated use of sentence structures (e.g., appositive/noun phrase, interrupters such as "in the end," varied sentence lengths). • As a narrative for grade 8, this stimulus invites a response that is more than just "tell a story about…;" instead, the stimulus encourages character development and invites reflection--mature characteristics of a nuanced narrative. • The question leaves room for a resolution that doesn't necessarily rely on "beating" Ken.

Grade 11, Target 6a—Elaboration (excerpt from Item 57950)

When considering the proposed 9 p.m. curfew for people under 18, please consider carefully the negative effects that such a curfew could have on parents, students, and our local economy. Please also keep in mind that age does not define maturity.

In addition to harming the high school students, the proposed curfew could hurt the community as a whole.

Rather than the government imposing a curfew, why not leave it up to parents to set and enforce such rules for their teenagers? If underage drinking and the illegal distribution of drugs and alcohol are problems that you believe are associated with late-night teen activity, focus on those activities and the small minority of teens who engage in them. Don't punish local business people, parents, and the vast majority of teens who act responsibly for the misbehavior of a few.

Student Notes:

- New methods of instruction being instituted by colleges and universities; teachers requiring students to work on group projects.
- Students working/studying in the evening after extracurricular activities
- Families struggling in tough economic times; some students needing part-time jobs to help support families
- City council president announced last week that she opposes penalizing students for being involved in sports/extracurricular activities
- Supporters of the curfew: according to a study commissioned by the district attorney, it will prevent crime; most teens responsible and don't break the law
- The U.S. Secretary of Labor acknowledged that these are harsh economic times; local businesses can't afford to lose customers
- If students have to give up extracurricular activities to take earlier shifts, it could hurt their college prospects; with new College and Career State Standards, colleges and universities raising standards for admission: don't create more obstacles for college qualification.
- A recent countywide survey found that a majority of parents with both high school and younger children believe that the proposed curfew will force them to drive students who could drive themselves, making it difficult for them to care for younger children at home.

Question:
Using the underlined topic sentence, complete the second paragraph. Use information from the student's notes in your paragraph.

Characteristics that make this a model of strong 11th grade student writing:

- Mature syntax choices including complex sentences with dependent clauses of various types (adverb, adjective, noun) and in various positions.
- Rhetorical question effectively used.
- Effective word choices for audience without being didactic or overly-scholarly.
- Makes sophisticated generalizations instead of clichéd claims.
- Mature use of modifiers/phrases e.g., "late night teen activity" as opposed to the wordier "activities teens participate in late at night," which is what a younger student would write.
- The notes offer sophisticated information; students need to locate and use the relevant information to support the claim.

Grade 11, Target 1a—Elaboration (Item 82541)

A student is writing her college admissions essay (or job application essay) that asks about a challenge she has met. Her draft "tells" about a challenge she has faced and ends with reflection on the experience, but she wants to "show" her audience by adding narrative to the middle of the essay.

I have always been the best player on the team. I have played women's club volleyball since the age of seven and was invited to play with the elite "traveling team" by the age of twelve. Being "first team" was never in question; my coaches' only decision was always which position I would play, as I excelled at all. In retrospect, you might say--at best-- I was confident; at worst, I was cocky.

Being the team diva, I assumed that of course I would be the team captain for senior year. Who else would they choose? There was no other choice. Right? Wrong! I take you back to August, day one of preseason.

The coach welcomed new and old players, and then moved forward with the business of the day by saying, "Our first order of business is electing a captain. Your captain will represent you all season, she will be the one to pick you up when you are down, and pat you on the back when you excel."

Looking at each senior, and finally at me, she challenged us to "Think carefully about who you want to lead and represent you this year, and then cast your vote."

They did. I was not the new team captain.

Losing out as team captain was not the end of the world; in fact, it was one of the best things to happen to me. I had forgotten—if I ever knew at all-- that to be a leader, one must first be an integral part of the team. One doesn't lead from the outside; one must lead from within.

Question:
Write two or three narrative paragraphs that show the narrator in action, using narrative techniques such as dialogue and description.

- This sample shows narrative writing at the high school level: narrative in the service of another, larger purpose (in this case, a college or job application). The item stimulus sets up a clear segue into the narrative portion. Furthermore, the ending provides the reflection, the "so what," called for in conclusions at this grade level.
- The sentences are mature, combining a range of techniques from juxtaposed ideas, questions (and retorts). Phrases are well-chosen for the audience and purpose (participial and gerund)
- Rhetorically effective punctuation such as the semi-colons, questions and dashes, help reveal the character, helping the reader "hear" the writer's thoughts.
- The vocabulary is mature yet engaging and appropriate for the narrative purpose

Appendix E: Stimulus Specifications for Performance Tasks

Purpose: Because the stimulus specifications for Performance Tasks are similar to the stimulus specifications for Computer Adaptive Test (CAT) items, a separate set of guidelines is provided for only the components of the Performance Task stimuli that are unique and may differ from the CAT stimuli specifications.

I. Stimuli for Classroom Activities

Classroom Activities are a unique feature of Performance Tasks. The purpose of the Classroom Activity is to "level the playing field" by providing students with a more consistent level of access to the topic(s), central concept(s), or domain-specific vocabulary that is necessary for understanding and completing the Performance Task. The activity may build on or activate students' prior knowledge of the topic, build students' interest in the topic, and/or engage students in small group and whole group discussions as a "warm up" to the Performance Task. Thus, the Classroom Activity must be specific enough to provide support to students in understanding the Performance Task that is to follow.

Another important function of the Classroom Activity is that it sets the context for 5-6 individual Performance Tasks on the same topic. As such, the Classroom Activity must also be broad enough to support access to all of the individual Performance Tasks in the task set.

Classroom Activities may be a maximum of 30 minutes in length.

Given these purposes and constraints of the Classroom Activity, the following are guidelines for the selection of stimuli that may be used during the Classroom Activity:

- **Stimuli for the Classroom Activity must be accessible to all students.** If images or audio stimuli are used, they must be able to translated/transcribed into a form that is accessible to all students, including the visually or hearing impaired (e.g., Braille, transcript). (See "Guidelines for the Inclusion of Images" on page 8 of the ELA Stimulus Specifications for a more detailed list of images that can be translated into accessible forms.) Audio or visual images in the Classroom Activity that cannot be translated into an accessible form should not be used. In addition, care must be taken in the use of texts that convey visual imagery or references to sounds that might not be in the realm of experience for visually or hearing impaired students. These may be used, as long as they are NOT crucial for understanding the topic(s), concept(s), or domain-specific vocabulary necessary for completing the Performance Task successfully.

- **Stimuli that are texts should be short and easy to read**. The complexity of any textual stimuli in the performance task should be at approximately the lower end of the target grade level. The vocabulary used in the stimulus for the Classroom Activity should be on or below grade level. Because of the 30-minute limitation of the Classroom Activity, texts should not exceed the upper word count for a "short text" used in the CAT items (see page 14 of the *ELA Stimulus Specifications*). **Stimuli that are texts should be accessible to English learners,** avoiding the use of unnecessary specialized vocabulary, idioms, and other expressions that are likely to be unfamiliar to English learners.

- **Stimuli from the PTs cannot be used in the Classroom Activity** *unless that stimulus is used in every task in the task family* because it would give an unfair advantage to students who received the Performance Task with the specific stimulus that is re-used in the Classroom Activity.
- **If the use of textual or visual stimuli are necessary for the Classroom Activity,** it should not be assumed that schools will have technology in every room to project text or images onto a screen, equipment (computers, televisions, DVD players) or other specialized resources such as world maps or globes. If color photos or visuals are included, states or districts will need to provide these in hard copies to the school as it cannot be assumed that schools will have the capacity to provide color printing.

II. Scenario of the Performance Task

Each Performance Task includes a scenario that sets up the context, purpose, and audience for doing research and writing. The purpose is to provide an authentic context and purpose that motivates students to engage in the task. This provides additional reading that a student must do to complete the task appropriately.
Given these purposes of the scenario, the following are guidelines for text that may be used in the scenario:

- The scenario should be short, generally a paragraph of 3-7 sentences (3-5 sentences at Grades 3-4; 5-7 sentences at Grades 5-11), so that a student does not have to spend a great deal of time reading the scenario.
- The scenario should be simple and simply worded so that the purpose for research/writing and the audience is clear and easy to understand.
- The scenario should not tell students the specific writing prompt for the full-write but may indicate a general purpose and context for writing so that students read the sources with a purpose in mind.

III. Stimuli Used in the Performance Task

Each Performance Task includes 2-5 sources, depending on the grade level. See below for the allowable number of sources for each grade span:

Grade Span	Number of Sources
3	2
4-5	3
6-8	3-4
11	4-5

Because students must read and integrate multiple sources within a given amount of time, the sources as a whole should not exceed the maximum word counts below.

Grade Span	Maximum Word Counts
3	1000
4	1400
5	1400
6	2400
7	2400
8	2400
11	3400

- Within a Performance Task set, a stimulus may be used in a second Performance Task. If this is done, it must be with different companion stimuli. In addition, the second Performance Task must have a different focus so that students are looking at the repeated stimulus in comparison to others that are completely different from the first Performance Task.

- **Fully accessible tasks.** In at least **ONE** of the individual tasks within a single task set of 5-6 tasks, **the full set of stimuli must be accessible to all students.** If images or audio stimuli are used, they must be able to be translated/transcribed into a form that is accessible to all students (e.g., Braille, captioning/transcript). (See "Guidelines for the Inclusion of Images" on page 8 of the ELA Stimulus Specifications for a more detailed list of images that can be translated into accessible forms.) Audio or visual images that cannot be translated into an accessible form should NOT be used. In addition, care must be taken in the use of texts that convey visual imagery or references to sounds that might not be in the realm of experience for visually or hearing impaired students. These may be used, as long as they are NOT crucial for understanding the topic(s), concept(s), or domain-specific vocabulary necessary for completing the Performance Task successfully.

- In the remaining tasks within a task set, **stimuli should generally be accessible to most students**, but there may be visual or audio stimuli included in the set of sources that are not fully accessible.

- **Simulating authenticity.** Stimuli should be presented as a set of sources that students might authentically find through a search, in alignment with the context of the writing assignment. The set of stimuli should come from resources that might be available to students in the classroom, library, or the Internet. They should not include writing such as personal letters/emails that would never show up as a result of a search, with the exception of those that can be considered primary sources.

- **The set of stimuli within a task should vary in content**. The content of the sources should vary and represent multiple perspectives or different facets of a topic so that students must pull evidence and examples from different sources in their responses to the constructed-response research questions and the full-write. In order to reduce the temptation for students to directly copy large segments of text, none of the sources should in themselves comprise a full response to the culminating writing assignment. Overall, the sources should offer more factual information and sourcing than just unsupported opinions.

- **In informational/explanatory tasks:** The set of sources should provide enough evidence that allows students to establish and support a thesis/controlling idea, rather than simply restating the ideas within the sources.

- **In opinion/argumentation tasks:** The set of sources should support both sides of an issue. The set of sources should be balanced so that a particular opinion is not privileged; the sources should allow for students to support different opinions. For an argumentative task, sources should cover the subject sufficiently enough to allow students to form a claim and address the counterclaim.

- The set of Performance Task stimuli should come primarily from authentic permissionable sources (CCC-approved or public domain sources). In these cases, stimuli may not be modified but may be excerpted using ellipses (…) to indicate where text has been left out. Domain-specific and low-frequency vocabulary words that may be too difficult for students may be defined using brackets [ ] or a footnote if they are key to comprehending the stimuli.

- If authentic permissionable and public domain sources have been exhausted, commissioned sources may be used. In this case, a strong justification should be made as to why the commissioned source must be used (e.g., lack of grade-level appropriate sources on the topic).

- **The set of stimuli may vary in credibility or usefulness.** Because the ELA Performance Tasks are research tasks that require student selection and evaluation of sources for credibility/relevance, the stimuli may vary in credibility and usefulness.

- Each stimulus/source should be preceded by an introduction to the source, including the publication name and date, author's expertise/position in relation to the topic, type of publication (if relevant), topic of the source, purpose, audience, or other context information that will allow students to evaluate the source.

- Each permissionable or public domain source should be followed by a formal citation of the source using APA formatting.

- For commissioned stimuli (those that are written based on a composite of sources), an authentic source should be simulated but should not use made-up publication titles or individual names. In other words, rather than making up the name of a newspaper and author, use general roles or types of publications (e.g., "This editorial about homework was written by a parent and published in your local newspaper."; "This article comes from a psychology journal and was written by a psychology professor.") A list of references that the article was based on should be included at the end of the article, using APA formatting.

- **Within informational texts used in Grades 6 and higher, when it is important for students to evaluate the credibility of sources**, stimuli should vary in the extent to which sources are cited (i.e., through in-text citation) to aid the student in assessing the reliability of the information presented in the sources. When source references are available (e.g., footnotes), these should be cited using APA formatting as appropriate to the source genre. When sources are cited, a reference page should be included with the full references to the sources cited using APA or MLA formatting as appropriate.

- **The set of stimuli should vary in style and format to improve accessibility to students.**

- **Use of visuals.** When appropriate, visuals may be used to support access to the text. Visual/graphic sources that are included within the stimuli should serve a purpose (e.g., making an abstract concept, idea, or process described in the source more understandable, providing additional information relevant to understanding the topic or subtopic). They should be highly relevant to the topic or subtopic of the source, and not introduce distracting or irrelevant information.

- Visuals should be simple and easy to interpret. They should not add significantly to the reading load. Tables or graphs should not require the use of mathematical computation to interpret their meaning.

- Visuals may often come with an authentic source. These may be used provided the image copyright is covered by the CCC or is public domain.

- When a Performance Task includes 3- 5 sources, one source may be a visual source in itself. When a visual stimulus is used as a source in itself, it should have a substantive purpose and provide information that can be used in the constructed response questions or essay. For Grade 3 Performance Tasks, where there are only 2 sources, visuals may be included *within* the sources as delineated above.

- **Visual stimuli** should be accompanied by a short, appropriate caption and source.

- For fully accessible tasks, visual stimuli will also need to be translated into descriptions. Certain visual stimuli may not be able to be translated into descriptions without reducing the cognitive complexity of the task. For fully accessible tasks, see "Guidelines for the Inclusion of Images" on page 8 of the *ELA Stimulus Specifications* for a more detailed list of images that can be translated into accessible forms.

- **Textual stimuli should range in difficulty and complexity.** The complexity of the textual stimuli should be, on average, at approximately the lower end of the target grade level. The vocabulary used in the stimulus and the item should be on or below grade level (or footnote). In some cases, a complex authentic source that is at a reading level above the target grade (e.g., an historical primary source document) may be included, but these should be used with caution and appropriate supports should be provided.

- **Textual stimuli should be accessible to English learners,** avoiding the use of unnecessary specialized vocabulary, low frequency words, idioms, and other expressions that are likely to be unfamiliar to English learners. When such words and phrases appear in authentic texts, they may be defined in the text with simpler, more straightforward language (with brackets to indicate that it is a definition) or defined in a footnote.

- **Textual stimuli may include the following genres of writing**:

    - **Informational and literary non-fiction texts**: Includes the subgenres of newspaper, magazine, and Internet articles, essays, memoirs, speeches, interviews, primary and secondary accounts, how-to articles, and functional reading materials such as advertisements, charts, and slide presentations.
    - **Literary texts:** Includes the subgenres of novels (excerpts), short stories (excerpts), poetry, song lyrics
        - In general, although there might be some exceptions, stories or other works of fiction are **generally not appropriate** for these research tasks.

      Allowable uses of literary texts:

      For grades 3-11 opinion, argumentative, informational/explanatory Performance Tasks**:**
        - **Short lit**erary texts may be used to stimulate interest in a topic in the Classroom Activity.
        - Within the Performance Task, literary stimuli **should be used sparingly** (within a set of sources, only one may be a literary text).
        - If a literary text is used, informational/nonfiction texts must be included to set the context for making sense of or evaluating the literary text.
        - If a literary text is used, the focus of the research and full-write **may not be literary analysis**, but broadening an understanding of the text through contextual information.

Attachment 6: SAGE Qualitative Dimensions of Passage Complexity

Literature

Grade Band	Complexity	Levels of Meaning	Structure	Language
3-4	Low	The passage has a single, concrete meaning conveyed through dialogue or narration. The main idea or theme is explicitly stated and clearly supported with supplementary details or quotes. Relationships between related concepts are clearly linked and defined. Character interactions and motivations are basic and require only superficial understanding of their actions. The focus is singularly on the focus on the protagonist and their interaction with secondary or supporting characters. Setting is used as an aesthetic enhancement, not as a way to convey meaning	A consistent, linear narrative is maintained throughout the passage. The narrative is presented from a single point of view and events are presented in chronological order.	The passage uses literal, clear, and contemporary language. High-frequency, grade-appropriate vocabulary and common word meanings are used. Syntax is simple and consistent throughout the passage. Interpretation of these words and phrases leads to a singular understanding of their role and meaning within the passage.
	Medium	The main idea of the passage can be either explicitly or implicitly stated, but multiple connections or inferences will need to be made to understand the full impact. Actions of multiple characters are central to the theme and/or plot. Mood, setting, and tone may be easily identified but do not heavily influence the overall meaning or theme.	The passage maintains a clear and focused structure, but with at least one complex element, such as shifts in time, sequence or point of view. Changes in structure, point of view, or sequence are well-marked.	The passage includes some unfamiliar or above grade level words, the meaning of which can be determined through context clues and evidence from the text. Some variation in syntax may be present.
	High	The passage contains several levels of meaning with an implied theme. Relationships between characters and characters' motivations require some interpretation and are central to the theme and/or plot. Mood, setting, and tone may be more subtle and have some impact on the overall meaning.	The passage contains multiple elements of complex structure, including but not limited to, shifts in perspective, changes in point of view, or non-linear ordering of events. Changes in structure, point of view, or sequence are well-marked.	The vocabulary and syntax of the passage may be complex, and understanding of nuanced or ambiguous meanings of words and phrases may be incorporated at a low frequency. Unfamiliar words or phrases may be determined though context clues and evidence from the text. Introduction of figurative language may be incorporated at this level.

Grade Band	Complexity	Levels of Meaning	Structure	Language
5-6	Low	The passage has a single, concrete meaning conveyed through dialogue or narration. The main idea or theme is explicitly stated and clearly supported with supplementary details or quotes. Relationships between related concepts are clearly linked and defined. Characters and their motivations are explicitly defined in the passage. Setting is used as an aesthetic enhancement, not as a way to convey meaning.	A consistent, linear narrative is maintained throughout the passage. The narrative is presented from a single point of view and events are presented in chronological order.	The passage uses literal, clear, and contemporary language. High-frequency, grade-appropriate vocabulary and common word meanings are used. Syntax is simple and consistent throughout the passage. Interpretation of these words and phrases leads to a singular understanding of their role and meaning within the passage.
	Medium	The main idea or theme of the passage may be either explicitly or implicitly stated, but multiple connections must be made to understand the full impact. Actions of multiple characters are central to the theme and/or plot. Relationships between characters and characters' motivations require interpretation. Mood, setting, and tone may be easily identified but do not heavily influence the overall meaning or theme.	The passage maintains a clear and focused structure, but with at least one complex element, such as shifts in time, sequence or point of view. Changes in structure, point of view, or sequence are well-marked.	The passage includes some unfamiliar or above grade level words. The meaning of most or all unfamiliar words can be determined based on context clues. Familiar vocabulary may be used to convey figurative meaning.
	High	The passage contains several ideas and/or themes, both explicitly stated and implied. The reader must draw inferences about meaning from different elements of the passage, including character(s), setting, plot, dialogue, structure, and/or tone. Characters' motivations and characteristics are strongly implied through clear action or dialogue. Mood, setting, and tone may be more subtle and have a greater impact on the overall meaning.	The passage contains multiple elements of complex structure, such as shifts in time, sequence, or point of view. Changes in structure, point of view, or sequence are well-marked. Elements of structure may contribute to the development of theme, setting, or plot.	The passage includes low-frequency, domain-specific vocabulary, or uncommon word meanings. Some variation in syntax may be present. The use of figurative, ambiguous, ironic, archaic, or otherwise unfamiliar language to convey meaning is incorporated at this level.

Grade Band	Complexity	Levels of Meaning	Structure	Language
7-8	Low	The passage has a single, concrete meaning conveyed through dialogue or narration. The main idea or theme requires a few low level inferences. Relationships between related concepts are clearly linked and defined. Characters and their motivations require little inference. Mood, setting, and tone may be easily identified but do not heavily influence the overall meaning or theme.	The passage is presented in a straightforward fashion without any shifts in time or narrator. A single point of view is maintained throughout.	The text relies on literal, clear, and contemporary language. Vocabulary is grade level appropriate. Dialogue and narration is accessible and may be conversational in tone. The use of literary devices is minimal and syntax is consistent.
	Medium	The passage contains several complex ideas and themes, both explicitly stated and implied. Characters' motivations and characteristics are strongly implied through clear action or dialogue. Mood, setting, and tone may be more subtle and have a greater impact on the overall meaning. Symbols are straightforward, common, and closely linked to their meanings, both in terms of proximity and explanatory language. Connections between meaning, language, and structure are clear.	The passage contains at least one complex element of structure. Complex elements include, but are not limited to, shifts in narrator or time, manipulations of sequence, or use of varied structure, such as a mixture of prose and verse. Changes in structure are well-marked. Elements of structure may contribute to overall meaning.	The passage may include figurative or archaic language structures, as well as unfamiliar vocabulary or dialects. Sarcasm and irony may be implied through dialogue or narration.
	High	The passage contains multiple levels of meaning, with distinct relationships between themes and the characters, setting, and plot. There may be a literal meaning that is intentionally at odds with the author's basic message, as with satire. Character development and motivation are conveyed implicitly. Characters' actions and interactions between characters may be used to make universal statements about the world. Setting serves to underscore the theme and conveys mood or tone, which supports understanding of the explicit theme. Symbols are straightforward and common, but may not be supported by explanation or elaboration. Familiarity with historical references is not required, but may give a deeper understanding of the passage.	The passage contains at least one complex element of structure. Complex elements include, but are not limited to, shifts in narrator or time, manipulations of sequence, or use of varied structure, such as a mixture of prose and verse. Shifts in structure may not be well-marked. Inferences regarding relationships between various structural elements may be required for comprehensive understanding of the passage.	The passage includes significant dense and figurative language that may be ironic, ambiguous, purposefully misleading, archaic, or unfamiliar. Extensive use of dialect may be featured. The passage contains academic or domain-specific vocabulary.

Grade Band	Complexity	Levels of Meaning	Structure	Language
9-11	Low	The passage has a single, concrete meaning conveyed through dialogue or narration. The main idea or theme requires a few low level inferences. Relationships between related concepts are clearly linked and defined. Characters and their motivations are strongly implied. Mood, setting, and tone may be easily identified but do not heavily influence the overall meaning or theme. Symbols are straightforward, common, and closely linked to their meanings, both in terms of proximity and explanatory language. Connections between meaning, language, and structure are clear.	The passage is presented in a straightforward fashion without any shifts in time or narrator. A single point of view is maintained throughout. At this grade level, significant digression into details and setting may be present, but chronology remains consistent.	The text relies on literal, clear, and contemporary language. Vocabulary is grade level appropriate. Dialogue and narration is accessible and may be conversational in tone. The use of literary devices is minimal and syntax is consistent.
	Medium	The passage contains several complex ideas and themes, both explicitly stated and implied. Characters are dynamic and a single character may have multiple motives. Characteristics are implied through clear action or dialogue. Setting serves to underscore the theme and conveys mood or tone, which supports understanding of the explicit theme. Symbols are straightforward and common, but may not be supported by explanation or elaboration. There may be some simple analogies or allusions to other works. Connections between meaning, language, and structure require interpretation.	The passage contains at least one complex element of structure. Complex elements include, but are not limited to, shifts in narrator or time, manipulations of sequence, or use of varied structure, such as a mixture of prose and verse. Changes in structure are well-marked. Inferences regarding relationships between various structural elements may be required for comprehensive understanding of the passage.	The passage may include figurative or archaic language structures, as well as unfamiliar vocabulary or dialects. Sarcasm and irony may be implied through dialogue or narration. The passage uses on-grade level words with intended multiple connotations in order to convey multiple meanings.

Grade Band	Complexity	Levels of Meaning	Structure	Language
9-11 (cont'd.)	High	The passage contains multiple levels of meaning, with complex relationships between themes and the characters, setting, and plot. There may be a literal meaning that is intentionally at odds with the author's basic message, as with satire. Characters are complex with multiple or conflicting motives. Characterization is implied through subtle actions/interactions or subtle dialogue. Characters' actions and interactions between characters are often used to make universal statements about the world. The setting is used to reveal the theme. Setting conveys mood or tone, which is crucial to understanding the implicit theme. Reader may need to understand historical context to fully comprehend text. Symbols are complex, uncommon, and/or make assumptions about students' historical, scientific, or literary knowledge. There may be complex analogies or allusions to other works.	The passage contains at least one complex element of structure. Complex elements include, but are not limited to, shifts in narrator or time, manipulations of sequence, or use of varied structure, such as a mixture of prose and verse. Shifts in structure may not be well-marked. Inferences regarding relationships between various structural elements will be required for comprehensive understanding of the passage.	The passage includes significant dense and figurative language that may be ironic, ambiguous, purposefully misleading, archaic, or unfamiliar. Extensive use of dialect may be featured and some words may not be fully comprehended with context clues. The passage contains academic or domain-specific vocabulary and may make assumptions about prior knowledge or experience. Complex or abstract figurative language may be used.

Informational Text

Grade Band	Complexity	Levels of Purpose	Structure	Language
3-4	Low	The passage has a single, concrete purpose. The purpose is communicated explicitly and no inferences are required. Main ideas, arguments, and claims are stated explicitly and supported by clear, sufficient, and relevant evidence. Relationships between related concepts are clearly linked and defined.	The passage adheres to a common, simple structure that does not deviate from the conventions of common genres. Graphic representations of information (illustrations, maps, and timelines) are simple and are used to demonstrate concepts explicitly stated in the passage.	The passage is composed of basic vocabulary and phrasing that is familiar and understood. Technical or domain-specific words are used minimally and are explicitly defined. Syntax is simple and consistent throughout the passage.
	Medium	The passage has a singular explicit purpose, but may contain related implicit ideas or concepts. The purpose is clearly linked to other explicitly stated ideas or concepts.	The passage contains a structure that may deviate from some standard elements of common genres to incorporate domain-specific structures (procedures, steps, causal relationships, etc.). Increasing dependence on understanding of graphic representations of data or information may be needed to supplement understanding and bridge relationships between concepts.	The passage includes some unfamiliar, technical, or above grade level words. The meaning of most unfamiliar words is provided, or can be determined based on contextual clues. Some variation in syntax may be present.
	High	The passage contains an implicit main purpose. Other main ideas, arguments, and claims are implicit but still supported by clear, sufficient, and relevant evidence. There are some complex ideas that require inference.	The passage contains multiple elements of complex or unfamiliar structure, drawing on domain specific structural requirements and norms. Inferences regarding relationships between various structural elements will be required for comprehensive understanding of the passage. Increasing dependence on understanding of graphic representations of data or information is needed to supplement understanding and bridge relationships between concepts. *Note: Genres at this grade band include the following: biographies and autobiographies, books about history, social studies, science, and the arts, technical texts, including directions, and forms.*	The language and/or syntax of the passage are complex, and understanding of multiple nuanced or ambiguous meanings of words and phrases is required for comprehensive understanding of the text. Introduction of technical or domain specific language and shifts in style may be incorporated at this level.

Grade Band	Complexity	Levels of Purpose	Structure	Language
5-6	Low	The passage has a single, concrete purpose. The purpose is communicated explicitly and requires few inferences. Main ideas, arguments, and claims are stated explicitly and supported by clear, sufficient, and relevant evidence. Relationships between related concepts are clearly linked and defined.	The passage adheres to a common, simple structure that does not deviate from the conventions of common genres. Graphic representations of information (charts, timelines, diagrams, etc.) are simple and are used to supplement overall understanding of ideas and concepts.	The passage is composed of basic vocabulary and phrasing that is familiar and understood. Technical or domain-specific words are used minimally and are explicitly defined. Syntax is clear and consistent throughout the passage.
	Medium	The passage has several levels of purpose, both explicitly stated and implied, or one singular implicit purpose. Multiple points of view or perspectives may be expressed. Relationships between ideas and key concepts, supporting details, and/or claims and evidence are not completely defined and require some interpretation. Links between individuals, events, and ideas in the text may require some analysis.	The passage contains a structure that may deviate from some standard elements of common genres to incorporate domain-specific structures (procedures, steps, causal relationships, etc.) or makes use of multiple common structures. Changes in structure are well marked. Increasing dependence on understanding of graphic representations of data or information may be needed to supplement understanding and bridge relationships between concepts.	The passage includes some unfamiliar, technical, or above-grade-level words. The meanings of most unfamiliar words are provided, or can be determined based on contextual clues. Some variation in syntax may be present.
	High	The passage contains an implicit main purpose that is understood through an analysis of ideas, individuals, or events, and their interaction with one another. Main ideas and key concepts are not explicitly stated. Interpretation is required to identify the link between main ideas and supporting details or claims and evidence. Some arguments or claims may not be sufficiently supported with evidence.	The passage contains multiple elements of complex or unfamiliar structure, drawing on domain-specific structural requirements and norms. Inferences regarding relationships between various structural elements will be required for comprehensive understanding of the passage. The passage contains complex graphics or visuals that provide information that is essential to understanding the text and that is not otherwise available in the passage. *Note: Genres at this grade band include the following: biographies and autobiographies; books about history, social studies, science, and the arts; technical texts, including directions and forms; exposition; argument; personal essays; speeches; and opinion pieces.*	The language and/or syntax of the passage are complex, and understanding of multiple, nuanced, or ambiguous meanings of words and phrases is required for comprehensive understanding of the text. The passage includes common words used in unfamiliar or domain-specific ways. Technical or domain-specific language and shifts in style may be incorporated at this level.

Grade Band	Complexity	Levels of Purpose	Structure	Language
7-8	Low	The passage has a single, concrete purpose. The purpose is communicated explicitly and few inferences are required. Main ideas, arguments, and claims are stated explicitly and clearly supported by sufficient and relevant evidence. Links between individuals, events, and ideas in the text are well defined and easily perceived.	The passage adheres to a common, simple structure with minimal or no deviations from the conventions of common genres. Graphics tend to be simple and either unnecessary or merely supplementary to the meaning of texts.	The passage is composed of grade-appropriate vocabulary and phrasing. Technical or domain-specific words are used minimally and are explicitly defined. Syntax is clear and consistent throughout the passage.
	Medium	The passage has several levels of purpose, both explicitly stated and implied, and with varying levels of complexity. Multiple points of view or perspectives may be expressed. Relationships between ideas and key concepts, supporting details, and/or claims and evidence are not completely defined and require some interpretation. The central idea is refined and supported by specific details in the text. Links between individuals, events, and ideas in the text may require some inference.	The text is organized by multiple, common structures that can be readily recognized. Increasing dependence on understanding of graphic representations of information is required to recognize conceptual relationships.	The passage uses unfamiliar, above-grade-level words or words with intended multiple connotations. Common academic or domain-specific words are used. Simple literary devices or figurative language may be used.
	High	The text's purpose is abstracted or obscured and main ideas are implied. Evidence and reasoning may be purposefully irrelevant or unsound, and the text may leave some matters uncertain. There may be complex connections between purpose, language, and structure, as well as between individuals, events, and ideas, that require inference. There may be some allusions or references that make assumptions regarding students' background knowledge, but this knowledge is not required even though it may give a deeper understanding of the text.	The text has a complex, unmarked structure that may deviate from common genres. The structure may conform to the norms and conventions of a specific discipline (e.g. a scientific paper) or contain a variety of structures (e.g., an academic textbook). The passage contains complex graphics or visuals that provide information that is essential to understanding the text and that is not otherwise available in the passage. Style and structure may support, but are not essential to, understanding of the passage. *Note: Genres at this grade band include the following: biographies and autobiographies; books about history, social studies, science, and the arts; technical texts, including directions and forms; exposition; argument; personal essays; speeches; opinion pieces; memoirs; and journalism.*	The passage relies on highly technical or academic language. The text may make assumptions about content and discipline knowledge. Complex or abstract analogies, figurative language, or literary devices may be used.

Grade Band	Complexity	Levels of Purpose	Structure	Language
9-11	Low	The passage has a single, concrete purpose. The purpose is communicated explicitly and few inferences are required. Main ideas, arguments, and claims are stated explicitly and supported by clear, sufficient, and relevant evidence. Links between individuals, events, and ideas in the text are well-defined and easily perceived. Author uses simple rhetorical devices and techniques to convey ideas.	The passage adheres to a common, simple structure. Slight deviations from the conventions of common genre may occur. Graphics tend to be simple and either unnecessary or merely supplementary to the meaning of texts.	The passage is composed of grade-appropriate vocabulary and phrasing. Technical or domain-specific words are used minimally and are explicitly defined. Syntax is clear and consistent throughout the passage.
	Medium	The passage has several levels of purpose, either explicitly stated or implied, and with varying levels of complexity. Multiple points of view or perspectives are expressed. Relationships between ideas and key concepts, supporting details, and/or claims and evidence are not completely defined and require some interpretation, including where the text leaves matters uncertain. The central idea is refined and supported by specific details in the text. Links between individuals, events, and ideas in the text require some inference.	The passage utilizes more than one structure that may deviate from the conventions of common genres, but are familiar to students at this grade-level or are well-marked. Graphics provide an independent source of information and are essential to understanding a text. Style and structure may support, but are not essential to, understanding of the passage. The passage integrates multiple sources of information in different formats to support author's approach to the central idea/argument.	The passage uses unfamiliar, above grade level words or words with intended multiple connotations. Common academic or domain-specific words are used. Literary devices or figurative language may be used.
	High	The text contains multiple levels of purpose that are abstract or obscure and require a high level of inference. There are complex relationships between ideas, or a literal meaning that does not parallel the author's underlying message. Evidence and reasoning may be purposefully irrelevant or unsound. Two or more central ideas relate to and build upon one another throughout the text. There may be some allusions or references that make assumptions regarding students' background knowledge, but this knowledge is not required even though it may give a deeper understanding of the text. Author uses advanced rhetorical devices and/or techniques to convey ideas.	The structures of the passage are complex, implicit, and/or unconventional. Graphics are complex and provide an independent source of information and are essential to understanding a text. Style and structure contribute significantly to the meaning or effectiveness of the text and are essential to its understanding. The passage integrates multiple sources of information in different formats to fully address the central idea/argument. *Note: Genres at this grade band include the following: exposition, argument, and functional text in the form of personal essays, speeches, opinion pieces, essays about art or literature, biographies, memoirs, journalism, and historical, scientific, technical, or economic accounts (including digital sources) written for a broad audience.*	The text relies heavily on dense, highly technical language that may be domain specific, ambiguous, purposefully misleading, or unfamiliar. The text makes assumptions about content and discipline knowledge. Complex or abstract analogies, figurative language, or literary devices may be used.

Attachment 7:
PARCC Items Inquiry

Dear Mr. Cohen,

Thank you for your question regarding PARCC items. At this time, contract negotiations for future PARCC development and administration are underway, so I am not able to share pricing information. As soon as those negotiations are finalized and a contract is awarded, PARCC will be able to develop an estimate for the costs you requested.

Independent of cost, it is important to note that any use of PARCC items will need to comply with the policies – both current and future – determined by the PARCC Governing Board, including but not limited to test security, administration and item release policies.

Please let me know if you have additional questions.

Laura Slover

CEO, PARCC Inc.

Tallahassee, Florida 32399-0400

INVITATION TO NEGOTIATE
BEST AND FINAL OFFER #2

Reply Number: ITN 2014-47

Title: Florida Standards Assessments

Respondent: American Institutes for Research

Instructions for the Best and Final Offer #2

Your BAFO should include any corrections, additions, and/or clarifications, and any documentation made as a result of the continued negotiation sessions.

The deadline to submit BAFO #2 is Friday, March 14, 2014 by 12:00 PM, E.S.T.

We propose to provide the services being solicited within the specifications of ITN 2014-47.

SIGN BELOW. UNSIGNED OFFERS WILL NOT BE CONSIDERED.

VENDOR NAME: American Institutes for Research

MAILING ADDRESS: 1000 Thomas Jefferson Street, NW

CITY/STATE/ZIP: Washington, DC 20007

AUTHORIZED AGENT (typed): Jon Cohen

AUTHORIZED AGENT (manual):

DATE: 3/14/14

Attachment 1
ITN 2014-47 Florida Standards Assessment

RESPONDENT : American Institutes for Research

We propose to provide the services being solicited for ITN 2014-47 Florida Standards Assessments. All work shall be performed in accordance with the specifications of this ITN, which has been reviewed and understood. **The below prices are all inclusive. Payment for services will be made based on the deliverables and dates specified. There shall be no additional costs charged for work performed under this ITN, unless changes are made during the negotiation phase.**

Respondents may submit bids on any individual assessment components (A, B, C or D), any group of assessment components, or to provide all assessment components (A, B, C and D). The prices on this sheet will be used for evaluation purposes. All accommodations and deliverable costs should be included in each component price. In addition, Respondents should complete the pricing per deliverable in SECTION 7.8, for each assessment component, which will be used for negotiation purposes and any resulting contract.

	PRICING							
	YEAR 1	YEAR 2	YEAR 3	TOTAL ORIGINAL CONTRACT TERM (YEARS 1-3)	RENEWAL YEAR 1	RENEWAL YEAR 2	RENEWAL YEAR 3	GRAND TOTAL (ORIGINAL TERM + ALL RENEWALS)*
A. Computer-based and paper-based assessments in English Language Arts/ Literacy in Grades 3-8 per schedule in Appendix A.								
B. Computer-based and paper-based assessments in Mathematics in Grades 3-8 per schedule in Appendix A.								
C. Computer-based and paper-based assessments in English Language Arts/Literacy in Grades 9-11 per schedule in Appendix A.								
D. Computer-based and paper-based End-of-Course (EOC) assessments in Algebra 1, Geometry, and Algebra 2 per schedule in Appendix A.								
E. All assessments (A-D) per schedule in Appendix A.	49,492,262	36,886,239	34,858,527	121,237,028	34,931,208	32,167,856	31,663,907	219,999,999

* Evaluation points will be calculated on these costs.

55					(Renewal 2 - June 1, 2018)	$0.00
56					(Renewal 3 - June 1, 2019)	$0.00
57	Test Development	Periodic: Interpretive Products: Test Item Specifications Documents	Test item specifications will be produced for all grades/subjects and may be grouped together in one booklet by grade band or content area. They are based on the standards and define both the content and the format of the test items. Their primary purpose is to establish guidelines for test item writers and reviewers. ITN Reference 7.3.7.5	(1) Provide Department email reflecting approval of each test item specification document. (2) Final PDF files provided via SFTP.	November 1, 2015	$59,687.00
58	Test Development	Periodic: ELA/L and Mathematics Sample Scoring Guides	The contractor will be expected to post electronic publications that provide information to help educators understand the scoring of constructed-response items included on student reports. These publications provide information about the test design, standards and benchmarks, item types, and how items are scored. They also provide scoring rubrics and the annotated papers used to train scorers for the constructed-response items. Each sample item from the scoring papers is displayed as it appeared on the test and responses for each score point, images of student responses, and annotations explaining why the response received a particular score are provided. ITN Reference 7.3.10	(1) Provide Department email reflecting approval of each scoring guide. (2) Final PDF files provided via SFTP.	(Dates TBD - These should coincide with the approved report release dates, which are part of contract negotiations.) 2015	$67,380.00
59					2016	$2,000.00
60					2017	$2,000.00
61					(Renewal 1 - 2018)	$2,000.00
62					(Renewal 2 - 2019)	$2,000.00
63					(Renewal 3 - 2020)	$2,000.00

68					(Renewal 2 - 2019)	$2,000.00
69					(Renewal 3 - 2020)	$2,000.00
70	Test Development	Periodic: Test Design and Blueprint	The Test Design and Blueprint will clearly delineate the number of items, types and placement of items, time allotted for each test session, and location of field-test items for all grades and subjects. ITN Reference 7.3.1 and 7.3.2.1	(1) Provide Department email reflecting approval of Test Design and Blueprint (2) Appearance of completed schedule in weekly management report	June 1, 2015	$316,596.00
71	Test Development	Periodic: Content Item Review "Cleans"	After Content Item Review, the contractor, in conjunction with the Department, will conduct an editorial and content review of the items to ensure that changes have been applied correctly and that all editorial and content issues are corrected. ITN Reference 7.3.4.2	(1) Provide Department email reflecting completion of the “Cleans” process (2) Appearance of completed schedule in weekly management report	February 1, 2016	$2,046,567.00
72					February 1, 2017	$2,284,507.00
73					(Renewal 1 - February 1, 2018)	$2,594,363.00
74					(Renewal 2 - February 1, 2019)	$7,686.00
75					(Renewal 3 - February 1, 2020)	$4,800.00
76	Test Development	Periodic: Field Test Item Sets and Forms Review	Whether an embedded or stand-alone model is used, the contractor, in conjunction with the Department, will construct field-test forms. ITN Reference 7.3.5 and 7.3.6	(1) Provide Department email reflecting completion of the field test forms process (2) Appearance of completed schedule in weekly management report	May 1, 2015	$11,849,988.00
77					May 1, 2016	$89,906.00
78					(Renewal 1 - May 1, 2017)	$89,906.00
79					(Renewal 2 - May 1, 2018)	$0.00
80					(Renewal 3 - May 1, 2019)	$0.00
81	Test Development	Periodic: Onsite Test Construction	The contractor will host content experts and leadership from the Department for the express purpose of constructing assessments for all grades/courses and subjects. To the extent possible, the Department expects to be involved in any test construction activities for 2015	1) Provide Department email reflecting completion of the test construction process (2) Appearance of completed schedule in weekly management report	July 15, 2014	$72,146.00
82					July 15, 2015	$104,489.00
83					July 15, 2016	$104,489.00
84					(Renewal 1 - July 15, 2017)	$104,489.00
85					(Renewal 2 - July 15, 2018)	$104,489.00

86			any test construction activities for 2015 assessments still to be completed after contract execution (in July 2014). ITN Reference 7.3.7		(Renewal 3 - July 15, 2019)	$104,489.00
87	Test Development	Periodic: Item Development Plan	To ensure the quality and number of items/passages developed is sufficient to create future operational test forms, the contractor will submit an item development plan delineating the number and types of items to be developed. ITN Reference 7.3.0	1) Provide Department email reflecting completion of the Item Development Plan. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$49,938.00
88					December 1, 2016	$49,938.00
89					(Renewal 1 - December 1, 2017)	$49,938.00
90					(Renewal 2 - December 1, 2018)	$0.00
91	Test Development	Periodic: Item Writer Training	The contractor must identify and recruit a sufficient number of highly-qualified writers for passages and items to ensure variety and quality of development. The contractor, in conjunction with the Department, will conduct an annual training session for all Item Writers. ITN Reference 7.3.3	1) Provide Department email reflecting completion of Item Writer Training. (2) Appearance of completed schedule in weekly management report.	December 1, 2015	$41,483.00
92					December 1, 2016	$19,520.00
93					(Renewal 1 - December 1, 2017)	$19,520.00
94					(Renewal 2 - December 1, 2018)	$0.00
95	Test Development	Periodic: Meetings with Educators	The contractor is responsible for organizing and convening meetings for the purpose of reviewing assessment items and otherwise supporting the assessment program. These meetings are referenced in the ITN in 7.3.4 and 7.7.7. This deliverable includes the cost of preparing for and administering the meeting, but it does not include the cost of travel for meeting participants, which is covered as a reimbursable category in 7.7.9.	(1) Include support for all meetings since the previous invoice. (2) Provide the meeting costs, a final agenda, and a final list of attendees for each meeting.	(Dates to be negotiated.) 2015	$278,476.00
96					2016	$282,206.00
97					2017	$286,025.00
98					(Renewal 1 - 2018)	$293,914.00
99					(Renewal 2 - 2019)	$102,430.00
100					(Renewal 3 - 2020)	$102,430.00
101	Test Development	Periodic: English-to-Language Translation Dictionary	The respondent's reply should describe the provision on the CBT system of an on-screen English-to-heritage language translation dictionary for English Language Learners. ITN Ref 7.3.11.2	(1) Provide evidence of Department acceptance and approval (email is acceptable) of the English-to-Language Translation Dictionary.	(TBD - Part of negotiation) 2015	$5,000.00
102					2016	$1,000.00

403	Test Administration	PERIODIC: Develop and deliver approved practice tests and tutorials for the computer-based and paper-based assessments (sample test materials and computer-based practice tests).	According to production schedules, all practice materials must be developed and approved on a timeline to be established that offers students enough time to practice prior to each administration. All practice tests (computer-based and paper-based) must contain 10-20 sample items. For the paper-based practice materials, there should be a separate test booklet and a separate answer key booklet for teachers. These paper-based practice materials are produced in ADA-compliant PDF files for posting. Practice materials must also be produced for all accommodated versions (computer-based accommodations and paper-based accommodations, such as braille and large print). ITN Reference 7.3.7.5 and 7.4.9.6	(1) Provide Department email reflecting approval of the practice tests and tutorials that reflect the requirements for each year of the assessment. For year 1 of the contract, this will be PDFs for all grades and subjects, and computer-based practice tests for all grades and subjects that will be offered as computer-based subjects the first year. As grades and subjects are added each year (per the schedule in Appendix A), the appropriate computer-based practice tests must also be released. This delivery includes the annual delivery of requested paper-based accommodated versions, which are the only versions that are shipped to districts. (All others are published or linked for distribution.)	November 2014	$121,502.00
404					November 2015	$8,000.00
405					November 2016	$8,000.00
406					(Renewal 1 - November 2017)	$8,000.00

1108	Scoring and Reporting	Fall ELA/L Retake: Handscoring of Performance Tasks	Handscoring refers to the processes necessary for determining the rating of a student's response on the writing prompts or on the performance-based tasks in ELA/L and Mathematics that respondents may propose. Both paper-based and computer-based tests will contain performance tasks, and so the Contractor must have the capability to score both hand-written and key-entered student responses. The Department requires handscoring processes that are reliable and valid, as well as efficient in terms of time and expenditures. The handscoring process must follow the handscoring specifications. The final handscoring report, as described in the ITN, is required as evidence for payment. ITN Reference 7.5.4.5	(1) Provide Department email reflecting approval of the final handscoring report.	See Appendix B. Dates to be determined as part of contract negotiation. 2015	$99,432.00
1109					2016	$87,902.00
